Grass Roots And Schoolyards:

The Rise of American High School Sports and the Search for Control Robert Pruter, 2013-08-29 Nearly half of all American high school students participate in sports teams With a total of 7.6 million participants as of 2008 this makes the high school sports program in America the largest organized sports program in the world Pruter's work traces the history of high school sports from the student led athletic clubs of the 1800s through to the establishment of educator control of high school sports under a national federation by the 1930s Pruter's research serves not only to highlight this rich history but also to provide new perspectives on how high school sports became the arena by which Americans fought for some of the most contentious issues in society such as race immigration and Americanization gender roles religious conflict the role of the military in democracy and the commercial exploitation of our youth

Ghosts in the Schoolyard Eve L. Ewing, 2020-04-10 Failing schools Underprivileged schools Just plain bad schools That's how Eve L. Ewing opens *Ghosts in the Schoolyard* describing Chicago

Public Schools from the outside The way politicians and pundits and parents of kids who attend other schools talk about them with a mix of pity and contempt But Ewing knows Chicago Public Schools from the inside as a student then a teacher and now a scholar who studies them And that perspective has shown her that public schools are not buildings full of failures they re an integral part of their neighborhoods at the heart of their communities storehouses of history and memory that bring people together Never was that role more apparent than in 2013 when Mayor Rahm Emanuel announced an unprecedented wave of school closings Pitched simultaneously as a solution to a budget problem a response to declining enrollments and a chance to purge bad schools that were dragging down the whole system the plan was met with a roar of protest from parents students and teachers But if these schools were so bad why did people care so much about keeping them open to the point that some would even go on a hunger strike Ewing s answer begins with a story of systemic racism inequality bad faith and distrust that stretches deep into Chicago history Rooting her exploration in the historic African American neighborhood of Bronzeville Ewing reveals that this issue is about much more than just schools Black communities see the closing of their schools schools that are certainly less than perfect but that are theirs as one more in a long line of racist policies The fight to keep them open is yet another front in the ongoing struggle of black people in America to build successful lives and achieve true self determination

Grassroots Development ,2002 **Grassroots at the Gateway** Clarence Lang,2010-04-23

This is a theoretically sophisticated and thoroughly documented historical case study of the movements for African American liberation in St Louis Through detailed analysis of black working class mobilization from the depression years to the advent of Black Power award winning historian Clarence Lang describes how the advances made in earlier decades were undermined by a black middle class agenda that focused on the narrow aims of black capitalists and politicians The book is a major contribution to our understanding of the black working class insurgency that underpinned the civil rights and Black Power campaigns of the twentieth century V P Franklin University of California Riverside A major work of scholarship that will transform historical understanding of the pivotal role that class politics played in both civil rights and Black Power activism in the United States Clarence Lang s insightful engagingly written and well researched study will prove indispensable to scholars and students of postwar American history Peniel Joseph Brandeis University Breaking new ground in the field of Black Freedom Studies Grassroots at the Gateway reveals how urban black working class communities cultures and institutions propelled the major African American social movements in the period between the Great Depression and the end of the Great Society Using the city of St Louis in the border state of Missouri as a case study author Clarence Lang undermines the notion that a unified black community engaged in the push for equality justice and respect Instead black social movements of the working class were distinct from and at times in conflict with those of the middle class This richly researched book delves into African American oral histories records of activist individuals and organizations archives of the black advocacy press and even the records of the St Louis economic power brokers whom local black freedom fighters

challenged Grassroots at the Gateway charts the development of this race class divide offering an uncommon reading of not only the civil rights movement but also the emergence and consolidation of a black working class Clarence Lang is Assistant Professor in African American Studies and History at the University of Illinois at Urbana Champaign Photo courtesy Western Historical Manuscript Collection University of Missouri St Louis Schoolyard-Enhanced Learning Herbert W.
