Gender Space And Power A New Paradigm For The Social Sciences:

Gender, Space and Power Mino Vianello, Elena Caramazza, 2005 Presenting the key concept of ovular space as opposed to rectilinear spatial concepts as a new paradigm for social analysis the authors put forward a wide ranging social and cultural critique based on a utopian vision of a new social organization They argue for a reversal of the masculinism that has predominated throughout human history to date They analyze the origins and structures of this predominant cultural form and describe phenomena that indicate that this pattern is shifting with changes in gender roles They emphasize that their approach is not biologicistic or essentialist and that their argument is based on the psychosocial reaction to biological fact based on a fundamental opposition between formal rational thinking prototypical of the male mind and female ovular thinking expressing itself in empathy which they regard as a key component of social change in contemporary society Gender Space and Power discusses the problems relating to masculinist bias in these subject areas and indicate some possible new approaches Katherine Mansfield and Literary Modernism Janet Wilson, Susan Reid, Gerri Kimber, 2011-07-07 A reinterpretation of Katharine Mansfield's work that expands our understanding of her place in Modernism

experiences in the information age Addresses key policy debates about social exclusion identity friends and family *New Theoretical Dialogues on Migration in China* Hong Zhu, Junxi Qian, 2023-02-21 This edited book emerges from the observation that the current literatures on migration in China are constrained by a series of shortfalls including a relative topical homogeneity centred on domestic labour migration relatively narrowly conceived and institutionalist conceptions of migration and migrants without adequate attention paid to the identities agencies and everyday experiences of migrants and finally a lack of engagement with theoretical models and paradigms in the broad discipline of migration studies Assembling eight fine grained research works engaging with a broad variety of migratory trajectories and experiences this book addresses these shortfalls by 1 investigating diverse forms of domestic and transnational migration in and to China 2 problematising rethinking and innovating well established analytical tools and categories to move beyond their epistemological fixity and highlight their socially and dynamically constructed nature and 3 underscoring the centrality of identity subjectivity and everyday experiences rather than mechanical causality between institutions and migration outcomes to theoretical understandings of migration in China It will be of interest to researchers and advanced students of Sociology Politics Human Geography Social Work and Urban Studies This book was originally published as a special issue of the Journal of Ethnic and Migration Studies *Gender Intentional Crop Breeding: From Integration To Institutional Innovation* Hale Tufan, Vivian Polar, Jacqueline Ashby, 2025-06-02 Significant progress in agricultural technology development has remained persistently blind to social and gender inequalities Creating agricultural research ecosystems and institutions that address gender inequality requires structural and systemic analysis One of the major areas of investment in agricultural innovation is plant breeding Integrating social welfare objectives in plant breeding is a good starting point to catalyze progress towards gender equality objectives in research for development at a global scale yet devoid of structural change these efforts risk falling short of expectations Intentionally addressing gender in plant breeding research can reshape the technical options goals and intended impact of breeding programs Improving the benefits delivered to rural women through plant breeding can be achieved through new methods and learning critically analyzing systematic barriers to equitable plant breeding research and documenting experiences that demonstrate positive change There is a wide diversity of global experiences where gender research has analyzed how gender differences influence needs preferences and potential benefits from crop varieties and crop specific traits Some of these experiences were able to successfully integrate results and learning from gender research into breeding processes and decisions while some have failed to demonstrate concrete actionable results in breeding programs *Capitalism in the Platform Age* Sandro Mezzadra, Niccoló Cuppini, Mattia Frapporti, Maurilio Pirone, 2024-02-28 This open access book provides an overview of urban digital platforms such as Airbnb and Deliveroo which along with Amazon Google Facebook and other IT companies constitute by now the infrastructures for other businesses to operate on and for our social life to go on These platforms serve as standards based techno economic systems that simultaneously

capture cooperation through remote coordination and organize labor via algorithm management Based on a three years research project this contributed book outlines a general theory of platform capitalism that conceives these platforms not only as technical devices but as generative engines that operate at the interface of several aspects such as digitalization of forms of social cooperation algorithm based management of labor and participation and private and vertical appropriation of profits These elements are somehow iconic of the capitalist evolution of the last decades and they open up a reflection on new forms of primitive accumulation in particular regarding data on the mechanisms used to capture and extract social surplus value and on the logistic financial dimensions of capital Finally in light of the transformations associated with the COVID 19 pandemic the authors examine how platforms can evolve into hegemonic organizational structures Assuming we are all already living in the age of the platform this book takes a multifaceted approach combining sociology with urban studies and political sciences with economics to grasp the challenges our societies face in terms of ensuring fair economic growth adequate social protections and labor rights It will appeal to anyone interested in digital platforms and how they are changing the organization of labor urban spaces and forms of governance

Non-humans in Social Science Karolína Pauknerová, Marco Stella, Petr

Gibas, 2014-12-01 The book explores the issue of non humans and their role and position within contemporary social sciences Inspired by current trends of bridging the dichotomy of nature and culture the authors use the non human as a prism that offers a different perspective of the world society culture and last but not least being s To start paying attention to non humans has the potential to hybridize social sciences and in turn enrich them as well as to offer social scientists novel perspectives and tools to approach social phenomena Such an attitude might in turn lead to a reassessment of understanding of the relationship between the world and being and of the categories of being and subject Hence the potential of non humans to stimulate an ontological shift within social sciences The view of the human and non human as oppositional categories is a remnant of essentially modernist thinking This book represents a response in terms of an attempt to think about humans and non humans outside of the binary division The authors thus want to contribute to the hybridization of social sciences and throughout the book they deal with ontological epistemological and thematical shifts stemming from the hybridization If the non human does not exist as a negation the boundary between the two becomes unclear and overlapping It is with this hybridization the blurring of the boundaries that we are able to come closer to those who inhabit the world non humans and humans alike
