*Gemini* Virgil Gus Grissom,1968      **Chariots for Apollo** Courtney G. Brooks,James M. Grimwood,Loyd S.

Swenson,2012-05-14 This illustrated history by a trio of experts is the definitive reference on the Apollo spacecraft and lunar modules It traces the vehicles design development and operation in space More than 100 photographs and illustrations

*Echoes Among the Stars: A Short History of the U.S. Space Program* Patrick J. Walsh,2016-04-29 Emphasizing the importance of the space programme to the scientific social and cultural history of the last half of the 20th century this brief history celebrates the almost unimaginable technological leap that the space programme represents a feat of teamwork innovation dedication and mastery unprecedented in the history of mankind Walsh s narrative begins just before the Mercury programme covers the original seven astronauts the Gemini and Apollo programmes through Skylab and up to the space shuttle The glories and emotion of space exploration are presented against the backdrop of the Cold War the presidential administrations of Eisenhower JFK LBJ Nixon Ford and Carter and other significant events in US history The positive accomplishments of the astronauts are put in context of an increasingly negative domestic situation in the 60s and 70s the Bay of Pigs civil rights assassinations growing involvement in and dissension about Vietnam the Watergate scandal and Nixon s resignation

**Exploring the Moon** David M. Harland,2008-04-16 In this comprehensive overview of Man s relationship with his planet s nearest neighbor David Harland opens with a review of the robotic probes namely the Rangers which returned television before crashing into the Moon the Surveyors which soft landed in order to investigate the nature of the surface and the Lunar Orbiters which mapped prospective Apollo landing sites He then outlines the historic landing by Apollo 11 and the final three missions of comprehensive geological investigations He concludes with a review of the robotic spacecraft that made remote sensing observations of the Moon This Commemorative Edition includes a foreword by one of the original astronauts as well as an extra section reviewing the prospect of renewed exploration there New graphics and images are also included

**Spying from Space** David Christopher Arnold,2008-06-12 On August 14 1960 a revolution quietly occurred in the reconnaissance capabilities of America When the Air Force C 119 Flying Boxcar Pelican 9 caught a bucket returning from space with film from a satellite the American intelligence community gained access to previously denied information about the Soviet Union The Corona reconnaissance satellite missions that followed lifted the veil of secrecy from the communist bloc revealing among other things that no Missile Gap existed This revolution in military intelligence could not have occurred without the development of the command and control systems that made the Space Race possible In *Spying from Space* David Christopher Arnold tells the story of how military officers and civilian contractors built the Air Force Satellite Control Facility AFSCF to support the National Reconnaissance Program The AFSCF also had a unique relationship with the National Reconnaissance Office a secret organization that the U S government officially concealed as late as the 1990s Like every large technology system the AFSCF evolved as a result of the interaction of human

