**General Dynamics F-16 Fighting Falcon** Philip J. R. Moyes, 1981      **F-16 Fighting Falcon** Bertie Simonds, 2021-11-15 Sleek futuristic and deadly the General Dynamics F 16 Fighting Falcon was born from the crucible of the air war over Vietnam and the need for cheaper simpler and more maneuverable fighter aircraft with which to combat the many thousands of Soviet bloc supplied aircraft sold around the world Back in the early 1970s the F 16 was the pinnacle of modern design integrating a powerful turbofan engine unrivaled maneuverability thanks to its relaxed static stability and fly by wire system with computer control not to mention astounding value for money for air forces around the globe Today s F 16 Viper is light years away from the simple lightweight point defense fighter first envisaged but it has evolved and matured into the finest and most exported fourth generation combat aircraft around the world Many would argue that the latest variants offer a real world capability and value for money that makes it a wiser choice than its logical successor the Lockheed Martin F 35 Lightning II Whatever the future holds for the Lockheed Martin F 16 Fighting Falcon it has already entered the annals of aviation history but the beauty is that this versatile machine doubtless has more pages yet to write The Viper story is far from over

its amazing history While most of the military aircraft types no longer grace the airspace over California many can be viewed in their former splendor as they stand as gate guards or museum exhibits This booklet provides a comprehensive guide to where these restored aircraft can be found Complementing the details concerning aircraft specifications and roles the author has included many facts Finally the descriptions of the recovery restoration and preservation efforts stand as a tribute to the many volunteers who have devoted time energy and financial support to ensure this rich heritage is preserved **F-16**
