Gender Dimensions In Disaster Management A Guide For South Asia:

Gender Dimensions in Disaster Management Madhavi Malalgoda Ariyabandu, 2005 This book aims to address the dearth of specific information on the subject of gender issues in disaster particularly in the South Asian countries Targeted at policy makers and development practitioners in South Asia it argues that the risk posed by natural hazards is a variable which has direct implications on development in general and livelihoods in particular The specific vulnerabilities and capacities of men and women and the gender social dynamics of disaster situations are often not obviously visible but it is vital that they be taken into consideration for if ignored they can impede development efforts

Gender Dimensions in Disaster Management Madhavi Malalgoda Ariyabandu, Maithree Wickramasinghe, 2003 *Women and Disasters in South Asia* Linda Racioppi, Swarna Rajagopalan, 2016-04-14 South Asia is one of the most vulnerable areas of an increasingly disaster impacted world with cyclones earthquakes floods and droughts causing several casualties and disrupting lives and livelihoods every year Yet the impacts of disasters are not equally distributed across the peoples of the region Women and men experience disaster differently and their needs in the aftermath of disaster often differ Bringing together perspectives from academics emergency response specialists and development practitioners the volume investigates to what extent and in what ways gender affects the course of post disaster reconstruction Conversely it also explores in what ways gender politics may be altered by disaster and post disaster reconstruction The study includes a comprehensive overview of key issues facing women and men as gendered beings in reconstruction and development a targeted observation of specific South Asian disaster contexts and a sustained discussion of case studies and their implications and lessons This book will interest scholars and researchers of disaster management rehabilitation studies gender environment ecology and sociology It will also be useful to institutions dealing with natural and man made disasters non governmental organisations and disaster recovery professionals

Feminist Research Methodology Maithree Wickramasinghe, 2009-12-04 This book focuses on feminist research methodology exploring and analysing its constituting methods theory ontology epistemology ethics and politics and research issues relating to women gender and feminism in Sri Lanka The book examines ways of meaning making for the political ideological and ethical purposes of promoting individual and social change and constructs an example of feminist research praxis Using this South Asian country as a case study the author looks at the means by which researchers in this field inhabit engage with and represent the multiple realities of women and society in Sri Lanka In analysing what constitutes feminist research methodology in a transitional country the book links local research practices with Western feminist approaches taking into account the commonalities distinctions and specificities of working in a South Asian context Engaging with and re conceptualising three traditionally different types of research women s studies gender studies and feminist studies from a methodological perspective Feminist Research Methodology provides a framework for researching feminist issues Applicable at both a local and global level this original methodological framework will be of value

to researchers working in any context *The Hindu Kush Himalaya Assessment* Philippus Wester, Arabinda Mishra, Aditi Mukherji, Arun Bhakta Shrestha, 2019-01-04 This open access volume is the first comprehensive assessment of the Hindu Kush Himalaya HKH region It comprises important scientific research on the social economic and environmental pillars of sustainable mountain development and will serve as a basis for evidence based decision making to safeguard the environment and advance people s well being The compiled content is based on the collective knowledge of over 300 leading researchers experts and policymakers brought together by the Hindu Kush Himalayan Monitoring and Assessment Programme HIMAP under the coordination of the International Centre for Integrated Mountain Development ICIMOD This assessment was conducted between 2013 and 2017 as the first of a series of monitoring and assessment reports under the guidance of the HIMAP Steering Committee Eklabya Sharma ICIMOD Atiq Raman Bangladesh Yuba Raj Khatriwada Nepal Linxiu Zhang China Surendra Pratap Singh India Tandong Yao China and David Molden ICIMOD and Chair of the HIMAP SC This First HKH Assessment Report consists of 16 chapters which comprehensively assess the current state of knowledge of the HKH region increase the understanding of various drivers of change and their impacts address critical data gaps and develop a set of evidence based and actionable policy solutions and recommendations These are linked to nine mountain priorities for the mountains and people of the HKH consistent with the Sustainable Development Goals This book is a must read for policy makers academics and students interested in this important region and an essentially important resource for contributors to global assessments such as the IPCC reports Gender and Land Tenure in the Context of Disaster in Asia Kyoko Kusakabe, Rajendra Shrestha, Veena N., 2015-06-30 This book explores an interdisciplinary field at the intersection of gender and development studies disaster and land tenure policy It is well known that women generally have weaker claims to land But how does that translate to increased vulnerability during disaster Using case studies from Asia this book argues that land tenure is a key factor in mitigating the impact of disasters on women The scale and frequency of disasters have been increasing in recent decades due to human impact on the landscape and climate Unsustainable farming and land management systems have increased environmental risks and social vulnerabilities However around the world the costs of disasters are disproportionately borne by women due largely to their reduced mobility and lack of control over assets In post disaster settings women s vulnerabilities increase due to gendered rescue and rehabilitation practices As such a gendered approach to land rights is critical to disaster preparedness and recovery **OECD Review of Gender Equality in Colombia** OECD, 2023-05-29 In recent decades Colombia has pursued a strategy to encourage gender equality as an important enabler of inclusive growth and national well being and to promote gender mainstreaming through institutions policies and tools This report assesses four main pillars of Colombia s governance for gender equality analysing strengths and identifying areas for further improvement **Handbook of Disaster Research** Havidan Rodriguez, Enrico L. Quarantelli, Russell Dynes, 2009-11-14 Recent disasters such as the 2004 Indian Ocean Tsunami bomb explosions in London

