Gender Construction In Childrens Interactions A Cultural Perspective:

Gender Construction in Children's Interactions Amy Kyratzis, 2001-02-01 This special issue examines gender construction by children in some of its rich cultural and contextual complexity and in some of its interactions with power The first two articles are about preschool children s language One examines preschoolers socialization into Japanese a language in which gender marking is inescapable and the other compares Mandarin speaking preschoolers language in Mainland China with that of English speaking preschoolers in the United States Dealing with middle school aged children the next two articles deal with the influence of expertise and examine talk within a mixed sex group of Latino children doing groupwork The issue concludes with an epilogue commenting on the special issue and critically examining the problem of gender indexing

Gender in Interaction Bettina Baron, Helga Kotthoff, 2002-04-12 In this volume gender is seen as a communicative achievement and as a social category interacting with other social parametres such as age status prestige institutional and ethnic frameworks cultural and situative contexts The authors come from a variety of backgrounds such as sociology of communication anthropological linguistics sociolinguistics social psychology and text linguistics Masculinity and femininity are conceived of as varying culturally historically and contextually All contributions discuss empirical research of communication and the question of whether and how gender is a salient variable in discourse So one aim of the book is to trace the varying relevance of gender in interaction Emotion politics ideology body concepts and speech styles are related to ethnographic description of the contexts within which communication takes place These contexts range from private to public communication and from mixed sex to same sex conversations framed by different cultural backgrounds Australian German Georgian Turkish US American

Communicating Gender Diversity

Victoria Pruin DeFrancisco, Victoria Leto DeFrancisco, Catherine Helen Palczewski, 2007-06-21 The purpose behind Communicating Gender Diversity A Critical Approach is not to provide any final conclusions about communicating gender Because gender is a constantly evolving concept both in terms of individuals gender identity development and the larger culture's predominant notions of gender such absolute claims are not possible Instead the intent is to better equip readers with tools with which they can examine and make sense of the intersections of communication and gender The text covers the variety of ways in which communication of and about gender and sex enables and constrains people's intersectional identities The authors believe people are social actors and as such create meaning through their symbolic interactions Thus the book's emphasis is not on how gender influences communication but on how communication constitutes gender They also believe that people are capable of being self reflective about communication processes and creative in generating new ways

Best, Judith L. Gibbons, 2019-09-10 This book addresses cultural variability in

children's social worlds examining the acquisition, development, and use of culturally relevant social competencies valued in diverse cultural contexts. It discusses the different aspects of preschoolers' social competencies that allow children, including adopted immigrant or at-risk children, to create and maintain relationships, communicate, and to get along with other people at home, in daycare or school, and in other situations. Chapters explore how children's social competencies reflect the features of the social worlds in which they live and grow. In addition, chapters examine the extent that different cultural value orientations manifest in children's social functioning and describes how parents in autonomy-oriented cultures tend to value different social skills than parents with relatedness or autonomous relatedness orientations. The book concludes with recommendations for future research directions. Topics featured in this book include: Gender development in young children; Peer interactions and relationships during the preschool years; Sibling interactions in western and non-western cultural groups; The roles of grandparents in child development; Socialization and development in refugee children; Child development within institutional care. **Children's Social Worlds in Cultural Context** is a valuable resource for researchers, clinicians, practitioners, and graduate students in developmental psychology, child and school psychology, social work, cultural anthropology, family studies, and education.

Global Perspectives on Gender and Sexuality in Education Elinor L. Brown, Guichun Zong, 2017-05-01. International Advances in Education. Global Initiatives for Equity and Social Justice is an international research monograph series that contributes to the body of inclusive educational policies and practices focused on empowering society's most vulnerable groups, raising the ethical consciousness of those in positions of authority, and encouraging all to take up the mantle of global equity in educational opportunity, economic freedom, and human dignity. Each themed volume in this series draws on the research and innovative practices of investigators, academics, educators, politicians, administrators, and community organizers around the globe. This volume consists of three sections, each centered on an aspect of gender equity in the context of education. The chapters are drawn from a wide range of countries, including Australia, China, Gambia, India, Italy, Kenya, Kyrgyzstan, Laos, Slovenia, Swaziland, Grenada, Jamaica, Trinidad, Tobago, The United States, and Turkey, addressing issues of gender equity, citizenship, education, egalitarianism in sexual orientation, and strategies to combat human trafficking. The 15 chapters document both the progress and challenges facing those who strive for gender equity in access to education, the portrayal of women in curricula, and the acceptance of diverse sexual orientations within differing country contexts, and provide an overview of promising policies, practices, and replicable successful programs.

