Great Buildings Of The World Abbeys Of:

Turrets, Towers, and Temples: The Great Buildings of the World, as Seen and Described by Famous Writers Esther Singleton, 2020-09-28 A yard or two farther we pass the hostelry of the Black Eagle and glancing as we pass through the square door of marble deeply moulded in the outer wall we see the shadows of its pergola of vines resting on an ancient well with a pointed shield carved on its side and so presently emerge on the bridge and Campo San Mois whence to the entrance into St Mark s Place called the Bocca di Piazza mouth of the square the Venetian character is nearly destroyed first by the frightful facade of San Mois which we will pause at another time to examine and then by the modernizing of the shops as they near the piazza and the mingling with the lower Venetian populace of lounging groups of English and Austrians We will push fast through them into the shadow of the pillars at the end of the Bocca di Piazza and then we forget them all for between those pillars there opens a great light and in the midst of it as we advance slowly the vast tower of St Mark seems to lift itself visibly forth from the level field of chequered stones and on each side the countless arches prolong themselves into ranged symmetry as if the rugged and irregular houses that pressed together above us in the dark alley had been struck back into sudden obedience and lovely order and all their rude casements and broken walls had been transformed into arches charged with goodly sculpture and fluted shafts of delicate stone And well may they fall back for beyond those troops of ordered arches there rises a vision out of the earth and all the great square seems to have opened from it in a kind of awe that we may see it far away a multitude of pillars and white domes clustered into a long low pyramid of coloured light a treasure heap it seems partly of gold and partly of opal and mother of pearl hollowed beneath into five great vaulted porches ceiled with fair mosaic and beset with sculpture of alabaster clear as amber and delicate as ivory sculpture fantastic and involved of palm leaves and lilies and grapes and pomegranates and birds clinging and fluttering among the branches all twined together into an endless network of buds and plumes and in the midst of it the solemn forms of angels sceptred and robed to the feet and leaning to each other across the gates their figures indistinct among the gleaming of the golden ground through the leaves beside them interrupted and dim like the morning light as it faded back among the branches of Eden when first its gates were angel guarded long ago And round the walls of the porches there are set pillars of variegated stones jasper and porphyry and deep green serpentine spotted with flakes of snow and marbles that half refuse and half yield to the sunshine Cleopatra like their bluest veins to kiss the shadow as it steals back from them revealing line after line of azure undulation as a receding tide leaves the waved sand their capitals rich with interwoven tracery rooted knots of herbage and drifting leaves of acanthus and vine and mystical signs all beginning and ending in the Cross and above them in the broad archivolts a continuous chain of language and of life angels and the signs of heaven and the labours of men each in its appointed season upon the earth and above these another range of glittering pinnacles mixed with white arches edged with scarlet flowers a confusion of delight amidst which the breasts of the Greek horses are seen blazing in their breadth of golden strength and

the St Mark s Lion lifted on a blue field covered with stars until at last as if in ecstasy the crests of the arches break into a marble foam and toss themselves far into the blue sky in flashes and wreaths of sculptured spray as if the breakers on the Lido shore had been frost bound before they fell and the sea nymphs had inlaid them with coral and amethyst **Great Buildings** DK Publishing,2012-08-20 Great Buildings is a fabulous photographic tour of more than 50 of the world s most magnificent buildings From monumental pyramids to the latest chrome and glass skyscrapers and sculptural looking museums the buildings are arranged chronologically providing an excellent introduction to the history of architecture