Hurricane Katrina the Pakistan Earthquake floods in Central America and landslides in Indonesia among many others have resulted in an extensive loss of life social disruption significant economic impacts to local and national economies and have made headline news in countries throughout the world Thus the Handbook of Disaster Research is a timely and much needed contribution to the field of disasters The editors of this Handbook have brought together a comprehensive and interdisciplinary volume with a diverse and international group of contributors The Handbook is based on the principle that disasters are social constructions and focuses on social science disaster research Attention is given to conceptual issues dealing with the concept disaster and to methodological issues relating to research on disasters including Geographic Information Systems as a useful research tool and its implications for future research how disaster research is increasingly being used in the emergency management curriculum and how research is useful in dealing with emergency operations The Handbook also includes a number of essays focusing on various types of vulnerabilities In addition there are discussions on community processes that are evoked by disasters including warnings search and rescue coordination and organizational adaptation as well as dealing with death and injury and recovery and the role of the media in disasters special attention is given to emergency systems in several nation states The Handbook also includes contributions focusing on the relationship between disaster and development the popular culture of disasters new dimensions of disaster research as well as projections of disasters into the future Disasters allow the opportunity for social scientists to study human behavior in which adaptation resilience and innovation are often more clearly revealed than in normal and stable times The Handbook of Disaster Research provides an interdisciplinary and international approach to disasters with theoretical methodological and practical applications

The Palgrave Handbook of Socio-ecological Resilience in the Face of Climate Change Sunil Nautiyal, Anil Kumar Gupta, Mrinalini Goswami, Y. D. Imran Khan, 2023-09-01 This book shares experiences and knowledge on climate change impacts and adaptation risk reduction strategies communities responses and best practices from different landscapes of India It provides insights into climate change risk reduction in trans disciplinary frameworks The findings and discussions put forward in the chapters largely based on micro level case studies provide an in depth understanding of interactions among ecology society and economy under different conditions of changing climate It contains critical discussion on both existing and required actions as adjustments to climate change impacts by different actors at diverse scales and contexts The recommendations will be beneficial in climate change adaptation planning for India and other developing countries where a large portion of the population directly depends on climate sensitive sectors The content of the book is interdisciplinary and it will be beneficial for scholars and practitioners from natural science social science policy and governance across the continents

of taking into account political economic and cultural differences across diverse groups of people While the book's articles are designed as companion pieces to the chapters in the Second Edition of the Sourcebook this reader may also be used as a stand alone text by those researching specific topics such as diversity issues conducting trainings or teaching advanced courses such as international social work

Human Security and Natural Disasters Christopher Hobson, Paul Bacon, Robin Cameron, 2014-03-26 Human security is an approach that rejects the traditional prioritization of state security and instead identifies the individual as the primary referent of security It offers a way of broadening our perspective and recognizing that the most pressing threats to individuals do not come from interstate war but from the emergencies that affect people every day such as famine disease displacement civil conflict and environmental degradation Human security is about people living their lives with dignity being free from fear and want To date there has been a strong tendency to focus on insecurity caused by civil conflict with less attention on issues to do with environmental security This volume addresses the threat posed by natural disasters which represent an increasingly major human security threat to people everywhere In looking at natural disasters this book also refines the human security approach It does so through developing its previously unexplored interdisciplinary potential This volume explicitly seeks to bring the human security approach into conversation with contributions from a range of disciplines development disaster sociology gender studies international law international relations philosophy and public health Collectively these scholars unpack the human element of natural disasters In doing so an emphasis is placed on how pre-existing vulnerabilities can be gravely worsened as well as the interconnected nature of human security threats The book presents a variety of case studies that include the Indian Ocean tsunami Hurricane Katrina the 2010 Haiti earthquake and the 2011 triple disasters in Japan

