Gene Wars Military Control Over The New Genetic Technologies:

Gene Wars Charles Piller, Keith R. Yamamoto, 1988 An arresting book about the incredible dangers and implications of genetic engineering harnessed to biological warfare *Bulletin of the Atomic Scientists*, 1988-10 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world NCB: Nuclear, Chemical, Biological Warfare Joan Hyatt, 1990 Global Spread of Chemical and Biological Weapons United States. Congress. Senate. Committee on Governmental Affairs, 1990 **Chemical and Biological Weapons** E. Spiers, 1994-08-16 his previous forays into this subject have made him the Chemical Biological Weapons professionals author and this book does nothing to diminish this view It is also timely British Army Review An analysis of the proliferation of chemical and biological weapons which examines the attractions and utility of these weapons for some developing states the difficulties encountered in trying to control their spread and the lessons from the Rabta controversy and the Gulf War It reviews the evolution of American chemical weapons policy under the Bush administration the implications of the Chemical Weapons Convention and the problems posed by the inherently dynamic nature of these weapons and their tactical flexibility In the Name of Science Andrew Goliszek, 2003-11-15 As Goliszek demonstrates in this chilling book science has been called upon to kill people as often as it has to cure them The grim catalogue of inhumanities committed culminated with the Nazi experiments but in recent history the U S government has sponsored experiments on human subjects without their full knowledge The Anthrax Letters Leonard A. Cole, 2009-04-01 At 2 00am on October 2 2001 Robert Stevens entered a hospital emergency room Feverish nauseated and barely conscious no one knew what was making him sick Three days later he was dead Stevens was the first fatal victim of bioterrorism in America Bioterrorism expert Leonard Cole has written the definitive account of the Anthrax attacks Cole is the only person outside law enforcement to have interviewed every one of the surviving inhalation anthrax victims along with the relatives friends and associates of those who died as well as the public health officials scientists researchers hospital workers and treating physicians Fast paced and riveting this minute by minute chronicle of the anthrax attacks recounts more than a history of recent current events it uncovers the untold and perhaps even more important story of how scientists doctors and researchers perform life saving work under intense pressure and public scrutiny Updated with new information about Ivins and a series of upcoming Congressional hearings into the FBI's conduct in this case The Anthrax Letters amply demonstrates how vulnerable America was in 2001 and whether we are better prepared now for a bioterror attack **Germs Gone Wild** Kenneth King, 2011-12-15 A shocking exposé of the reckless proliferation of bio weapon research and the threat this poses to everyday Americans Battling a new generation of corporate giants and uncovering threats right in our own backyard Kenneth King's *Germs Gone Wild* reveals the massive expansion of America's bio defense research labs and the culture of deception surrounding hundreds of facilities that have opened since 9 11 King

experienced the menace of bio defense research firsthand when local government and business leaders tried to lure a new facility to his hometown in Kentucky Researching the safety claims he not only found many of them to be completely false but was also horrified by the lack of oversight and the recklessness with which these labs genetically modified pathogens like smallpox Ebola and influenza without a care for what happened to the public if there was ever a leak And yet the greed that drove the development of these labs has effectively counteracted any cautionary checks by the government and universities All have been seduced by the economic gains and corporate stipends that come with compliance and turning a blind eye But now the reality of these labs and the germs they manipulate will finally be brought to light as King examines the controversies surrounding plants from Maryland to Boston and Utah to the Department of Homeland Security's dubious National Bio and Agro Facility NBAF project and the precautions or lack thereof being taken to protect us all from a deadly pandemic

