Genera Plantarum:

Genera Plantarum, Fifth Edition, 1754 Carl von Linné, 1960 **Genera plantarum [3.a ed.]**, 1766 *American Journal of Science*, 1840 **Genera Plantarum**, 1979 **Plant Taxonomy and Biosystematics** Clive A. Stace, 1989 A concise up to date and fully integrated discussion of present day plant taxonomy General Systematic Bacteriology Robert Earle Buchanan, 1925 *A General View of the Writings of Linnaeus* Richard Pulteney, Carl Troilius, 1805 **Genera plantarum vocabulis characteristicis definita** Nathanael Matthias von Wolf, 1776 **CRC World Dictionary of Medicinal and Poisonous Plants** Umberto Quattrocchi, 2016-04-19 Written as a reference to be used within University Departmental Public Institutional Herbaria and Arboreta libraries this book provides the first starting point for better access to data on medicinal and poisonous plants Following on the success of the author's CRC World Dictionary of Plant Names and the CRC World Dictionary of Grasses the author provides the names of thousands of genera and species of economically important plants It serves as an indispensable time saving guide for all those involved with plants in medicine food and cultural practices as it draws on a tremendous range of primary and secondary sources This authoritative lexicon is much more than a dictionary It includes historical and linguistic information on botany and medicine throughout each volume

Indian Trees Sir Dietrich Brandis, 1906 **Plant Taxonomy** Rajni Gupta, 2012-01-01 Prithipalsingh Indian taxonomist contributed articles The Plant : a Biography Matthias Jacob Schleiden, 1848 Embryology of Angiosperms B. M. Johri, 2012-12-06 Thirty four years have elapsed since the publication of the late Professor P Maheshwari's text An Introduction to the Embryology of Angiosperms a work which for many years served as an invaluable guide for students and a rich source book for research workers Various texts dealing with sections of the broad spectrum of topics encompassed by Maheshwari in his book have appeared in the interim but a compendious modern work dealing with the whole field has been lacking This present volume splendidly meets the need and it is altogether fitting that Professor B M Johri long an associate and close colleague of Professor Maheshwari and himself a prolific contributor to the subject should have undertaken the task of editing it When Maheshwari wrote it was still feasible for one author to handle the subject but today even someone with his fine breadth of vision and depth of understanding could not alone do it justice So the effort has to be a collaborative one and Professor Johri's achievement has been to bring together a team of authoritative collaborators assign them their responsibilities and put them to work to produce a text as integrated in its treatment as the diversity of the subject would allow The product vividly illustrates the advances that have been made in the study of angiosperm reproductive systems in the last 30 years and the book is surely destined to become the new standard for student and researcher alike **The Johns Hopkins University Circular** Johns Hopkins University, 1895 Includes University catalogues President's report Financial report registers announcement material etc *Circulars* Johns Hopkins University, 1895 **The Johns Hopkins University circular**, 1893 **Draughtsmen, Botanists and Nature:** Karin Nickelsen, 2006-09-21 This book is based on a

doctoral thesis submitted to the University of Bern in the summer of 2002. Research on the thesis was made possible through a grant provided by the Swiss National Science Foundation (SNF) from 2000 to 2002 for a project on the history and epistemology of scientific illustrations. Project No 1152 059499. Gerd Grahn headed this programme at the University of Bern and made my reworking of the thesis into a book in English possible. He also provided the funding for the services of a professional copy editor, Margareta Simons, Bern. The findings presented in this book are closely related to the general results of the SNF project which are published elsewhere; the source material can be consulted in an earlier monograph and in an electronic edition on the internet. The theoretical approach will be more thoroughly investigated in a textbook on the analysis of scientific illustrations. In addition, this study has made use of theoretical concepts developed by Gerd Grahn which in their latest form have yet to be published; these concern primarily the model concept discussed in Chapter 3. The criteria put forward for optimizing scientific illustrations which are dealt with in Chapter 7 were also originally proposed by Gerd Grahn; they were refined and elaborated in the SNF project. Some of the material on the copying links presented in this book was first published in 2 an article in *Studies in History and Philosophy of Science Part C* while some of the material in Chapter 5 on the hand colouring of illustration was 3 published prior to this book in the *Annals of Science*. I was able to access source material for this study from several archives and 4 institutions. Most of the images that I examined originated from copies held in the University Library Göttingen while the remaining illustrations came 1. See Nickelsen 2000.
