Gemini Syndrome:

The Gemini Syndrome Roger B. Culver, Philip A. Ianna, 1979

The Transcendental Temptation Paul Kurtz, 2013-09-10 In this landmark work Paul Kurtz examines the reasons why people accept supernatural and paranormal belief systems in spite of substantial evidence to the contrary According to Kurtz it is because there is within the human species a deeply rooted tendency toward magical thinking the transcendental temptation which undermines critical judgment and paves the way for willful beliefs Kurtz explores in detail the three major monotheistic religions Judaism Christianity and Islam finding striking psychological and sociological parallels between these religions the spiritualism of the nineteenth century and the paranormal belief systems of today This acclaimed and controversial book includes sections on mysticism belief in the afterlife the existence of God reincarnation astrology and ufology Kurtz concludes by explaining and advocating rational skepticism as an antidote to belief in the transcendental

Astrology Roger B. Culver, Philip A. Ianna, 1988-09

Contemporary astrologers claim that their craft is scientifically based and rationally consistent and above all that astrology works a belief shared by millions of Americans including highly visible political and media personalities As a result the practice of consulting the stars for advice has never been more popular or more dangerous Professional astronomers Roger B Culver and Philip A Ianna have produced a highly readable and well referenced response to the claims of astrologers This book points out the glaring inconsistencies associated with the basic concepts of modern astrology from the zodiac itself to the fabled Age of Aquarius Tracing humanity's historical fascination with the heavens that produced the celestial twins of astronomy and astrology the authors leave little doubt concerning the difference between astronomical science and astrological art form Astrology True or False offers a complete and extensive summary of available evidence on astrology's basic definitions concepts and effectiveness The authors research revealed thousands of predictions gone bust from the start of World War III to claims about the existence of an anti Earth orbiting on the other side of the sun They studied the famous twenty year cycle of presidential death and disaster the moon cycles of crime and murder in major cities and the incidences of major personality traits in certain sun signs Their conclusions while disappointing to the determined believer in astrology are nevertheless refreshingly rational

The Black List, Part 1 D.D.K., 2019-06-17

Encyclopedia of Pseudoscience William F. Williams, 2013-12-02 The Encyclopedia of Pseudoscience is the first one volume A to Z reference that identifies defines and explains all of the terms and ideas dealing with the somewhat murky world of the almost sciences Truly interdisciplinary and multicultural in scope the Encyclopedia examines how fringe or marginal sciences have affected people throughout history as well as how they continue to exert an influence on our lives today This comprehensive reference brings together superstitions and fads that are part of popular culture such as fortune telling healing practices once thought marginal that are now become increasingly accepted such as homeopathy and acupuncture frauds and hoaxes that have occurred throughout history such as UFOs mistaken theories first put forward as serious science but later discarded as false such as phrenology and racial typing etc More than 2000 extensively cross referenced and illustrated entries cover prominent phenomena major figures events topics places and associations

Pseudoscience and the Paranormal Terence Hines, 2010-09-30 Television the movies and computer games fill the minds of their viewers with a daily staple of fantasy from tales of UFO landings haunted houses and communication with the dead to claims of miraculous cures by gifted healers or breakthrough treatments by means of fringe medicine The paranormal is so ubiquitous in one form of entertainment or another that many people easily lose sight of the distinction between the real and the imaginary or they never learn to make the distinction in the first place In this thorough review of pseudoscience and the paranormal in contemporary life psychologist Terence Hines teaches readers how to carefully evaluate all such claims in terms of scientific evidence Hines devotes separate chapters to psychics life after death

parapsychology astrology UFOs ancient astronauts cosmic collisions and the Bermuda Triangle faith healing and more New to this second edition are extended sections on psychoanalysis and pseudopsychologies especially recovered memory therapy satanic ritual abuse facilitated communication and other questionable psychotherapies There are also new chapters on alternative medicine which is now marketed in our drug stores and on environmental pseudoscience with special emphasis on the evidence that certain technologies like cell phones or environmental agents like asbestos cause cancer Finally Hines discusses the psychological causes for belief in the paranormal despite overwhelming evidence to the contrary This valuable highly interesting and completely accessible analysis critiques the whole range of current paranormal claims *Animation* Shamus Culhane,1990-08-15 The animator of Popeye and Donald Duck discusses all aspects of film animation and includes over 130 illustrations **Heaviness in Metal Music Production, Volume I** Jan-Peter Herbst,Mark Mynett,2025-08-01 *Heaviness in Metal Music Production Volume I How and Why It Works* provides an in depth analysis of the art and craft of producing heaviness the fundamental musical quality in metal music Using primarily ethnographic research which draws on interviews and engineering documentation from various producers across different generations the distinguishing feature of the study is the song In Solitude which was written recorded and produced by the researchers themselves Written by practising musicians producers and experts in music technology and musicology this book offers a comprehensive understanding of the interplay between structural performative and technological components of a metal recording the perceptual and discursive factors determining heaviness and the relationship between creative freedom and technical demands in contemporary metal music production *Heaviness in Metal Music Production* is a rigorous academic study that advances the field of metal music production research through an innovative and methodologically robust approach At its core is an unprecedented experiment in which eight leading producers each mixed the same song with their processes meticulously documented and analysed through in depth interviews This study not only provides unique insights into the conceptualizations and craft of heaviness in metal music production but also sets a new standard for empirical research in the discipline As a result it serves as a vital resource for scholars researchers and students in audio engineering and metal music studies making it essential supplementary reading for advanced undergraduates postgraduates and academics engaged in these fields This two volume set offers a well rounded insight into the production of heaviness in theory and practice The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution CC BY 4 0 International license **Out of the Desert** William H. Stiebing,2012-07-03 Two of the best known stories in the Bible are those of Moses leading his people out of Egypt and Joshua s conquest of the Promised Land Indeed they form one of the cornerstones of the Judeo Christian tradition But is the Bible a reliable source of information for Israel s early history Are the Exodus and Conquest actual historical events And if they are when and where did they occur *Out of the Desert* rigorously examines accounts of these historic events and traces the authenticity dates and explanations for