The Classroom Arsenal Douglas D. Noble,2017-09-29 A quarter of a century after its initial publication *The Classroom Arsenal* remains pivotal in understanding and challenging the relentless promotion of technology to reform education This seemingly benign education technology

juggernaut carries forward the momentum of military agendas in man machine systems detailed in the book Promoters continue to flood schools with technology and its still unfulfilled promise of cutting edge personalized learning Meanwhile they continue as well their insatiable pursuit of federal funding educational legitimacy corporate profits and access to student subjects and their accumulated learning data for product development Less understood though is a companion enterprise there from the start to replace teaching and learning in traditional classrooms by efficient automated systems that manage and monitor human cognition and learning for high performance systems from weapons systems to high tech corporations As education is moved imperceptibly away from its traditional humanistic aims and from the classroom itself the goal of this human engineering project the depersonalized accumulation of cognitive components for a 21st century militarized economy best befits the book s original title The Human Arsenal This ongoing military corporate sponsored enterprise continues to impact education today largely unnoticed One example is the federally funded Advanced Distributed Learning Initiative ADL which has been a major force behind the implementation of electronic learning systems now used in all Defense Department and federal employee training With the Defense Advanced Research Project Agency ARPA ADL is developing structures to capture students soft skills and the Army Research Laboratory is developing intelligent tutoring systems to enable instructional management of affect engagement and grit perseverance ADL through the Department of Defense has developed Experience API a learning technology that can monitor all student online and offline interactions and archive these in data lockers or learning record stores ADL has already impacted thousands of school districts through nonprofits such as IMS Global and Future Ready Schools part of an industry massively subsidized by high tech corporations and valued at 255 billion annually A 90 million Advanced Research Projects Agency for Education ARPA ED modeled after the military s ARPA has been proposed to fund dramatic breakthroughs in learning and teaching These include digital tutors as effective as personal tutors and with the Navy s Full Spectrum Learning project data collection tools for personalized education modeled after corporate data analysis that identifies consumer patterns and preferences ADL is just one example of how the military corporate ed tech enterprise is changing public education by hollowing it out into something that can be digitized data driven automated and monitored Its promoters envision education as children interacting with online learning systems where based on past performance algorithms will serve up what each student needs to know next Through this digital curriculum students create virtual educational identities at very young ages and learning devices are watching students as much as students are watching them Such is the education landscape presaged by The Classroom Arsenal a quarter century ago whose origins and trajectories need to be deeply understood now more than ever

Bulletin of the Atomic Scientists , 1988-10 The Bulletin of the Atomic Scientists is the premier

public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world *Eco-Impacts and the Greening of Postmodernity* Tom Jagtenberg, David McKie, 1996-11-07 Addressing a growing need to examine environmental issues from a cultural perspective this innovative book adopts a cultural studies approach to reach a deeper understanding of the significance of ecological issues in our lives *Eco Impacts and the Greening of Postmodernity* explores such vital questions as Can nature survive How do academic disciplines engage with environmental crises And how do we map sustainable futures The authors Tom Jagtenberg and David McKie bring a body of relevant literature into the debate that stems from both cultural and environmental issues as well as their own multidisciplinary perspectives on the subject *Fatal Future?* Richard M. Pearlstein, 2009-06-03 The nature and goals of terrorist organizations have changed profoundly since the Cold War standoff among the U S Soviet and Chinese superpowers gave way to the current polyplex global system in which the old rules of international engagement have been shattered by a new struggle for power among established states non state actors and emerging nations In this confusing state of global disorder terrorist organizations that are privately funded and highly flexible have become capable of carrying out incredibly destructive attacks anywhere in the world in support of a wide array of political religious and ethnic causes This groundbreaking book examines the evolution of terrorism in the context of the new global disorder Richard M Pearlstein categorizes three generations of terrorist organizations and shows how each arose in response to the global conditions of its time Focusing extensively on today's transnational i e privately funded and internationally operating terrorist organizations he devotes thorough attention to the two most virulent types ethnoterrorism and radical Islamic terrorism He also discusses the terrorist race for weapons of mass destruction and the types of attacks including cyberterrorism that are likely to occur in coming years Pearlstein concludes with a thought provoking assessment of the many efforts to combat transnational terrorism in the post September 11 period *Emerging Infectious Diseases and Society* P. Washer, 2010-05-07 In the 1970s it seemed infectious diseases had been conquered but today global epidemics seem to pose a new more sinister threat This fascinating study explores these new infectious diseases such as Swine Flu SARS and AIDS and the re emergence of old threats and discusses their role in society
