General Social Surveys 1972-1996 Cumulative Codebook:

Sourcebook of Criminal Justice Statistics, 1996 Frames Of Justice Leroy H. Pelton, This work is devoted to analyzing three major frames of justice group justice individual desert and life affirmation and their implications for social policy as well as their reflections in contemporary social policies Pelton finds that all three frames of justice are reflected in the Bible and later the Koran He contends that there is no evidence in the Bible of a genesis or development from one frame of justice to another Rather a sense of justice has existed in the human mind from time immemorial with the three frames coexisting and manifesting themselves in both inter and intra group relations The prominence of one frame over another at any particular point in history or in a particular geographical location is influenced by a variety of factors though it is ultimately open to human choice Pelton compares and contrasts the philosophies of nonviolence and liberalism in regard to the frames and explores the relationships between principle sentiment reason justice and policy He discusses social science's problematic relationship to justice in policymaking for instance how scholars have focused more on the effectiveness of policies largely in terms of statistical outcomes reflecting aggregate data analyses than on their justice He goes on to explore in depth how frames of justice give direction to social policies including those of genocide Frames of Justice is an outstanding work that analyzes the question of justice and social policy while simultaneously exploring the notion of desert in religion philosophy and legislation especially within the context of the moral question of the relationship between means and ends and contrasting it with the principle of life affirmation Leroy H Pelton is a professor in and former director of the School of Social Work University of Nevada Las Vegas and professor emeritus of the School of Social Work Salem State College Massachusetts He is the author of The Psychology of Nonviolence For Reasons of Poverty A Critical Analysis of the Public Child Welfare System in the United States and Doing Justice Liberalism Group Constructs and Individual Realities and the editor of The Social Context of Child Abuse and Neglect He has also written numerous journal articles on psychology social work child welfare and social policy

The Oxford Handbook of Reciprocal Adult Development and Learning Carol Hoare, 2011-09-06 One of the Best Books of 2011 from the Center for Optimal Adult Development The fields of adult development and the study of learning have traditionally been considered separate with development falling under psychology and learning under education However recent ideas research and practices that have emerged in these fields of study effectively emphasize the inherent reciprocal relationship that exists between them advances in development frequently lead to learning and conversely learning almost necessarily fuels development In this second edition of The Oxford Handbook of Reciprocal Adult Learning and Development the synchronicity between development and learning is explored further as expert authors advance the latest theories to provide a rich foundation for this new area of study and practice for this interrelated field of study At the border of two disciplines this handbook focuses on the capacities of intelligence meta cognition insight self efficacy spirituality interpersonal competence wisdom and other key adult attributes as they relate to positive changes and personal growth in adults Contexts for development and learning e g the work role and environment are also addressed and mixed in throughout the volume are emanating implications for research practice and policy What emerges is a thoughtful handbook for all who promote optimal aging and is a must read for academics psychologists and practitioners in adult development

The Logic of Social Research Arthur L. Stinchcombe, 2020-07-08 Arthur L. Stinchcombe has earned a reputation as a leading practitioner of methodology in sociology and related disciplines Throughout his distinguished career he has championed the idea that to be an effective sociologist one must use many methods This incisive work introduces students to the logic of those methods The Logic of Social Research orients students to a set of logical problems that all methods must address to study social causation Almost all sociological theory asserts that some social conditions produce other social conditions but the theoretical links between causes and effects are not easily supported by observation Observations cannot directly show causation but they can reject or support causal theories with different degrees of credibility As a result sociologists have created four main types of methods that Stinchcombe terms quantitative historical ethnographic and experimental to support their theories Each method has value and each has its uses for different research purposes Accessible and astute The Logic of Social Research offers an image of what sociology is what it s all about and what the craft of the sociologist consists of

