Grasp Of Consciousness:

The Grasp of Consciousness (Psychology Revivals) Jean Piaget, 2015-10-05 Originally published in English in 1976 the book draws on and extends our knowledge of the process of learning The subject of the study is the general stage in a child's development that comes between his successful performance of an activity without knowing how he did it that is what he had to do in order to succeed and the times when he becomes aware of what went into that action The book reports the results of experiments conducted at the Centre of Genetic Epistemology Children ranging in age between four and adolescence were asked to perform such tasks as walking on all fours playing tiddlywinks building a ramp for a toy car They were then asked to explain how they had performed the task and in some cases to instruct the interviewer Their answers show a number of surprising inaccuracies in the child's ability to grasp the nature of what he has done Taking a broad view of his results Piaget shows that they reveal several stages in the gradual development of the child's conceptualization of his actions In analysing each stage Piaget argues that the child's concept of his own action cannot be considered a simple matter of enlightenment but must actively be reconstructed from his experience This view has always been at the core of Piaget's work and a new area of the child's mental world is here given definitive treatment **The Grasp of Consciousness**, 1977

The Grasp of Consciousness (La Prise de Conscience, Engl.). Action and Concept in the Young Child Jean Piaget, 1976 *The Grasp of Consciousness* Jean Piaget, 1977 **Consciousness** Rocco J Gennaro, 2016-10-04 Consciousness is arguably the most important interdisciplinary area in contemporary philosophy of mind with an explosion of research over the past thirty years from philosophers psychologists and scientists It is also perhaps the most puzzling aspect of the world despite the fact that it is familiar to each of us Consciousness also seems resistant to any straightforward physical explanation This book introduces readers to the contemporary problem of consciousness providing a clear introduction to the overall landscape and a fair minded critical survey of various theories of consciousness Beginning with essential historical background to the problem of consciousness Rocco Gennaro explores the following key topics and debates the metaphysical problem of consciousness including varieties of dualism and materialism consciousness and neuroscience particularly the question of whether consciousness can be reduced to brain activity or attentional mechanisms representational and cognitive theories of consciousness consciousness and psychopathology animals machines and consciousness Extensive use is made of interesting phenomena throughout the book ranging from blindsight synaesthesia and change blindness to phantom limb syndrome split brain cases and dissociative identity disorder DID The inclusion of chapter summaries annotated further reading and a glossary make this book essential reading for anyone seeking a clear and informative overview of the problem of consciousness not only in philosophy but related fields such as psychology and cognitive science [Phenomenology and the Physical Reality of Consciousness](#) Arthur Melnick, 2011-08-31 The predominant positive view among philosophers and scientists alike is that consciousness is something realized in brain activity This view

however largely fails to capture what consciousness is like according to how it shows itself to conscious beings What this work proposes instead is that consciousness is a phenomenon that exists in and throughout the body Apart from whether or not it involves intentionality and apart from whether or not it involves awareness of the self consciousness is self intimating self revealing self disclosing Self disclosure is the definitive phenomenological character of consciousness in all its forms Taking this stance as a point of departure the book presents a specific account of what bodily field phenomenon consciousness is In this way the current stalemate in philosophy over the question of the physical reality of consciousness is broken Series A *Psychology, Descriptive and Explanatory* Ladd,1894 **Consciousness** Rocco Gennaro,2016-10-04 Consciousness is arguably the most important interdisciplinary area in contemporary philosophy of mind with an explosion of research over the past thirty years from philosophers psychologists and scientists It is also perhaps the most puzzling aspect of the world despite the fact that it is familiar to each of us Consciousness also seems resistant to any straightforward physical explanation This book introduces readers to the contemporary problem of consciousness providing a clear introduction to the overall landscape and a fair minded critical survey of various theories of consciousness Beginning with essential historical background to the problem of consciousness Rocco Gennaro explores the following key topics and debates the metaphysical problem of consciousness including varieties of dualism and materialism consciousness and neuroscience particularly the question of whether consciousness can be reduced to brain activity or attentional mechanisms representational and cognitive theories of consciousness consciousness and psychopathology animals machines and consciousness Extensive use is made of interesting phenomena throughout the book ranging from blindsight synaesthesia and change blindness to phantom limb syndrome split brain cases and dissociative identity disorder DID The inclusion of chapter summaries annotated further reading and a glossary make this book essential reading for anyone seeking a clear and informative overview of the problem of consciousness not only in philosophy but related fields such as psychology and cognitive science **Introduction to the Genetic Treatment of the Faith-consciousness in the Individual** William Wilberforce Costin,1909 A Theory of Reality George Trumbull Ladd,1899 **Fundamentals of child study; a discussion of instincts and other factors** Edwin Asbury Kirkpatrick,1917 **The Contemporary Review** ,1897 Development and Purpose Leonard Trelawny Hobhouse,1913 *Outlines of Descriptive Psychology* George Trumbull Ladd,1898 **Mental Science and Methods of Mental Culture** Edward Brooks,1882 Thinking about Consciousness David Papineau,2002 Thinking About Consciousness is a discussion of recent physicalist ideas about consciousness written in an accessible style by David Papineau The Theory of Intuition in Husserl's Phenomenology Emmanuel Lévinas,1995 In this landmark study Emmanuel Levinas discusses the aspects and function of intuition in Husserl s thought and its meaning for philosophical self reflection An essential and illuminating explication of central issues in Husserl s phenomenology it is also important as a formative work of one of this century s most distinguished philosophers Levinas focuses on the role of

intuition which he explains as the theoretical act of consciousness that makes objects present to us He demonstrates how Husserl's theory of intuition follows directly from his new conception of being He then identifies intuition as the original phenomenon that leads to the concept of truth itself In this analysis he shows that Husserl's theory of being opens up an entirely new philosophical dimension **Husserl's Legacy in Phenomenological Philosophies** Anna-Teresa