the Israelites departure from Egypt and subsequent conquest of Canaan Clarifying these events in a straightforward informative manner Out of the Desert includes a generous number of charts and illustrations William H Stiebing Jr places the Exodus within its cultural context during the beginning of the Iron Age 1200 1100 B C a time of drought famine and collapse of social order which gave way to the emergence and dominance of the tribes that joined forces to become the confederation of Israel Many conventional ideas concerning the Exodus and Conquest are radically challenged in Out of the Desert Stiebing's accounts of archaeological digs and rival theories make the narrative lively and engrossing his unique insight into the field of modern archaeology provides a rare glimpse into the wonders of man's history

The Demon-Haunted World Carl Sagan, Ann Druyan, 1997-02-25 NEW YORK TIMES BESTSELLER From the renowned astronomer and author of Cosmos comes a powerful and stirring defense of informed rationality The Washington Post Book World in a world where fake news stories and Internet conspiracy theories play to a disaffected American populace LOS ANGELES TIMES BOOK PRIZE WINNER Glorious A spirited defense of science From the first page to the last this book is a manifesto for clear thought Los Angeles Times How can we make intelligent decisions about our increasingly technology driven lives if we don't understand the difference between the myths of pseudoscience New Age thinking and fundamentalist zealotry and the testable hypotheses of science Casting a wide net through history and culture Pulitzer Prize winning author and distinguished astronomer Carl Sagan argues that scientific thinking is critical not only to the pursuit of truth but to the very well being of our democratic institutions He examines and authoritatively debunks such celebrated fallacies as witchcraft faith healings demons and UFOs And yet disturbingly in today's so called information age pseudoscience is burgeoning with stories of alien abduction channeling past lives and communal hallucinations commanding growing attention and respect As Sagan demonstrates with lucid eloquence the siren song of unreason is not just a cultural wrong turn but a dangerous plunge into darkness that threatens our most basic freedoms

Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both

scientific and philosophical issues to the extent that this work does xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa

Pseudoscience and Extraordinary Claims of the Paranormal Jonathan C. Cult Watch John Ankerberg, John Weldon, 1991-01-01 A compilation of the entire Facts On series Cult Watch gives you facts about the major cults and movements in a format you can use in counseling or witnessing *Exploring Ancient Skies* David H. Kelley, Eugene F. Milone, 2005-12-06 Exploring Ancient Skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean the Far East and the New World particularly Mesoamerica putting the ancient astronomical materials into their archaeological and cultural contexts The authors begin with an overview of the field and proceed to essential aspects of naked eye astronomy followed by an examination of specific cultures The book concludes by taking into account the purposes of ancient astronomy astrology navigation calendar regulation and not least the understanding of our place and role in the universe Skies are recreated to display critical events as they would have appeared to ancient observers events such as the supernova of 1054 the lion horoscope or the Star of Bethlehem Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation It will be useful as a reference for scholars and students in both astronomy and archaeology and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history

Toward a New Enlightenment Paul Kurtz, 2018-04-17 Paul Kurtz has been the dominant voice of secular humanism over the past thirty years This compilation of his work reveals the scope of his thinking on the basic topics of our time and his many and varied contributions to the cause of free thought It focuses on the central issues that have concerned Kurtz throughout his career ethics politics education religion science and pseudoscience The chapters are linked by a common theme the need for a new enlightenment one committed to the use of rationality and skepticism but also devoted to realizing the highest values of humanist culture Many writings included here

were first published in magazines and journals long unavailable. Some of the essays have never before been published. They now appear as a coherent whole for the first time. Also included is an extensive bibliography of Kurtz's writings. *Toward a New Enlightenment* is essential for those who know and admire Paul Kurtz's work. It will also be an important resource for students of philosophy, political science, ethics, and religion. Among the chapters are: Humanist Ethics, Eating the Forbidden Fruit, Relevance of Science to Ethics, Democracy without Theology, Misuses of Civil Disobedience, The Limits of Tolerance, Skepticism about the Paranormal, Legitimate and Illegitimate Militant Atheism vs Freedom of Conscience, Promethean Love Unbound, The Case for Euthanasia, and The New Inquisition in the Schools.
