Economics as Ideology and Experience Deepak Nayyar,2020-04-28 This collection of essays collected and published in tribute to the economist Ashok Mitra is inevitably diverse given the wide range of interests of his professional friends and colleagues There is however one common thread that runs through the articles a shared belief that ideology and experience just as much as theory and policy are inseparable in economics

Property and Prophets: The Evolution of Economic Institutions and Ideologies E. K. Hunt,2016-07-08 Property and Prophets is a concise history of the rise and subsequent triumph of capitalism Focused primarily on England until 1800 and the United States since 1800 the book s economic history is interspersed with the history of ideas that evolved along with the capitalist system

The Expansion of Economics Shoshana Grossbard-Shechtman,Christopher K. Clague,2016-07-08 Economics like most other social sciences is not a pure discipline Indeed it has been enhanced by the fact that there is so much overlap between it and the related fields of business industrial relations political science social psychology and sociology This book is the first attempt to explain how work in economics has influenced and benefited from a merging of economic analysis with the research practices of these related fields of study With contributions from leading economists from around the world it demonstrates how economics is leading the way toward a more unified social science

Liberal Economics and Democracy Conrad Waligorski,1997 Waligorski shows why there is such resilience and viability to this brand of liberalism The chapter on Keynes is as good a short piece on the economist as can be found anywhere Kenneth M Dolbeare author of American Political Thought A coherent and insightful book by a sagacious thinker Charles E Lindblom author of Politics and Markets

Understanding the Founding Alan Ray Gibson,2007 Over the course of the last century scholars have furiously debated four questions concerning the Founders and their act of creation Were the Framers motivated by their economic interests How democratic was the Framers Constitution Should we interpret the Founding using philosophical or strictly historical approaches What traditions of political thought were most important to the Framers In Understanding the Founding The Crucial Questions Alan Gibson examines the preconceptions that scholars bring to these questions explores the deepest sources of scholars disagreements over them and suggests new and thoughtful lines of interpretation and inquiry Building on his previous work Interpreting the Founding which offers a synoptic overview of the competing perspectives that have informed modern scholarship on the Founders

The Politics of Location Andrew Kirby,2015-12-14 This book originally published in 1982 begins with an examination of space and its role in the process of public provision and collective

consumption Variations in provision are linked to the Weberian notion of social status and political struggles over consumption and externality issues Health care and education are considered in spatial contexts and the whole basis of the electoral system is also discussed together with geographic underpinnings In each case emphasis is placed on the jurisdictional organization of space by public bodies The author examines the various examples of spatial cleavages in which political events are redirected by issues such as nuclear power airport location road construction and urban renewal

Property and Prophets E. K. Hunt, 2002-11-20 Property and Prophets is a concise history of the rise and subsequent triumph of capitalism Focused primarily on England until 1800 and the United States since 1800 the book s economic history is interspersed with the history of ideas that evolved along with the capitalist system **Teaching Geography 11-18: A**

Conceptual Approach Lambert, David, Morgan, John, 2010-01-01 This book provides a practical guide for students and practising teachers as to how concepts can form the basis of geography teaching This is particularly important at this time as the revised national curriculum for Geography which takes effect from September 2008 has greatly reduced the prescribed content to be covered and instead emphasises that geography is underpinned by a small number of key concepts that provide the building blocks for curriculum planning The new national curriculum for geography identifies 7 concepts Place Space Scale Interdependence Physical and human processes Environmental interaction and sustainable development and Cultural understanding and diversity and these areas are reflected in the book s table of contents This focus on concepts represents a significant shift in how geography is to be taught in schools yet there has been little extended discussion of what a concept led approach to teaching and learning would entail This book will provide geography teachers with a theoretically robust and practical approach to curriculum planning based on the concepts that underpin the subject Strategies for the Digital

Customer Experience Batat, Wided, 2022-05-06 This innovative book proposes a conceptual framework to integrate the ecological and tourism aspects of Protected Area regulation assisting decision makers to develop contextually effective laws and management plans that avoid over regulating or under regulating tourism given the areas ecological profiles

Parliamentary Responsibility for Economic Transition in Central and Eastern Europe, 1996 **Geo-economics and Power Politics in the 21st Century** Mikael Wigell, Sören Scholvin, Mika Aaltola, 2018-07-06 Starting from the key concept of geo economics this book investigates the new power politics and argues that the changing structural features of the contemporary international system are recasting the strategic imperatives of foreign policy practice States increasingly practice power politics by economic means Whether it is about Iran s nuclear programme or Russia s annexation of Crimea Western states prefer economic sanctions to military force Most rising powers have also become cunning agents of economic statecraft China for instance is using finance investment and trade as means to gain strategic influence and embed its global rise Yet the way states use economic power to pursue strategic aims remains an understudied topic in International Political Economy and International Relations The contributions to this volume assess geo economics as a form of power politics They

show how power and security are no longer simply coupled to the physical control of territory by military means but also to commanding and manipulating the economic binds that are decisive in today's globalised and highly interconnected world. Indeed as the volume shows the ability to wield economic power forms an essential means in the foreign policies of major powers. In so doing the book challenges simplistic accounts of a return to traditional military driven geopolitics while not succumbing to any unfounded idealism based on the supposedly stabilising effects of interdependence on international relations. As such it advances our understanding of geo economics as a strategic practice and as an innovative and timely analytical approach. This book will be of much interest to students of security studies international political economy foreign policy and International Relations in general.