Erotic Capital Catherine Hakim, 2011-08-25 In 2010 pioneering sociologist Catherine Hakim shocked the world with a provocative new theory In addition to the three recognized

personal assets economic cultural and social capital each individual has a fourth asset erotic capital that he or she can and should use to advance within society In this bold and controversial book Hakim explores the applications and significance of erotic capital challenging the disapproval meted out to women and men who use sex appeal to get ahead in life Social scientists have paid little serious attention to these modes of personal empowerment despite overwhelming evidence of their importance In *Erotic Capital* Hakim marshals a trove of research to show that rather than degrading those who employ it erotic capital represents a powerful and potentially equalizing tool one that we scorn only to our own detriment *Groups at Work* Marlene E. Turner, 2014-04-04 This book has two purposes First it is fundamentally about groups at work both as they attempt to accomplish their goals and as they operate in organizational settings Second it draws together group researchers from social psychological and organizational studies Each chapter focuses on a central issue regarding groups as they work and examines that issue by drawing from both social psychological and organizational research Thus this book centers on the convergence and divergence of these two fields *Subverting the Power of Prejudice* Sandra L. Barnes, 2006-03-21 Sandra L Barnes helps us sort out why prejudice is unfair what feeds our prejudices how to overcome prejudice and how to avoid being victimized by discrimination This holistic book is an essential read for Christians committed to understanding prejudice and making change says Jenell Paris of Bethel University *Sociology for the Twenty-first Century* Timothy Jon Curry, Robert M. Jiobu, Kent P. Schwirian, 1999 INSTITUTIONS The Economy The Political Order Marriage and the Family Education Religion Medicine and Health Care WORKING FOR CHANGE Collective Social Action For anyone interested in an introduction to sociology **The Endtime Family** William Sims Bainbridge, 2012-02-01 This groundbreaking analysis of the controversial religious group The Family or The Children of God uses interviews observational techniques and a comprehensive questionnaire completed by more than a thousand Family members William Sims Bainbridge explores how Family members infuse spirituality with sexuality channel messages that they believe emanate from beyond life and await the final Endtime He also examines attempts by anti cultists and the state to deprogram members of the group including children by forcibly seizing them The book s blending of theoretical analysis with vivid accounts of this remarkable counterculture poses a fascinating question for social scientists and society how is it that The Children of God both differ from the general public and in other ways are so surprisingly similar to it *Handbook of Entrepreneurial Dynamics* William B Gartner, Kelly G. Shaver, Nancy M Carter, Paul D Reynolds, 2004-06-21 This important Handbook of Entrepreneurial Dynamics reports on the Panel Study of Entrepreneurial Dynamics PSED the most comprehensive scientifically representative study to date of nascent entrepreneurs The book is unique because the study identified individuals in the process of creating new businesses to understand how at its very source people move from considering the option of starting a new business to its actual founding This has never been done before in the history of entrepreneurship research I cannot recommend this book more strongly to entrepreneurship scholars and those interested in where

entrepreneurs come from and how they move from their initial idea to new venture founding Claudia Bird Schoonhoven University of California Irvine This Handbook makes a terrific contribution to understanding entrepreneurship and new business creation Its 38 chapters report major findings from the Panel Study of Entrepreneurial Dynamics PSED an unprecedented research program involving more than a hundred researchers from 10 countries This Handbook is must reading for anyone interested in entrepreneurship research Andrew H Van de Ven Carlson School of Management University of Minnesota Entrepreneurial activity provides profound positive benefits across an important set of measures of social and economic well being much of it concentrated in new economic sectors such as information technology Yet even though entrepreneurship has been shown to provide many benefits it is surprising that there has not been a systematic study of the entrepreneurial process The Handbook of Entrepreneurial Dynamics The Process of Business Creation fills this gap by offering theories ideas and measures that can be used to explore and understand the factors that encompass and influence the creation of new businesses The chapters in the handbook provide the rationale for questionnaires used in the Panel Study of Entrepreneurial Dynamics PSED The PSED is a research program that was initiated to provide systematic reliable and generalizable data on important features of the new business creation process The PSED includes information on the proportion and characteristics of the adult population involved in efforts to start businesses the activities and characteristics that comprise the nature of the business start up process and the proportion and characteristics of those business start up efforts that actually become new businesses The handbook also describes the PSED data collection process provides documentation of the interview schedules codebooks data preparation and weighting scheme as well as offers examples of how analyses of PSED data might be conducted The authors identify specific measures that can be used to operationalize theory as well as provide evidence from the PSED data sets on these measures reliability and validity The Handbook of Entrepreneurial Dynamics is ideal for a sizeable audience including graduate students academics and librarians in schools of business and management who need a comprehensive reference on business creation In addition researchers and policy makers at the federal state and local level will find this an invaluable reference covering all of the factors involved in new venture formation Key Features Considers categories of data not available prior to the PSED Includes a comprehensive overview of theories about new business formation Provides demographics of nascent entrepreneurs Analyzes the cognitive characteristics of nascent entrepreneurs Explores all of the processes of new business formation

