## **Gender And Power In Families:**

**Gender and Power in Families** Ann C. Miller, Rosine Jozef Perelberg, 2018-06-04 The systems approach to the family is based on the assumptions that there is equality between men and women in the family and that women and men are treated equally in clinical practice The contributors to this book challenge these hidden assumptions discussing the issues from both a conceptual and clinical viewpoint They argue strongly that questions of gender and power should be central to family therapy training and practice

*Gender, Power and Relationships* Charlotte Burck, Bebe Speed, 2006-11-22 Gender Power and Relationships is a follow up volume to Gender and Power in Families Routledge 1989 which marked a milestone in the application of feminist thinking to therapeutic work with families bringing new ideas to students trainers and professionals Contributions from leading practitioners demonstrate how feminist ideas have been taken up by therapists in a variety of different settings The chapters explore and extend previous debates on sexual and physical abuse and ethnicity addressing the many contradictions and dilemmas inherent in this work for feminist systemic approaches They also consider changing family structures and the role of men within them gendered aspects of HIV prevention and work with women drug addicts and a variety of other

approaches each set in the context of an overview of feminist theories of the family      *Handbook of Studies on Men and Masculinities* Michael S. Kimmel, Jeff Hearn, Raewyn Connell, 2005 In the past research in the field of gender has mainly addressed issues about women and has for the most part been developed by women Recently the study of gender has rapidly expanded and there has been a growing interest in men's and boys' identities, conduct and problems The *Handbook of Studies on Men and Masculinities* is an interdisciplinary and international culmination of the growth of men's studies that also offers insight about future directions for the field The Handbook provides a broad view of masculinities primarily across the social sciences with the inclusion of important debates in some areas of the humanities and natural sciences The various approaches presented in this Handbook range across different disciplines, theoretical perspectives, methodologies and conceptualizations in relation to the topic of men Editors Michael S Kimmel, Jeff Hearn and Robert W Connell have assembled an esteemed group of contributors who are among the best known experts in their particular fields The *Handbook of Studies on Men and Masculinities* examines the construction of masculinities in four different frames: the social organization of masculinities in their global and regional iterations; the institutional reproduction and articulation of masculinities; the ways in which masculinities are organized and practiced within a context of gender relations; and the ways in which individual men express and understand their gendered identities The Handbook is organized in a way that moves from the larger global and institutional articulations of masculinities to the more intimate and personal expressions The *Handbook of Studies on Men and Masculinities* provides scholars, researchers and students with the most current, incisive scholarship available for the men's studies area of gender studies It is a vital resource for those interested in the practical or cultural issues about men, boys and gender as well as an excellent addition to any academic library      *Gender and Family Therapy* Charlotte Burck, Gwyn Daniel, 2018-03-22 Burck and Daniel share the personal meaning that gender holds for them and the open and enquiring rather than definitive style of their writing makes it easy for the reader to grasp their ideas The authors' handling in the early chapters of the many intellectual conundrums about gender is clear and assured and through their many citations of other literature in the field they have managed to align this volume with other scholarly works while at the same time ensuring a very readable and practical book      *Gender, Power and Identity in the Early Modern House of Orange-Nassau* Susan Broomhall, Jacqueline Van Gent, 2016-08-12 How do gender and power relationships affect the expression of family House and dynastic identities The present study explores this question using a case study of the House of Orange-Nassau whose extensive visual material and archival sources from both male and female members enable the authors to trace their complex attempts to express, gain and maintain power in texts, material culture and spaces as well as rituals, acts and practices The book adopts several innovative approaches to the history of the Orange-Nassau family and to familial and dynastic studies generally Firstly the authors analyse in detail a vast body of previously unexplored sources including correspondence, artwork, architectural, horticultural and textual commissions, ceremonies, practices and individual

actions that have surprisingly received little attention to date individually and consider these as the collective practices of a key early modern dynastic family They investigate new avenues about the meanings and practices of family and dynasty in the early modern period extending current research that focuses on dominant men to ask how women and subordinate men understood family and dynasty in what respects such notions were shared among members and how it might have been fractured and fashioned by individual experiences Adopting a transnational approach to the Nassau family the authors explore the family's self presentation across a range of languages cultures and historiographical traditions situating their representation of themselves as an influential House within an international context and offering a new vision of power as a gendered concept

Gender, Power and Organization Paula Nicolson, 2015-06-10 Work organizations are a major site of gender politics for professional women and men and although there are more women in senior positions than ever before these increased opportunities have not been gained without psychological consequences Evidence based and theoretically driven the new edition of Gender Power and Organization raises important questions about gender and power in the workplace and the psychology of women's advancement Twenty years on from the first edition it re examines gender relations at work and asks why despite many years

of feminist critique and action we are able to understand the dynamics of the workplace but fail to make them more representative. The struggles women face in professional and public life remain intense not least because many men experience an increasing sense of threat to their long term aspirations and professional positions. Using examples from recent research and the author's own consultancy experience this important volume offers a fresh exploration of the psychology of gender and power at work from the development of gender identities and roles to explanations of bullying and sexual harassment in the organization. It offers an accessible survey of the subject for professional managers and students of leadership psychology management sociology gender and women's studies

