Economic Myths and Economic Realities Jorge Sá,2024-08-16 The world s ten richest countries have about 60 times the income per capita of the bottom ten Nobel Prize winning economists have acknowledged their ignorance regarding the sources of economic growth This explains why despite considerable financial assistance the gap between poorer and richer countries has grown year after year both globally and within countries like the USA and Europe Using straightforward statistical diagrams this book explains approximately 90% of the variance in income among countries or states First it empirically demonstrates what does not work the myths from reindustrialization to Keynesianism Then it examines the real drivers of growth by evaluating whole countries public social and private sectors combined including the non working population as companies assessing their business administration across areas like marketing work culture strategy and operations After all numerous multinationals are larger than countries The lessons are twofold First nothing is more pointless than perfecting the irrelevant Second there are no underdeveloped countries only undermanaged ones P Drucker The wealthiest countries are overall the best run companies *Forthcoming Books* Rose Army,1993 *A National Policy for Materials* United States. Social Capitalism in Theory and Practice: Prosperity in a stable world Robert Corfe,2008 The reform of the financial industrial infrastructure cannot be undertaken without considering fully the political culture in which it exists But such reforms can only best be initiated from within the capitalist system itself by those most technically competent to effect necessary change and hence this book calls upon the business community to take such an initiative Whilst the first volume of this work traced the development of the new majority and its potential readiness to promote desired change and whilst the second volume laid out the theoretical basis for Social Capitalism and a new political consciousness the third and

final volume is concerned with the policies and practicalities of a Social Capitalist world Part I of the present volume is concerned with the international dimension and especially the Third world and the need for its internal capitalisation and redefining the benefits of free trade and the priority of environmental questions Parts II and III are concerned with strategies for national prosperity on the macro economic level in advanced industrial economies and Part IV considers the reforms of the business enterprise in successfully integrating the common aims of employers and employed Part V is an exercise in the critique of Rentier capitalism comprising an expos of 43 leaders of major corporations and Part VI concludes the work with a summary and analytical declaration of Social Capitalist values and aims As this book clearly demonstrates a free and democratic world cannot be achieved or maintained without the successful establishment of a Social Capitalist society which seeks to maximise the individual ownership and control of the means of production distribution and exchange Under different pseudonyms Robert Corfe is also the author of 3 autobiographical works *Death In Riyadh* Geoff Carter describing his life as a businessman in the Middle East in the 80s *My Conflict With A Soviet Spy* Eddie Miller relating his adventures in Finland in the mid 60s and *The Girl From East Berlin* James Furner an epic novel relating his love affair in the old German capital at the end of the 50s