beings with technology and with each other Spying from Space fills a gap in space history by telling the story of the command and control systems that made rockets and satellites useful Those interested in space flight or intelligence efforts will benefit from this revealing look into a little known aspect of American achievement Those fascinated by how large complex organizations work will also find this an intriguing study of inter service rivalries and clashes between military and civilian cultures     Elementary School Aerospace Activities, a Resource for Teachers ,1977     In the Shadow of the Moon Francis French,Colin Burgess,2007-01-01 Tells the story of the exciting and challenging years in space flight with two superpowers engaged in a titanic struggle to land one of their own people on the moon This book explores the inspirations ambitions personalities and experiences of the select few whose driving ambition was to fly to the moon     Space Travelers and the Genesis of the Human Form Joan D'Arc,2000 Can Darwinian evolution actually prove that we are alone in the Universe This book illustrates that Darwinian evolution is not an empirically predictable or testable scientific paradigm Also shows that ancient artifacts on Mars and the Moon are evidence of Game Wardens in our own solar system Could the Earth be a controlled DNA repository for the ongoing creation and dissemination of life forms including humans The author puts forth compelling evidence in this well researched work     Elementary School Aerospace Activities ,1977     **Spacewalk** Carl R. Green,2012-07-01 Explores the Gemini 4 mission including the astronauts and the first American spacewalk the spacecraft and technology that made it possible and how the Gemini mission laid the foundation for the Apollo missions to the moon Provided by publisher     **Moonshot** Professor Richard Wiseman,2019-06-11 On the 50th anniversary of the Apollo 11 moon landing renowned psychologist Richard Wiseman reveals the powerful life lessons behind humanity s greatest achievement The historic moon landings were achieved against remarkable odds and within the space of just a few years How can we apply the secrets of this astronomical success to our own goals to achieve the impossible in work and in life Psychologist Richard Wiseman brings together history psychology and self help in this unique and powerful guide to achieving the impossible in work and in life The result of intensive research including interviews with surviving members of the Apollo mission control team Moonshot delivers eight key lessons on teamwork leadership persistence creativity and more each one a vital part of the mindset for success Filled with never before told stories and fresh insights Moonshot sheds new light on the science of success and empowers each of us to achieve the impossible     *Into That Silent Sea* Francis French,Colin Burgess,2009-09-01 A history of early space flight focuses on the careers of both American astronauts and Soviet cosmonauts and includes coverage of other persons who worked in support roles     *Fighting to Survive Space Disasters* Eric Mark Braun,Elizabeth Raum,2019-08 Being lost is scary Being lost in space is terrifying These true tales of surviving a disaster in space follow real astronauts through harrowing ordeals in which they relied on their training instincts and courage to survive     Gus Grissom Robert Greenberger,2003-12-15 Profiles the Air Force test pilot who became one of the first astronauts and describes his participation in the Mercury Gemini and Apollo space programs as well as his death in

a tragic fire during a pre flight test on the Apollo 1 spacecraft      **Space Travel** Edna A. Coard,1983      **Calculated Risk** George Leopold,2016-06-15 Unlike other American astronauts Virgil I Gus Grissom never had the chance to publish his memoirs Killed along with his crew in a launch pad fire on January 27 1967 Grissom also lost his chance to walk on the moon and return to describe his journey Others went in his place The stories of the moon walkers are familiar Less appreciated are Grissom s contributions The international prestige of winning the Moon Race cannot be understated and Grissom played a pivotal and enduring role in securing that legacy for the United States Indeed Grissom was first and foremost a Cold Warrior a member of the first group of Mercury astronauts whose goal it was to beat the Soviet Union into space and eventually to the moon Drawing on extensive interviews with fellow astronauts NASA engineers family members and friends of Gus Grissom George Leopold delivers a comprehensive and corrective account of Grissom s life that places his career in the context of the Cold War and the history of human spaceflight **Calculated Risk** The Supersonic Life and Times of Gus Grissom adds significantly to our understanding of that tumultuous and ultimately triumphant period in American history      **The Elementary School Library Collection** ,1976      *The Best in Children's Books* Zena Sutherland,1973 Reviews 1 400 books for children chosen as the best published during the years 1966 1972      **One Small Step?** Gerhard Wisnewski,2012-12-17 Is it possible that the famous American moon landings were nothing but an illusion a fabrication Could NASA have fooled the world by broadcasting simulations that had been filmed for training purposes From the very first manned flight into orbit right up to the present day there have been serious anomalies in the official narrative of the conquest of space Bestselling author Gerhard Wisnewski dissects the history in minute detail from the first Russian missions to the final American moon project of Apollo 17 looking at films photos radio communications personal statements and any other available material Using forensic methods of investigation he pieces together a complex jigsaw depicting a disturbing picture of falsifications lies and fakery in the Cold War struggle for supremacy between the Soviet Union and the USA The evidence he presents casts serious doubt on the possibility of humans ever having walked on the moon Wisnewski s research calls for a reassessment of the received wisdom that has entered the fabric of our culture The true story of space exploration has a more sinister undertone he argues Beneath the guise of civilian space travel the US military has been developing fearsome new equipment and weapons to be secretly stationed in space with the aim of militarizing the orbit around the earth The potential targets every human being on the planet Profusely illustrated with over 200 photos and diagrams      [A Long Voyage to the Moon](#) Geoffrey Bowman,2021-11 Biography of Apollo 17 astronaut Ron Evans 1933 1990