Structure, Agency and Theory Ib Gram-Jensen, 2021-04-20. Structure Agency and Theory challenges common readings of Marx and Engels historical materialism and argues the necessity of abandoning their conception of the dialectic of forces and relations of production as the motive power of historical development and transformations because of its doubtful validity and deterministic implications. Instead another fundamental conception in historical materialism the interaction between social circumstances and agency as the motive power of history is accentuated with an emphasis on agents experiences as a causal factor arguing its potential in terms of historical explanation and attempting to spell out some of its strategic implications for revolutionary socialism.

Economics Melvin W. Reder, 1999. Since the 1930s economists have increasingly emphasized the scientific quantitative side of their field which has directed research to topics that can be elaborated through mathematical models. Economist Melvin Reder argues that this ongoing historical shift has been the result of pressure from two directions from society's demand that expert advice be based on scientific findings and from economists themselves who have wanted to view their own profession as a science.

Economics The Culture of a Controversial Science describes the profession of economics as it has developed in response to these challenges.

The New Class Society Robert Perrucci, Earl Wysong, 2003. Extensively revised the second edition of *The New Class Society* includes innovative new sections and concepts throughout the book that identify and explore how complex organizational structures and actions create and perpetuate class gender and racial inequalities. The authors describe how inequality scripts shape the hiring and promotion practices of organizations in ways that provide differential opportunities to people based on class gender and racial memberships. The authors also illustrate how privileged class members benefit from organizationally based and perpetuated forms of inequality. The second edition retains its provocative argument for of an emerging double diamond social structure and its focus on class interests that are rapidly polarizing American society. New figures tables and references incorporate the latest information and research findings to document and illustrate key topics such as the distribution of wealth and income globalization downsizing contingent labor the role of money in politics media content and consolidation the transformation of education and the erosion of democracy. The second edition combines scholarship with an engaging style and flashes of comic relief with several cartoons by some of the best satirists today. The

book accessibly written for undergraduate students has been widely adopted in courses on stratification economic sociology and American society

East Asia's Dynamic Development Model and the Republic of Korea's Experiences Mary McNulty, Ho-Chul Lee, 2003 No region has been more dynamic in recent years than East Asia Despite its successful economic development evaluations of the East Asian development model have often been capricious shifting from miracle to cronyism How can we explain East Asia's ups and downs consistently To respond to this challenge it is necessary to study the progress of East Asian development and to trace the influence of Asian cultural values This study mainly focuses on cultural aspects of economic progress and analyzes East Asia's philosophical and historical backgrounds to explain the dynamic process East Asians believe that balance between opposite but complementary forces Yin and Yang will ensure social stability and progress Through repeated rebalancing to maintain harmony the society comes to maturity In traditional East Asian societies a balance was maintained between Confucianism Yang and Taoism Buddhism and other philosophies Yin In modern societies the challenge is to balance traditional systems Yang and Western style capitalism Yin This East Asian development model explains the Republic of Korea's rise fall and recovery Korea was a poor country until the early 1960s during the time when spiritualism Yang dominated From the 1960s through the 1980s Korea achieved rapid growth by finding a new balance and moving toward materialism Yin from spiritualism Yang But the failure to maintain a harmonious balance between cooperatism and collectivism Yang and individualism Yin led to major weaknesses in labor and financial markets that contributed significantly to the financial crisis in 1997 As Korea arrived at a new balance by instituting reform programs the venture oriented information and communication technology ICT industry blossomed and led to a rapid economic recovery Since 2000 domestic financial scandals and political corruption have emerged as new social issues Korea's next challenge is to find a new harmonization between moralism Yang and legalism Yin This paper a product of the Office of the Senior Vice President and Chief Economist Development Economics is part of a larger effort in the Bank to examine institutional and cultural foundations of development across regions and countries

Recognizing Race and Ethnicity, Student Economy Edition Kathleen Fitzgerald, 2019-07-05 To better reflect the current state of research in the sociology of race ethnicity this book places significant emphasis on white privilege the social construction of race and theoretical perspectives for understanding race and ethnicity

Gender, Economy and Culture in the European Union Simon Duncan, Birgit Pfau-Effinger, 2012-09-10 Providing a comprehensive analysis of comparative gender difference in the EU this book addresses a spectrum of gender issues From employment and households to culture sexuality and male violence the book transcends any economy culture divide This wide coverage is placed within a conceptual view of structured gender cultures which vary spatially and historically Individual chapters are written around this common theme by an expert board of international contributors drawn from a variety of intellectual and disciplinary backgrounds allowing the reader to compare between chapters and read across them

Economic Crisis and Policy Choice Joan M. Nelson, 1990-03 The acute economic

pressures of the 1980s have forced virtually all of Latin America and Africa and some countries in Asia into painful austerity programs and difficult economic reforms. Scholars have intensively analyzed the economics of this situation but they have given much less attention to the political forces involved. In this volume a number of eminent contributors analyze the politics of adjustment in thirteen countries and nineteen governments drawing comparisons not only across the full set of cases but also within clusters selected to clarify specific issues. Why do some governments respond promptly to signs of economic trouble while others muddle indecisively for years? Why do some confine their response to temporary macroeconomic measures while others adopt broader even sweeping programs of reform? What leads some countries to experiment with heterodox approaches while most however reluctantly pursue orthodox courses? Why confronted with intense political protest have some governments persisted while others have altered or abandoned course? The answers to these questions are political not economic and they are examined here by Thomas M Callaghy, Stephan Haggard, Miles Kahler, Robert R Kauman, Joan M Nelson and Barbara Stallings.
