Arts & Economics Bruno S. Frey, 2013-03-14 To put the ARTS and ECONOMICS next to each other as in the title to this book may be shocking to some readers Must not creative art be free of economic constraints must it not lead a life of its own And is economics not the realm of mean commercial dealings This book argues that it is not so the ARTS and ECONOMICS go well together indeed need each other Without a sound economic base art cannot exist and without creativity the economy cannot flourish There is a second way in which the Arts and Economics go together namely in the sense of applying economic thinking to the arts Over the last decades this scholarly endeavor has been established under the name of The Economics of Art or Cultural Economics But this may also sound revolting to some readers as it suggests an imperialistic extension of a lowly benefit cost calculus to the world of art This fear is unwarranted On the contrary cultural economists stress the social value of art and defend it against a crude business view of art Rather than dismissing art without direct commercial profit art economists seek ways and means of supporting it This book is not a textbook summarizing the achievements attained by the economics of art Such books already exist among them the author's own *Muses and Markets Explorations in the Economics of Art* written jointly with Werner Pommerehne VI Preface ARTS ECONOMICS charts little known territories

Planning for a City of Culture Shoshanah Goldberg-Miller, 2017-02-17 Planning for a City of Culture gives us a new way to understand how cities

use arts and culture in planning fostering livable communities and creating economic development strategies to build their brand attract residents and tourists and distinguish themselves from other urban centers worldwide While the common thinking on creative cities may coalesce around the idea of one goal economic development and branding this book turns this idea on its head Goldberg Miller brings a new fresh perspective to the study of creative cities by using policy theory as an underlying construct to understand what happened in Toronto and New York in the 2000s She demystifies the processes and outcomes of stakeholder involvement exogenous and endogenous shocks and research and strategic planning as well as warning us about the many pitfalls of neglecting critical community voices in the burgeoning practice of creative placemaking This book is an essential resource in examining the development and sustainability of the global trend of integrating arts and culture in city planning and urban design that has become an international phenomenon Perfect for students scholars and city lovers alike Planning for a City of Culture illuminates the ways that this creative city trend went global with the two case study cities serving as perfect illustrations of the power and promise of arts and culture in current and future municipal strategies Please visit Shoshanah Goldberg Miller s website for more information and research www.goldbergmiller.com

The Public Life of the Arts in America Joni Maya Cherbo, Margaret Jane Wyszomirski, 2000 Despite its size quality and economic impact the arts community is not articulate about how they serve public interests and few citizens have an appreciation of the myriad of public policies that influence American arts and culture The contributors to this volume argue that U S policy can and should support the arts and that the arts in turn serve a broad rather than an elite public By encouraging policy makers to systematically start investigating the crucial role and importance of all of the arts in the United States The Arts and Public Purpose moves the field forward with fresh ideas new concepts and important new data

The Economics of Symbolic Exchange Alexander Dolgin, 2008-09-17 Alexander Dolgin s Economics of Symbolic Exchange is in reality not one but three books and although these semantic layers are interlinked the reader will need to choose between the different vectors and modalities One clearly evident dimension is research Certain authors introduce quite new intellectual approaches into scientific debate This requires a special frame of mind and a searching curiosity about social reality Carl Gustav Jung identified a phenomenon which he called systematic blindness when a

science reaches a stage of maturity and equilibrium it categorically refuses from a sense of self preservation to note certain facts and phenomena which it finds inconvenient In Alexander D Ginn's book whole complexes of such non canonical material are to be found Here are just a few examples the exchange networks through which digital works of art are spread through the Internet bargain sales of fashionable clothing the paradox of equal pricing of cultural goods of varying quality and a discussion of whether patronage or business has the more productive influence on creativity Obviously not all the issues Volgin raises are totally new but brought together and examined within an elegant logical framework of informational economics they pose a challenge to scientific thinking Such challenges are by no means immediately or in some cases ever acclaimed by the scientific establishment J K Galbraith for example a great American economist whose works are read throughout the world who introduced a whole range of crucially important concepts the director of John F Kennedy Library *A Handbook of Cultural Economics* Ruth Towse, 2011-01-01 The second edition of this widely acclaimed and extensively cited collection of original contributions by specialist authors reflects changes in the field of cultural economics over the last eight years Thoroughly revised chapters alongside new topics and contributors bring the Handbook up to date taking into account new research literature and the impact of new technologies in the creative industries The book covers a range of topics encompassing the creative industries as well as the economics of the arts and culture and includes chapters on economics of art including auctions markets prices anthropology artists labour markets creativity and the creative economy cultural districts cultural value globalization and international trade the internet media economics museums non profit organisations opera performance indicators performing arts publishing regulation tax expenditures and welfare economics

Talking Prices Olav Velthuis, 2013-10-24 How do dealers price contemporary art in a world where objective criteria seem absent *Talking Prices* is the first book to examine this question from a sociological perspective On the basis of a wide range of qualitative and quantitative data including interviews with art dealers in New York and Amsterdam Olav Velthuis shows how contemporary art galleries juggle the contradictory logics of art and economics In doing so they rely on a highly ritualized business repertoire For instance a sharp distinction between a gallery's museumlike front space and its businesslike back space safeguards the separation of art from commerce Velthuis shows that prices far from being abstract numbers convey rich meanings to trading partners that extend well beyond the works of art A high price may indicate not only the quality of a work but also the identity of collectors who bought it before the artist's reputation was established Such meanings are far from unequivocal For some a high price may be a symbol of status for others it is a symbol of fraud Whereas sociological thought has long viewed prices as reducing qualities to quantities this pathbreaking and engagingly written book reveals the rich world behind these numerical values Art dealers distinguish different types of prices and attach moral significance to them Thus the price mechanism constitutes a symbolic system akin to language *Talking Prices* Gil Troy, Olav Velthuis, 2005 Chronicles the political events of the 1980s offering a year by year account of the economic and cultural changes that took place during Ronald Reagan's two terms in the White House **Economics of Art and Culture** Bruno S. Frey, 2019-03-30 This book studies the relationship between the arts and the economy By applying economic thinking to arts and culture it analyses markets for art and cultural goods highlights specific facets of art auctions and discusses determinants of the economic success of artists The author also sheds new light on various cultural areas such as the performing and visual arts festivals films museums and cultural heritage Lastly the book discusses cultural policies the role of the state in financing culture and the relationship between the arts and happiness
