## **Grayback Class:**

Power Shift Dan Gillcrist, 2006 Power Shift is the first comprehensive account of the US Navy's Submarine Force transition from diesel to nuclear power. It represented the biggest most costly and disruptive technological change in naval history. This was all done against the backdrop of intense Cold War operations where US submarines played a critical role in maintaining the peace. The story is told by the people who were part of the power shift. From seamen to admirals they tell the stories of how the technological and cultural changes affected them.

**Cold War Submarines** Norman Polmar, Kenneth J. Moore, 2004 Submarines had a vital if often unheralded role in the superpower navies during the Cold War. Their crews carried out intelligence collection operations sought out and stood ready to destroy opposing submarines and from the early 1960s threatened missile attacks on their adversary's homeland providing in many respects the most survivable nuclear deterrent of the Cold War. For both East and West the modern submarine originated in German U boat designs obtained at the end of World War II. Although enjoying a similar technology base by the 1990s the superpowers had created submarine fleets of radically different designs and capabilities. Written in collaboration with the former Soviet submarine design bureaus Norman Polmar and K J Moore authoritatively demonstrate in this landmark study how differing submarine missions antisubmarine priorities levels of technical competence and approaches to submarine design organizations and management caused the divergence.

The Silent Service: Grayback Class H. Jay Riker, 2000-02-08 Throughout the annals of history the best of intentions and sometimes the worst have set in motion events with a vastly different outcome than originally intended. In this entertaining fact filled chronicle William Forstchen and Bill Fawcett explore the watersheds of history that began as the best of ideas and ended as the worst of fiascoes. A HOLY WAR The Medieval Crusades for religious liberation become centuries of slaughter and destruction. SIBLING RIVALRY Leif Erikson spares his sister's life and delays the discovery of the New World for five hundred years. BIG GUNS Emperor Constantine XI refuses to buy a new supercannon that would let him dominate his enemies so its creator sells the cannon to the Turks who then crush Constantinople. With casual wit and subtle insight It Seemed Like a Good Idea tucks tongue in cheek and rides out the fiascoes of history. The year is 1985 and two great superpowers the U S and the U S S R are locked in a lethal escalating race of arms and technology. When reports are received of a devastating new Soviet weapon a prototype attack submarine more advanced than anything in the U S undersea arsenal a nearly obsolete Grayback Class submarine carrying a platoon of SEALs is suddenly America's greatest hope. Their mission to penetrate the Soviet sub's home port the heavily defended Severodvinsk shipyard on the White Sea and bring back secret data on the new sub. The task is almost impossible but failure would give a powerful enemy dominion over the Earth's waters and a first strike advantage that could prove nothing less than catastrophic to the Free World. Berry, 2022-11-21 Tax dollars wasted on over priced ships Good ships decommissioned for no reason Brand new shore infrastructure shuttered or ill maintained U S naval history from 1950 to the present is rife with mismanagement the consequences of which fall largely on the taxpayers shoulders And when most of the people making decisions in the Pentagon have never served on the deck of a ship is it any wonder With little to no oversight the Navy has spent and wasted millions of dollars over the past seventy years From decommissioning ships early to constructing classes of ships that are less capable than advertised to Congress the Navy has heavily invested in systems that looked fine on paper but were failures in actual application This detailed history of the state of commissioned ships includes recommendations for the allocation of funds into improvements that should be made to ensure sustainable and affordable ships for the U S Navy of the future For readers interested in the detailed minutiae related to the development cost and lifetime of naval ships or of any military expenditures for that matter this book is a must read manual The Ship and Vessel index for this publication will be provided by contacting the author at TheTaxpayerNavy.com
