World Livio Romano,Fabrizio Tra ,2024-03 In The New Industrial World Manufacturing Development in the Course of the
 Globalization Age Romano and Tra  analyse industrial development focussing upon the spreading of manufacturing activities
 beyond the boundaries of the advanced economies They explain how this event has completely changed the nature of the
 relationship between the North and the South of the world linking them together for the very first time on productive
 grounds through the development of global value chains Providing an overall account of the reasons for the Globalization Age
 to rise and in later years to fall the authors offer a new interpretation of the relationship between globalization and the
 upsurge of industrialization outside the advanced world highlighting the role played by industrial policy in the building of
 manufacturing capabilities in emerging countries Starting with the great financial crisis that hit the world at the end of the
 first decade of the 2000s Romano and Tra  explain how a new normal has emerged the basic features of which can be found in
 a slowdown of manufacturing growth rates and in the comeback of distance as a key determinant of economic behaviour also
 in light of the upsurge in later years of exogenous shocks such as the pandemic and Russian Ukrainian war **Latin**

Dolgopyatova, Ichiro Iwasaki, Andrei A. Yakovlev, 2009-07-16 This book is designed to scrutinize the Russian business sector in transition with special attention to firm organization business integration corporate governance and company management Using a unique dataset of Russian joint stock companies the authors empirically analyze key issues for understanding the Russian corporate sector *The Impact of Private Sector Participation in Infrastructure* Luis A. Andres, J. Luis

Guasch, Thomas Haven, Vivien Foster, 2008-07-25 Infrastructure plays a key role in fostering growth and productivity and has been linked to improved earnings health and education levels for the poor Yet Latin America and the Caribbean are currently faced with a dangerous combination of relatively low public and private infrastructure investment Those investment levels must increase and it can be done If Latin American and Caribbean governments are to increase infrastructure investment in politically feasible ways it is critical that they learn from experience and have an accurate idea of future impacts This book contributes to this aim by producing what is arguably the most comprehensive privatization impact analysis in the region to date drawing on an extremely comprehensive dataset Contemporary Oligarchies in Developed Democracies Shelly

Gottfried, 2019-04-01 The book analyzes concentrations of wealth and power in developed democracies It shows that economic measures which states adopted during the 1980s and 1990s had evolved first into liberal oligarchy and later after the 2007 2008 global financial crisis into illiberal and populist oligarchy The shape and content of these two kinds of oligarchy have been determined largely because of practices and political strategies that powerful state and market actors employed This project will appeal to a wide audience including academics researchers students and anyone who is interested in oligarchy political power IR political economy and sociology
