Virus Mania Torsten Engelbrecht, Claus Köhnlein, Samantha Bailey, Stefano Scoglio, 2021-04-22 The book Virus Mania has been written with the care of a master craftsman courageously evaluating the medical establishment the corporate elites and the powerful government funding institutions Wolfgang Weuffen MD Professor of Microbiology and Infectious Epidemiology The book Virus Wahn can be called the first work in which the errors frauds and general misinformations being spread by official bodies about doubtful or non virus infections are completely exposed Gordon T Stewart MD professor of public health and former WHO advisor The population is terrified by reports of so called COVID 19 measles swine flu SARS BSE AIDS or polio However the authors of Virus Mania investigative journalist Torsten Engelbrecht Dr Claus Köhnlein MD Dr Samantha Bailey MD and Dr Stefano Scoglio BSc PhD show that this fearmongering is unfounded and that virus mayhem ignores basic scientific facts The existence the pathogenicity and the deadly effects of these agents have never been proven The book Virus Mania will also outline how modern medicine uses dubious indirect lab tools claiming to prove the existence of viruses such as antibody tests and the polymerase chain reaction PCR The alleged viruses may be in fact also be seen as particles produced by the cells themselves as a consequence of certain stress factors such as drugs These particles are then picked up by antibody and PCR tests and mistakenly interpreted as epidemic causing viruses The authors analyze all real causes of the illnesses named COVID 19 avian flu AIDS or Spanish flu among them pharmaceuticals lifestyle drugs pesticides heavy metals pollution malnutrition and stress To substantiate it the authors cite dozens of highly renowned scientists among them the Nobel laureates Kary Mullis Barbara McClintock Walter Gilbert and Sir Frank Macfarlane Burnet as well as microbiologist and Pulitzer Prize winner René Dubos and it presents more than 1 400 solid scientific references The

Cheating and Business Ethics Wallace R. Baker,2019-10-15 This volume is a unique collection of inspiring reflections designed to enhance the reader s understanding of both the importance and the relativity of business ethics It invites experts and specialists of business ethics to explore threads from history religion philosophy and biology but will also appeal to the

The book draws from a rich mine of academic sources to consider how business ethics relate to today's key concerns including wealth inequality, the need for effective financial regulations and sustainability, how best to engage with our duties to planet earth. Authorial Ethics Robert Hauptman, 2011-02-22. Authorial Ethics is a normative study that deals with the many ways in which writers abuse their commitment to truth and integrity. It is divided by academic discipline and includes chapters on journalism, history, literature, art, psychology, and science, among others. Robert Hauptman offers generalizations and theoretical remarks exemplified by specific cases. Two major abrogations are inadvertent error and purposeful misconduct, which is subdivided into falsification, fabrication, and plagiarism. All of these problems appear in most disciplines, although their negative impact is felt most potently in biomedical research and publication. Professor Mary Lefkowitz, the classicist, provides an incisive foreword.

Corrupt Research Raymond Hubbard, 2015-07-01. Addressing the immensely important topic of research credibility, Raymond Hubbard's groundbreaking Corrupt Research proposes that we must treat such information with a healthy dose of skepticism. This book argues that the dominant model of knowledge procurement subscribed to in these areas, the significant difference paradigm, is philosophically suspect, methodologically impaired, and statistically broken. Hubbard introduces a more accurate alternative framework, the significant sameness paradigm, for developing scientific knowledge. The majority of the book comprises a head-to-head comparison of the significant difference versus significant sameness conceptions of science across philosophical, methodological, and statistical perspectives.

The Mysterious Collapse of World Trade Center 7 David Ray Griffin, 2012-12-30. At 5:20 in the afternoon on 9/11, Building 7 of the World Trade Center collapsed even though it had not been struck by a plane and had fires on only a few floors. The reason for its collapse was considered a mystery. In August 2008, NIST, the National Institute of Standards and Technology, issued its

report on WTC 7 declaring that the reason for the collapse of World Trade Center 7 is no longer a mystery and that science is really behind what we have said Showing that neither of these claims is true David Ray Griffin demonstrates that NIST is guilty of the most serious types of scientific fraud fabricating falsifying and ignoring evidence He also shows that NIST's report left intact the central mystery How could a building damaged by fire not explosives have come down in free fall
