Gemini Ship:

Moonshots Piers Bizony, 2017-10-01 Moonshots presents stunning photos of space and Earth from NASA's archives taken by Gemini Apollo Space Shuttle and ISS astronauts using high resolution Hasselblad cameras. In December 1968 the crew of Apollo 8 captured images depicting Earth hanging like a lonely fruit in the vast darkness of space. The social and spiritual shock of that photograph and those which followed never fully diminished even as Apollo missions followed at an incredible pace including the first lunar landing on July 20 1969. Moonshots is the definitive photographic chronicle of NASA space exploration a giant slipcased book featuring more than 200 remarkable photographs from that eventful era created almost exclusively on large format Hasselblad cameras. Though a number of these images have been reproduced in books and magazines over the years one attribute of this incredible collection has seldom been exploited the sheer size and resolution of the photography. Aerospace author Piers Bizony scoured NASA's archives of Hasselblad film frames to assemble the space fan's ultimate must-have book a gorgeous large format hardcover presented in a heavy slipcase with die cuts to represent the phases of the moon. This resulting volume extracts a stunning selection of photographs captured by astronauts using Hasselblad equipment many of them seldom previously published let alone in such a lavish package. The Apollo voyages form the centerpiece of this amazing collection but equally fabulous images from precursor Gemini missions are also featured along with later photographs chronicling Space Shuttle missions and even the construction of the International Space Station.

Spacecraft and Rockets NASA, Nirmala Nataraj, 2024-10-22 Discover the remarkable NASA spacecraft that have captured our imaginations for decades. The rockets rovers satellites and space stations that have charted courses into space are depicted in beautiful color images and paired with engaging annotations. Complete with a preface by Bill Nye this collection perfectly captures the wonder and science of space exploration. From the earliest Saturn and Gemini missions through the modern day Artemis and HALO ships these extraordinary spacecraft will fascinate anyone intrigued by science history and the mysteries of the beyond. CELEBRATE INNOVATION Spacecraft and Rockets features fascinating images accompanied by expert explanations of the history and science of space exploration. This book is a unique celebration of the technological advances that have taught us so much about the universe and our place amongst the stars. NASA APPROVED SPACE BOOK Bearing the official imprimatur of the legendary space agency this stellar hardcover volume provides a guided tour through the history of NASA's most exciting innovations and inventions. FOR THE CURIOUS MIND NASA's beautifully documented space explorations inspire people of all ages making this deluxe volume a wonderful gift for science enthusiasts sci-fi fanatics space-loving kids and everyone in between. Perfect for Science and technology buffs Space lovers stargazers and spacecraft geeks. Sci-fi readers and anyone who dreams of one day going to space. Teachers students and parents.
