China's Economic Reform and Development during the 13th Five-Year Plan Period Gang Lin, Yiming Wang, Xiaohe Ma, Debu Gao, 2020-09-23 Five Year Plans have been a cornerstone of Chinese social and economic development initiatives since 1953 During the thirteenth of these periods between 2016 and 2020 the global economy has experienced instability after the financial crisis as well as political and economic reconfiguration Drawing on modern economic theory this book comprehensively discusses China's economic

development in this crucial phase The book analyzes the international economic environment and asks how China's continued reform and opening up can fit with the new era of economic globalization It also presents the difficulties China faces in such fields as urbanization the coordination of regional development and urban rural integration economic reform and the reform of factor markets and state owned enterprises The book outlines many medium term development rules along with key characteristics of China's economy helping international readers fully understand likely future trajectories for the Chinese economy

Innovation, Automation and a Sustainable Economy Jon-Arild Johannessen, 2024-04-03 Economic inequality the environmental crisis and the climate crisis are systemically linked Accordingly they should be understood as a single interconnected system and strategies for resolving them should be guided by this understanding This book demonstrates how the Green New Deal and its systemic alternative the Red New Deal could influence the course of these three global crises all within the context of the Fourth Industrial Revolution The author has developed several scenarios that are relevant to the automation that will result from advances in artificial intelligence and intelligent robots The first is one of mass unemployment while the second envisages low rates of unemployment although workers will experience stagnation and then a decline in their wages It is possible to envisage a different set of scenarios however we must replace the capitalist economic model with a different model mutualism a sustainable model that would allow for economic growth while also addressing the three current systemic crises The author argues that if such a model is implemented there will be jobs for everyone and the climate crisis will be tackled because people's welfare will be prioritized over profit We can assert that such a model will foster the development of economic equality The basic premise of this mutual and sustainable economic model is that sustainability is in everyone's interests The book employs not only established and innovative methods such as literature reviews scenario thinking and historical methods to underpin its arguments but also conceptual generalization as an intellectual tool to tackle the general research problem thus it will be an invaluable resource for scholars and students of sustainability and the innovation economy

Innovation, Economic Development, and Intellectual Property in India and China Kung-Chung Liu, Uday S. Racherla, 2019-09-06 This open access book analyses intellectual property codification and innovation governance in the development of six key industries in India and China These industries are reflective of the innovation and economic development of the two economies or of vital importance to them the IT Industry the film industry the pharmaceutical industry plant varieties and food security the automobile industry and peer production and the sharing economy The analysis extends beyond the domain of IP law and includes economics and policy analysis The overarching concern that cuts through all chapters is an inquiry into why certain industries have developed in one country and not in the other including the role that state innovation policy and or IP policy played in such development the nature of the state innovation policy IP policy and whether such policy has been causal facilitating crippling co relational or simply irrelevant The book asks what India and China can learn from each other and whether there is any possibility of synergy The book

provides a real life understanding of how IP laws interact with innovation and economic development in the six selected economic sectors in China and India The reader can also draw lessons from the success or failure of these sectors

The Internationalization of the German Political Economy William D. Graf,2016-07-27 The internationalization of the German political economy in the postwar era has produced a special socio economic and political formation which this anthology views as a hegemonic project Based upon a virtually total West German integration into the West this project has evolved within a new international division of labour and a global political system in which the German state with its extreme

level of export dependency and need for stability has become a guardian and champion of the global status quo *The Recombinant University* Doogab Yi, 2015-03-23 The advent of recombinant DNA technology in the 1970s was a key moment in the history of both biotechnology and the commercialization of academic research Doogab Yi's *The Recombinant University* draws us deeply into the academic community in the San Francisco Bay Area where the technology was developed and adopted as the first major commercial technology for genetic engineering In doing so it reveals how research patronage market forces and legal developments from the late 1960s through the early 1980s influenced the evolution of the technology and reshaped the moral and scientific life of biomedical researchers Bay Area scientists university administrators and government officials were fascinated by and increasingly engaged in the economic and political opportunities associated with the privatization of academic research Yi uncovers how the attempts made by Stanford scientists and administrators to demonstrate the relevance of academic research were increasingly mediated by capitalistic conceptions of knowledge medical innovation and the public interest Their interventions resulted in legal shifts and moral realignments that encouraged the privatization of academic research for public benefit *The Recombinant University* brings to life the hybrid origin story of biotechnology and the ways the academic culture of science has changed in tandem with the early commercialization of recombinant DNA technology
