Gopinathan Nair, 2013-08-20 Every human being regardless of his or her origin or upbringing is endowed with a marvelous and mysterious apparatus called the mind It works twenty four hours a day producing conditions events and experiences in each of our lives These conditions always take shape in the mind Your mind is always busy weaving your tomorrow a tomorrow either of joy or of sorrow depending upon the thoughts you entertain in your mind Your thoughts are the tools with which you work and the only tools you have to shape your destiny Your experience in the outer world only reveals what is lurking in the secret chambers of your very own mind Your experience is a mere reflection of your thoughts For example you look into the mirror and you don't like the face you see If you are a woman you'll change your makeup and hairstyle to look better If you are a man you'll comb your hair trim your mustache or shave to look better But you will not break the mirror because you know that the mirror is only reflecting the face you have Similarly your experience in life is a mirror reflecting your inner thoughts Our circumstances are merely a looking glass a mirror of reflection But in our daily life without realizing what we are doing we very often try to break the mirror For example if you are not very happy with your income you start criticizing your employer the job your upbringing and everybody else for your shortcomings You criticize your boss who makes more money you talk maliciously about the chief executive of a big corporation who makes a million dollars a year They are not going to change your conditions but are merely reflecting your thoughts To change the conditions you have to change the causes your thoughts Blaming your poor economic condition is like blaming the mirror for your uncharming face Think about it After you study this book you will learn not to blame the mirror for your poor image You will consciously start working with causes instead of conditions Get in the Game Clayton Oliphint, Mary Brooke Casad, 2016-02-02 What is true Christian discipleship Living in Christ brings us joy and fulfillment but what are we called to do Get in the Game a book and 4 week study teaches the basics of Christian discipleship and explores how we are called to serve others through Christian service when we follow the example of Jesus Part of The Basics Series the book helps individuals and group members discover the joyful service that results when faith is put into action A Leader Guide which includes everything a group leader needs to plan and facilitate the 4 session study is also available Wow This book is a life changer It will inspire you to get off the sideline get in the game and put your faith into action Larry Fedora Head Football Coach University of North Carolina at Chapel Hill Combines solid theology practical applications and relevant reflections to help new and seasoned Christians grow

Psychologists philosophers theologians and educationalists have all lately explored various conceptual moral psychological and pedagogical dimensions of gratitude in a rapidly expanding academic and popular literature However while the distinguished contributors to this work hail from these distinct disciplines they have been brought together in this volume precisely in recognition of the need for a more interdisciplinary perspective on the topic While further developing such more familiar debates in the field as whether it is appropriate to feel grateful in circumstances in which there is no obvious benefactor whether it is proper to feel grateful to those who have benefited one only from a sense of duty and whether it makes sense to be grateful if so doing colludes with injustice the essays in this collection explore a wide variety of fresh conceptual psychological and moral issues For example in addition to identifying some new moral paradoxes about gratitude and seeking a generally more morally discriminating approach to gratitude education relations are explored between gratitude and humility forgiveness and appreciation and the religious and spiritual dimensions of the concept are also given much overdue attention By drawing together serious academic engagement with the study of gratitude and a serious attempt to undertake this within an interdisciplinary perspective Perspectives on Gratitude will be of value to academics and graduate students in the fields of philosophy psychology and theology as well as other research based disciplines