The International Journal of Aging & Human Development ,2003 **Language Development Over the Lifespan** Kees de Bot,Robert W. Schrauf,2010-05-26 Language Development Over the Lifespan is a reference resource for those conducting research on language development and the aging process as well as a supplementary textbook for courses in applied linguistics bilingualism programs that focus on language attrition aging and adult literacy development in second languages It offers an integrative approach to language development that examines changes in language over a lifetime organized by different

theoretical perspectives which are presented by well known international scholars **Social Capital** Rene Dubos, 2017-07-12 Leading scholars in the field of social networks from diverse disciplines present the first systematic and comprehensive collection of current theories and empirical research on the informal connections that individuals have for support help and information from other people Expanding on concepts originally formulated by Pierre Bourdieu and James Coleman this seminal work will find an essential place with educators and students in the fields of social networks rational choice theory institutions and the socioeconomics of poverty labor markets social psychology and race The volume is divided into three parts The first segment clarifies social capital as a concept and explores its theoretical and operational bases Additional segments provide brief accounts that place the development of social capital in the context of the family of capital theorists and identify some critical but controversial perspectives and statements regarding social capital in the literature The editors then make the argument for the network perspective why and how such a perspective can clarify controversies and advance our understanding of a whole range of instrumental and expressive outcomes Social Capital further provides a forum for ongoing research programs initiated by social scientists working at the crossroads of formal theory and new methods These scholars and programs share certain understandings and approaches in their analyses of social capital They argue that social networks are the foundation of social capital Social networks simultaneously capture individuals and social structure thus serving as a vital conceptual link between actions and structural constraints between micro and macro level analyses and between relational and collective dynamic processes They are further cognizant of the dual significance of the structural features of the social networks and the resources embedded in the networks as defining elements of social c

Advances in Group Processes Shane R. Thye, Edward J. Lawler, 2013-10-08 This volume marks the 30th anniversary of the Advances in Group Processes Series Publishing theoretical analyses reviews and theory based empirical chapters on group phenomena The series adopts a broad conception of group processes *Doing Engineering* Joyce Tang, 1999 The first to systematically compare Caucasians African Americans and Asian Americans in engineering this study of the career attainment and mobility of engineers in the United States tells how these three groups fare in the American engineering labor market and what they can look forward to in the future The numbers of black and Asian engineers recently have grown at a much faster rate than the number of Caucasian engineers With a projected steady increase in engineering jobs and demographic shifts this trend should continue Yet recent writings on the engineering profession have said little about career mobility beyond graduation This book identifies and explores key issues determining whether minorities in the US will attain occupational equality with their Caucasian counterparts Highlighting implications for theory policy making and the future of the profession *Doing Engineering* offers important insights into labor race and ethnicity that will be of interest to anyone studying stratification in a wide range of professional occupations **Handbook of Longitudinal Research** Scott Menard, 2007-10-11 Longitudinal research is a broad field in which substantial advances have been made over the past

decade Unlike many of the existing books that only address the analysis of information The Handbook of Longitudinal Research covers design and measurement as well as the data analysis Designed for use by a wide ranging audience this Handbook not only includes perspective on the methodological and data analysis problems in longitudinal research but it also includes contributors data sets that enable readers who lack sophisticated statistics skills to move from theories about longitudinal data into practice As the comprehensive reference this Handbook has no direct competition as most books in this subject area are more narrowly specialized and are pitched at a high mathematical level Contributors and subject areas are interdisciplinary to reach the broadest possible audience i e psychology epidemiology and economics research fields

Summary material will be included for less sophisticated readers Extensive coverage is provided of traditional advanced topics
