**Ecologism** Mark J. Smith, 1998 Ecological thinking has gained increasing prevalence in recent decades affecting political social and everyday life sparking great conflicts of interest in public policy areas In this accessible text Mark Smith considers these conflicts and proposes a new approach to environmental responsibility Ecologism addresses how we understand nature and the environment and applies this understanding to current sociological approaches Smith examines how the core questions raised by a green perspective transform the frame of reference for modern thinking He then outlines the distinctive features of ecological thought discussing two areas of contention the present generation's obligation to future generations and the relationship existing between humans and animals He then explores the difficulties in applying conventional ideas such as rights or justice to issues of the environment as well as the possibility that green thinking could lead to a new politics of obligation one grounded firmly in ecological citizenship Designed as an essential text for students of environmental studies politics and sociology this book is necessary reading for anyone with an interest in ecology and its social environment

*Ecologism* Mark J. Smith, 1998 Ecological thinking within social and political theory has taken off between the 1970s and 1990s green movements have had a dramatic impact upon political and social life provoking conflicts of interest over major areas of public policy Ecological concerns are often grafted onto existing approaches but this text examines how the fundamental questions raised by a green perspective transform the terms of reference of modern thinking Environmental Citizenship Andrew Dobson, Derek Bell, 2006 A multidisciplinary consideration of how effective environmental citizenship can be in achieving sustainability with theoretical practical and ethnographic perspectives Citizenship, Environment, Economy A. Dobson, A. Valencia, 2013-09-13 As governments around the world grapple with the challenge of delivering environmental sustainability attention has recently focused on the role that citizens should play in meeting the challenge In advanced industrial countries such as ours which operate in the political framework of liberal capitalism what relevance can we place on environmental citizenship This book looks at the obstacles and opportunities which exist within this context and examines the possibility of ethical investment the social economy and considers whether there is space in the capitalist economy for environmental citizens to do the right thing This book is a special issue of the leading journal *Environmental Politics* **The Palgrave Handbook of Environmental Politics and Theory** Joel Jay Kassiola, Timothy W.

environmental citizenship with each chapter focusing on a particular actor citizens governments and corporations These chapters include references to examples and case studies from a wide range of countries broadly categorized as belonging to the Global North and the Global South Part III explores the making of green citizens and outlines the dominant articulations of environmental citizenship that emerge from formal education news media and popular culture The book concludes with a general reflection on the present and future of environmental citizenship The book contains a variety of illustrations boxed case studies links to online resources and suggestions for further reading This original and engaging text is essential reading for students and scholars of environmental politics sustainability studies and development studies as well as for environmental activists policy practitioners and environmental educators More broadly this book will appeal to anyone interested in and concerned with issues of sustainability social justice and citizenship in the twenty first century Thinking Through the Environment Mark J. Smith, 2005-09-30 This broad ranging and thought provoking set of readings stresses the diversity of responses in the way the natural environment has been understood and questioned in the modern world

*Demystifying Sustainability* Haydn Washington, 2015-02-11 What is sustainability Much has been said about the terms sustainability and sustainable development over the last few decades but they have become buried under academic jargon This book is one of the first that aims to demystify sustainability so that the layperson can understand the key issues questions and values involved Accessible and engaging the book examines the old sustainability of the past and looks to the future considering how economic ecological and social sustainability should be defined if we are to solve the entwined environmental economic and social crises It considers if meaningful sustainability is the same as a sustainable development based on endless growth examining the difficult but central issues of overpopulation and overconsumption that drive unsustainability The book also explores the central role played by society s worldview and ethics along with humanity s most dangerous characteristic denial Finally it looks to the future discussing the appropriate technology needed for sustainability and suggesting nine key solutions This book provides a much needed comprehensive discussion of what sustainability means for students policy makers and all those interested in a sustainable future *Citizenship and the Environment* Andrew Dobson, 2003-11-27 This is the first book length treatment of the relationship between citizenship and the environment Andrew Dobson argues that ecological citizenship cannot be fully articulated in terms of the two great traditions of citizenship liberal and civic republican which have been bequeathed to us He develops an original theory of citizenship which he calls post cosmopolitan and argues that ecological citizenship is an example and an inflection of it Ecological citizenship focuses on duties as well as rights and these duties are owed non reciprocally by those individuals and communities who occupy unsustainable amounts of ecological space to those who occupy too little The first virtue of ecological citizenship is justice but post cosmopolitanism follows some feminisms in arguing that care and compassion may be required to meet its special obligations Dobson suggests that ecological citizenship s conception of political space is not the state or the

municipality or the ideal speech community of cosmopolitanism but the ecological footprint Most governments around the world have signed up to sustainable development and they cannot afford to ignore ecological citizenship as a means of getting there Government policies usually revolve around financial sticks and carrots but these leave people uncommitted to the idea of sustainability and only to the rewards that are attached to it Dobson contrasts citizenship with fiscal incentives as a way of encouraging people to act more sustainably in the belief that the former is more compatible with the long term and deeper shifts of attitude and behaviour that sustainability requires Both citizenship and sustainability though are often viewed with suspicion in liberal societies because they refuse to accept the inviolability of individual preferences Dobson therefore offers an original account of the relationship between liberalism and sustainability arguing that the former's commitment to a plurality of conceptions of the good entails a commitment to so called strong forms of the latter How to make an ecological citizen Dobson examines the potential of formal high school citizenship education programmes through a case study of the recent implementation of the compulsory citizenship curriculum in the UK He concludes that the Department of Education and Skills has constructed a Trojan horse capable of kick starting ecological citizenship if teachers are willing and able to travel in it This book will be of interest to those working in the fields of environmental political theory citizenship globalisation cosmopolitanism liberalism and citizenship education

*The Making of International Environmental Treaties* Gerry Nagtzaam, 2009 Gerry Nagtzaam contends that in recent decades neoliberal institutionalist scholarship on global environmental regimes has burgeoned as has constructivist scholarship on the key role played by norms in international politics In this innovative volume the author sets these interest and norm based approaches against each other in order to test their ability to illustrate why and how different environmental norms take hold in some regimes and not others The book explores why some global environmental treaties seek to preserve and protect some parts of nature from human utilization some seek to conserve certain parts of nature for human development whilst others allow the reckless exploitation of nature without accounting for the consequences It tracks the fate of these three underlying environmental norms preservation conservation and exploitation using case studies on whaling mining in Antarctica and tropical timber The book illustrates how international political battles to shape environmental regimes inevitably result in clashes between these competing environmental norms This unique study will prove a fascinating read for both academics and practitioners in the fields of international environmental politics and international environmental law
