**Publishing Record** R.R. Bowker Company, 1978 **Faith, Family, and Filipino American Community Life** Stephen M. Cherry, 2014-01-03 Stephen M Cherry draws upon a rich set of ethnographic and survey data collected over a six year period to explore the roles that Catholicism and family play in shaping Filipino American community life From the planning and construction of community centers to volunteering at health fairs or protesting against abortion this book illustrates the powerful ways these forces structure and animate not only how first generation Filipino Americans think and feel about their community but how they are compelled to engage it over issues deemed important to the sanctity of the family Revealing more than intimate accounts of Filipino American lives Cherry offers a glimpse of the often hidden but vital relationship between religion and community in the lives of new immigrants and allows speculation on the broader impact of Filipino immigration on the nation The Filipino American community is the second largest immigrant community in the United States and the Philippines is the second largest source of Catholic immigration to this country This ground breaking study outlines how first generation Filipino Americans have the potential to reshape American Catholicism and are already having an impact on American civic life through the engagement of their faith **Amazonian Dark Earths: Wim Sombroek's Vision**

William I. Woods, Wenceslau G. Teixeira, Johannes Lehmann, Christoph Steiner, Antoinette M. G. A. WinklerPrins, Lilian Rebellato, 2008-11-16 Amazonian soils are almost universally thought of as extremely forbidding However it is now clear that complex societies with large sedentary populations were present for over a millennium before European contact Associated with these are tracts of anomalously fertile dark soils termed terra preta or dark earths These soils are presently an important agricultural resource within Amazonia and provide a model for developing long term future sustainability of food production in tropical environments The late Dutch soil scientist Wim Sombroek 1934 2003 was instrumental in bringing the significance of these soils to the attention of the world over four decades ago Wim saw not only the possibilities of improving the lives of small holders throughout the world with simple carbon based soil technologies but was an early proponent of the positive synergies also achieved in regards to carbon sequestration and global climatic change abatement Wim s vision was to form a multidisciplinary group whose members maintained the ideal of open collaboration toward the attainment of shared

goals Always encouraged and often shaped by Wim this free association of international scholars termed the Terra Preta Nova Group came together in 2001 and has flourished This effort has been defined by enormous productivity Wim who is never far from any of our minds and hearts would have loved to share the great experience of seeing the fruits of his vision as demonstrated in this volume     Transition and Beyond S.
