s trade policy agenda **Wage bargaining under the new European Economic Governance** Guy Van Gyes ,Thorsten Schulten,2015-09-28 Within the framework of the new European economic governance neoliberal views on wages have further increased in prominence and have steered various reforms of collective bargaining rules and practices As the crisis in Europe came to be largely interpreted as a crisis of competitiveness wages were seen as the core adjustment variable for internal devaluation the claim being that competitiveness could be restored through a reduction of labour costs This book proposes an alternative view according to which wage developments need to be strengthened through a Europe wide coordinated reconstruction of collective bargaining as a precondition for more sustainable and more inclusive growth in Europe It contains major research findings from the CAWIE2 Collectively Agreed Wages in Europe project conducted in 2014 2015 for the purpose of discussing and debating the currently dominant policy perspectives on collectively bargained wage systems under the new European economic governance **Making the New Europe** M. L. Smith,Peter M.R. Stirk,2016-10-06 This volume evaluates the notion of European Unity in a period when European identity was subjected to the destructive consequences of Nazi and Fascist domination of much of the Continent By presenting the competing visions of transformation and reconstruction played out during the war years the book aims to provide broader based and more complex insights into forces that shaped the post war period than those in conventional accounts that locate the thinking about European unity only in the years after 1945 **Corporate Investment Opportunities in the New Europe** Jonathan Reuvid,2006-04-03 Now that Cyprus Malta and eight new countries from East and Central Europe have successfully joined the EU their European neighbours and business partners in the rest of the world are watching closely to see what sustainable investment opportunities may develop This new title looks at how the accession process has affected the economic prospects of the new member states and the enlarged EU as a whole It focuses on the opportunities for foreign investors in each of the 10 new members comparing their economic environment and business conditions with those of the 15 longer established member states *The Politics of the New Europe* Ian Budge,Kenneth Newton,2014-01-21 A pioneering textbook which explains the dynamics of politics across Europe in the post Cold war era Comparing democratisation transition to a market economy and increasing economic and political integration in the countries of central and eastern Europe with experiences in Scandinavia and southern and western Europe the book provides a wealth of information and analysis on the state of Europe at the end of a momentous century of European and World history *Immigration and Politics in the New Europe* Gallya Lahav,2004-04-22 With almost a quarter of the world s migrants Europe has been attempting to regulate migration and harmonize immigration policy at the European level The central dilemma exposed is how liberal democracies can reconcile the need to control the movement of people with the desire to promote open borders free markets and liberal standards Gallya Lahav s book traces ten years of public opinion and elite attitudes toward immigration cross nationally to show how and why increasing EU integration may not necessarily lead to more open immigration outcomes Empirical evidence reveals

that support from both elite and public opinion has led to the adoption of restrictive immigration policies despite the requirements of open borders Unique in bringing together original data on European legislators and national elites longitudinal data on public opinion and institutional and policy analyses this 2004 study provides an important insight into the processes of European integration and globalization more broadly *The New Germany and the New Europe* Paul B. Socioeconomic and Environmental Impacts on Agriculture in the New Europe Serban Scriciu, 2011-03-13 This book looks at agriculture and the environment placed within the dynamic context of post communist societal change and entry into the European Union EU Scriciu explores developments in eleven Central and Eastern European CEE countries and argues for agriculture's natural place in these societies The history of these countries is significant in how it has shaped the institutions and influenced the outcomes In many cases during communism agriculture was not considered a strategically An ecological consciousness did not figure high on the agendas of

authoritarian regimes After 1990 some post communist farm economies progressed slower than others and environmental pressures mostly diminished with agricultural restructuring In parts of CEE increases in numbers of low input small farms have resulted in some though largely unintended ecological benefits A dual environmental challenge has nevertheless surfaced On one hand environmentally unsustainable practices have been attributed to some low input farming On the other hand risks of farm over intensification and resource overexploitation are on the rise Also environmental regulatory and institutional frameworks are not always effectively in place EU membership is not creating the anticipated benefits for farm growth There are a number of systemic structural barriers preventing many farmers from drawing on Common Agricultural Policy incentives and support The presence of many vulnerable poor farms is clearly problematic particularly economically However small scale farms could be made more acceptable and profitable by ensuring EU policies acknowledge their value and by building institutions to support alternative farm growth strategies aside from the traditional European model of individual corporate farm expansion The voluntary uptake of grassroots rural cooperation and farm associations may represent such an alternative Future European farm policy reforms need to reach the small and vulnerable and better tackle issues of farm equity poverty and agricultural sustainability in the new Europe This is a timely contribution as this type of transition has just begun This book should be of use to students and researchers looking at agricultural and environmental economics post communist rural societal change European integration and the Common Agricultural Policy