Strengthening Resilience in Post-disaster Situations Julian Gonsalves, Priyanka Mohan, 2011 To mitigate develop and improve the lives of those vulnerable to intense natural disasters climate change and food insecurity many agencies are funding and implementing diverse activities from reconstruction to rehabilitation and this book presents the lessons and impacts from a collection of these projects It describes concepts strategies processes and tools in such a way that they can be easily replicated and shared with a wider audience This study explains that mid to long term interventions strategies and practical approaches in particular are being designed and adopted to build the resilience of the poor It describes valuable practical experiences and lessons from the field capturing a range of interventions from implementing agencies involved in post disaster rehabilitation It is comprised of 79 papers grouped into four sections coastal threats and challenges in South Asia disaster risk reduction and the combining of resilience mitigation and adaptation pathways for building the capacity of vulnerable communities to withstand and rebuild from natural disasters and real life postdisaster rehabilitation and resilience building projects that have led to positive change at the community level This is an exceptional resource for anyone concerned with disaster management and rehabilitation work including students researchers policymakers and members of nongovernmental organizations

Disaster Risk Reduction Bupinder Zutshi, Akbaruddin Ahmad, Ananda Babu Srungarapati, 2018-07-10 This book discusses the interconnected complex and emerging risks in today's societies and deliberates on the various aspects of disaster risk reduction strategies especially through community resilience and responses It consists of selected papers presented at the World Congress on Disaster Management which focused on community resilience and responses towards disaster risk reduction based on South Asian experiences and closely examines the coordinated research activities involving all stakeholders especially the communities at risk Further it narrates the experiences of disaster risk reduction in different communities that have policy implications for mitigation of future disaster risks in the societies affected by these types of disasters Written from the social science perspective to disasters rather than an engineering approach the book helps development and governance institutions to prioritize disasters as a problem of development rather than being parallel to it

The Tsunami Legacy, 2009

Impacts of Climate Change and Variability on Pastoralist Women in Sub-Saharan Africa Melese Getu, Munyae M. Mulinge, 2013 The term climate change is used to denote any significant but extended change in the measures of climate The changes could be due to natural variability or as a result of human activities such as the burning of fossil fuels to produce energy deforestation industrial processes and some agricultural practices Such activities release large amounts of carbon dioxide and other greenhouse gases into the atmosphere that hang like a blanket around the earth thus trapping energy in the atmosphere and causing it to warm up This results increasingly in climate variability which is characterised by extreme seasonal annual temporal and non spatial variability in temperature vagaries of precipitation rainfall patterns and amounts and or wind patterns occurring over

a prolonged period of time The last decade 2001 2010 has been the warmest on record with the average temperatures reaching 0.46 C above the 1961 1990 mean and 0.21 C warmer than the 1991 2000 period It has been proved that the African continent is warming up faster all year round than the global average a trend that is likely to continue By the year 2100 it is predicted that temperature changes will fall into ranges of about 1.4 C to nearly 5.8 C increase in mean surface temperature compared to 1990 and the mean sea level will rise between 10cm to 90 cm AMCEN 2011 The interior of semiarid margins of the Sahara and central southern Africa will be the most affected by such warming AMCEN 2011 To tackle the phenomenon of climate change effectively human societies have put in place a combination of mitigation and adaptation mechanisms and strategies Whereas mitigation aims at avoiding or lessening the impacts of the unmanageable the goal of adaptation is to manage the unavoidable That men and women are affected differently by climate change suggests that they also differ in terms of the adaptation mechanisms they employ Despite the existence of gender based differences in the effects of climate change and in adaptation and coping strategies studies on the gender differential impacts of climate change and variability on women in general and pastoralist women in particular in sub Saharan Africa are limited This volume offers insights and knowledge that pastoralist women developed on climate change adaptation through their experiences in their households and communities and thereby tries to narrow this gap

Climate Crisis and Sustainable Solutions Narpinder Singh, S. Ananda Babu, 2024-11-26 This contributed volume dives into the critical intersection of climate adaptation vulnerability to hazards and the imperative of decarbonization in fortifying global food and nutritional security This comprehensive exploration aims to shed light on the challenges our food systems face in the wake of climate change and the strategies required to ensure resilience and sustainability In the face of escalating climate challenges securing sustenance demands a comprehensive approach Climate adaptation becomes paramount as agricultural systems struggle with increased vulnerabilities to various hazards From extreme weather events to shifting precipitation patterns the agricultural landscape is under constant threat The decarbonization imperative emerges as a critical strategy addressing the dual goals of mitigating climate change and enhancing food and nutritional resilience By reducing carbon emissions and transitioning to sustainable practices we not only contribute to global climate goals but also fortify food systems against environmental shocks This integrated approach acknowledges the intricate connections between climate agriculture and nutrition emphasizing the urgency of concerted efforts to ensure a resilient and sustainable future for food production and consumption This book includes in depth case studies from different regions showcasing the diverse impacts of climate change on food systems This book will integrate insights from multiple disciplines such as environmental science agriculture policy studies and community engagement providing a more holistic understanding of the issues at hand It will serve as a valuable resource for students researchers and practitioners seeking in depth knowledge on these interconnected topics