Sociogenetic Perspectives on Internalization Brian D. Cox, Cynthia Lightfoot, 2013-05-13. The issue of how the external world becomes part of the behavioral repertoire of children has been important to psychology from its very beginning, preoccupying theorists from Sigmund Freud to George Herbert Mead. But ever since Lev Vygotsky claimed that every function in a child's activity appears first as a process in the social realm between individuals and moves to a process that individual children can accomplish relatively independently, there has been increased debate as to exactly how

this process of internalization happens In contemporary developmental psychology the process of internalization has become so important that the time is ripe for a book which explicitly addresses the problems it poses Although the chapters in this book deal with age groups from preschool to adolescence and topics from mathematics to storytelling and from taking risks to making moral judgments there is one core question which unifies them all If the growing competence of a child is truly sociogenetic if it truly grows out from is supported by and is dependent upon the social where is that competence truly located Bearing a variety of labels cultural historical co constructionist dialectical contextualist narrative hermeneutic and discursive psychologies and analytic constructs scaffolding proleptic instruction participation appropriation and situated activity contemporary perspectives are showing clear signs of development and differentiation This volume s goal is to help bring some order to these differences without denying either the usefulness of this variety or the importance of the differences among perspectives This new book illuminates these differences by collecting a select sample of theory and research into one of two major sections The first section includes work undertaken from a social interactive perspective The overarching aim is to identify processes of child child or child adult interactions as they emerge over relatively short periods of time Typically the methodology involves the microanalysis of videotaped interactions Development is situated literally within social interactions which are considered directly responsible for children s development The second section provides a sample of work representing a symbolic action perspective This one is not oriented toward social interactions but toward the symbolic meanings that they express and that children impose on them The dominant methodology is interpretive or hermeneutic and the goal is to articulate the figurative metaphoric processes and narrative structures that inhabit social actions and from which they draw their meaning and coherence

Gender, Interaction, and Inequality Cecilia L. Ridgeway, 2013-03-09 Causal explanations are essential for theory building In focusing on causal mechanisms rather than descriptive effects the goal of this volume is to increase our theoretical understanding of the way gender operates in interaction Theoretical analyses of gender s effects in interaction in turn are necessary to understand how such effects might be implicated with individual level and social structural level processes in the larger system of gender inequality Despite other differences the contributors to this book all take what might be loosely called a microstructural approach to gender and interaction All agree that individuals come to interaction with certain common socially created beliefs cultural meanings experiences and social rules These include stereotypes about gendered activities and skills beliefs about the status value of gender rules for interacting in certain settings and so on However as individuals apply these beliefs and rules to the specific contingent events of interaction they combine and reshape their implications in distinctive ways that are particular to the encounter As a result individuals actively construct their social relations in the encounter through their interaction The patterns of relations that develop are not completely determined or scripted in advance by the beliefs and rules of the larger society Consequently there is a reciprocal causal relationship between constructed patterns of interaction and larger social

structural forms The constructed patterns of social relations among a set of interactants can be thought of as micro level social structures or more simply microstructures Gender Roles in Immigrant Families Susan S. Chuang, Catherine S. Tamis-LeMonda, 2013-04-18 Researchers recognize that theoretical frameworks and models of child development and family dynamics have historically overlooked the ways in which developmental processes are shaped by socio cultural contexts Ecological and acculturation frameworks are especially central to understanding the experiences of immigrant populations and current research has yielded new conceptual and methodological tools for documenting the cultural and developmental processes of children and their families Within this broad arena a question of central importance is on how gender roles in immigrant families play out in the lives of children and families Gender Roles in Immigrant Families places gender at the forefront of the research by investigating how it interplays with parental roles parent child relationships and child outcomes