**Gender, Power, and Communication in Human Relationships** Pamela J. Kalbfleisch, Michael J. Cody, 2012-12-06 This edited volume establishes a state of the art perspective on theory and research on gender power and communication in human relationships. Both theoretical essays and review chapters address issues relevant to female and male differences in power dominance communication equality and expectations beliefs. All chapter contributors share two commonalities. First each provides a 1990s assessment of power and equality in female and male relationships. Second each reviews respective programs of research and focuses attention on the relevance of this research to understanding the relationships of women and men. Unique because it incorporates a multidisciplinary approach to the study of gender and the communication of power in human relationships this book includes the original work of intellectuals with national and international reputations in the social sciences. The volume provides both scholastic breadth and centralized treatment of issues that form the very foundation of social and personal relationships. It will appeal to scholars working in the disciplines of communication and psychology as well as other areas of social science research

**Gender Power and Mediation** Jamila A Chowdhury, 2012-11-30 This book investigates the practice of family mediation and some of the challenges that may hinder its effective use by marginalised groups in a society. Those challenges include gendered power disparity and family violence especially towards women and the discussion extends to how the challenges can be overcome through a practice of evaluative mediation to provide fair outcomes for women. Unlike other contemporary books on mediation this book not only discusses different theories of power and equity in mediation it also includes a number of verbatim quotes from different mediation sessions to demonstrate how those theories are operationalised in a real life context. While other contemporary texts on mediation focus on Western style facilitative mediation and its limitations in attaining fair justice for women enduring gendered power disparity and family violence this text emphasises an evaluative mediation style that is embedded in Eastern social practices. Instead of focusing on gendered power disparity and family violence as limitations on the practice of facilitative mediation this book details the practice of evaluative mediation which may provide fair justice to women despite the presence of gendered power disparity and family violence in a society

**Firms, Boards and Gender Quotas** Mari Teigen, Fredrik Engelstad, 2012-02-10 Discusses gender quota reform from an economic political and philosophical point of view. This title looks at whether the economic performance

of companies is influenced positively or negatively It provides a comparative study of the access of women to top positions in business in Europe

*The Interplay of Work Power and Family Power* Sung-Hoon Lee, 1997 The purpose of this dissertation was to empirically test the assertion that men's power in the workplace is perpetuated within the domestic sphere and to extend the argument to include the relationship of work power and family power for women as well Employing Blood and Wolfe's resource theory and Kohn and Schooler's learning generalization theory this researcher examined gender differences in the spillover effects of work power and work related rewards such as occupational status and income on power in the family sphere Gender role ideology was taken into consideration as an intervening variable in the interplay of work power and family power The data for the present study came from the U.S. survey in the Comparative Project on Class Structure and Class Consciousness Wright et al 1989 The final sample for the analysis consisted of 230 men and 196 women who were living with their spouses and were in the labor force The findings indicated that significant direct causal relationships did not exist between work power and family power for either men or women Moreover the statistical analyses did not reveal a significant indirect causal relationship between work power and family power via gender role ideology Income was shown to have a direct effect on financial decisionmaking and participation in household labor for men suggesting that men's earnings played a role in defining their role as the main provider In contrast none of the exogenous variables had a statistically significant relationship with the endogenous variables for women indicating that work and family were two separate spheres for women with regard to power relations Gender role ideology had a positive direct effect on

marital decision making power for women Finally the data showed that the amount of variance in family power was explained primarily by the individual worker s sociodemographic and family characteristics such as age education children hours in paid work and spouse s income rather than the experience of power in the other work sphere

White,2011-05-03 Women are now part of senior management in higher education HE to varying degrees in most countries and actively contribute to the vision and strategic direction of universities This book attempts to analyse their impact and potential impact on both organisational growth and culture

**Gender, Power, and Military Occupations** Christine De Matos,Rowena Ward,2012 Military occupations and interventions have a gendered impact on both those engaged in occupying and those whose lands have been occupied yet little has been published about this effect either historically or in contemporary times This collection redresses this neglect by examining and analyzing the impact of occupation on men and women both occupied and occupier in a variety of geographical spaces from Japan to the Philippines to Iraq The gendered perspectives offered are also intimately tied to analyses of power how power is enacted by the occupier how powerlessness is experienced by the occupied how power is negotiated shared compromised subverted reclaimed institutional power and contested power in post conflict societies This collection covers a variety of geographical and period contexts in the Asia Pacific and Middle East since 1945 offering the reader a comparative view across time and space of post WWII military occupations and interventions The term military occupation is interpreted broadly to include military interventions the presence of military bases and peacekeeping post conflict operations allowing space to demonstrate that the lines between each definition are blurred Including perspectives from established and emerging scholars aid workers and activists from around the world this volume incorporates voices from those conducting research on and those with direct experience of military occupations and interventions
