**Handbook to Life in the Medieval World, 3-Volume Set** Madeleine Pelter Cosman, Linda Gale Jones, 2009 Presents a three volume set that examines the medieval civilizations of the Muslims, Jews, and Christians including history, economics, medicine, technology, art, literature, and clothing      *Colonial Virtue* Kasey Evans, 2012-01-14 *Colonial Virtue* is the first study to focus on the role played by the virtue of temperance in shaping ethical debates about early English colonialism. Kasey Evans tracks the migration of ideas surrounding temperance from classical and humanist writings through to sixteenth and seventeenth century applications, emphasizing the ways in which they have transcended the vocabularies of geography and time. *Colonial Virtue* offers fresh insights into how English Renaissance writers used temperance as a privileged lens through which to view New World morality and politically to justify colonial practices in Virginia and the West Indies. Evans uses literary texts including *The Fairie Queene* and *The Tempest* and sources such as sermons, dictionaries, and visual artifacts to navigate alliances between traditional semantics and post-colonial political criticism. Beautifully written and deeply engaging, *Colonial Virtue* also models an expansive methodology for literary studies through its close readings and rhetorical analyses.

*Early English Performance: Medieval Plays and Robin Hood Games* John Marshall, 2019-10-08 Covering a period of nearly 40 years' work by the author, this collection of essays in the *Shifting Paradigms in Early English Drama Studies* series brings the perspective of a drama academic and practitioner of early English plays to the understanding of how medieval plays and Robin Hood games of the fifteenth and sixteenth centuries were performed. It explores why, where, when, and how the plays happened, who took part, and who were the audiences. The insights are informed by a combination of research and the public presentation of surviving texts. The research included in the volume unites the early English experiences of religious and secular performance. This recognition challenges the dominant critical distinction of the past between the two and the consequent privileging of biblical and moral plays over secular entertainments. What further binds rather than separates the two is that the destination of funds raised by the different activities maintained the civic and parochial needs of the institutions upon which the people depended. This collection redefines the inclusive nature and common interests of the purposes that lay behind generically different undertakings. They shared an extraordinary investment of human and financial resources in the anticipation of a profit that was pious and practical. CS1081

**Landscape and Religion from Van Eyck to Rembrandt** Boudewijn Bakker, 2017-07-05 Offering a corrective to the common scholarly characterization of seventeenth century Dutch landscape painting as modern, realistic, and secularized, Boudewijn Bakker here explores the long history and purpose of landscape in Netherlandish painting. In Bakker's view, early Netherlandish as well as seventeenth century Dutch painting can be understood only in the context of the intellectual climate of the day. Concentrating on landscape painting as

the careful depiction of the visible world Bakker's analysis takes in the thought of figures seldom consulted by traditional art historians such as the fifteenth century philosopher Dionysius the Carthusian the sixteenth century religious reformer John Calvin the geographer Abraham Ortelius and the seventeenth century poet Constantijn Huygens Probing their conception of nature as the first Book of God and art as its representation Bakker identifies a world view that has its roots in the traditional Christian perceptions of God and creation Landscape and Religion from Van Eyck to Rembrandt imposes a new layer of interpretation on the richly varied landscapes of the great masters In so doing it adds a new dimension to the insights offered by modern art historical research Further Bakker's explorations of early modern art and literature provide essential background for any student of European intellectual history

### **Renaissance Culture and the Everyday** Patricia Fumerton, Simon Hunt, 2014-06-10

It was not unusual during the Renaissance for cooks to torture animals before slaughtering them in order to render the meat more tender for women to use needlepoint to cover up their misconduct and prove their obedience and for people to cover the walls of their own homes with graffiti Items and activities as familiar as mirrors books horses everyday speech money laundry baskets graffiti embroidery and food preparation look decidedly less familiar when seen through the eyes of Renaissance men and women In Renaissance Culture and the Everyday such scholars as Judith Brown Frances Dolan Richard Helgerson Debora Shuger Don Wayne and Stephanie Jed illuminate the sometimes surprising issues at stake in just such common matters of everyday life during the Renaissance in England and on the Continent Organized around the categories of materiality women and transgression and constantly crossing these categories the book promotes and challenges readers thinking of the everyday While not ignoring the aristocratic it foregrounds the common person the marginal and the domestic even as it presents the unusual details of their existence What results is an expansive variegated

and sometimes even contradictory vision in which the strange becomes not alien but a defining mark of everyday life
