with them On the 13th we were near Porto Leguro whence some of the natives came out to meet us on bark logs while others made fires as if to welcome us on the tops of hills and rocks near the sea all seemingly rejoiced to see us those on shore running up and down to each other and those on the bark logs paddling with all their strength to meet us We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience

Robert Kerr, a Scottish publisher and novelist, compiled the multi-volume book *A General History and Collection of Voyages and Travels* Volume 12 of the series published in 1824. It details the trips and adventures of the English sailor William Dampier. Dampier, who lived in the late 17th and early 18th centuries, was a daring wanderer. He made many observations and discoveries while traveling around the globe and to the South Seas on several occasions. Due to the popularity and importance of his travel journals, he is recognized as one of the most important English explorers of his day. In volume 12 of *A General History and Collection of Voyages and Travels*, Kerr collects Dampier's writings on his voyages, including his observations of the flora, animals, and people he encountered, as well as his descriptions of the places he visited. The book also includes maps and illustrations to help readers visualize the places and occasions that Dampier discusses. Academics in history, anthropology, geography, and other fields will find the *General History and Collection of Voyages and Travels* to be a valuable resource since it provides a detailed insight into the adventures and observations of some of the most important explorers of the 17th and 18th centuries. [A General History and Collection of Voyages and Travels - Volume 03](#) Robert Kerr, 2018-06-28. *A General History and Collection of Voyages and Travels* Volume 03 by Robert Kerr. The whole of this chapter contains an original record, being a distinct narrative of the discovery of America by COLUMBUS, written by his own son, who accompanied him in his latter voyages. It has been adopted into the present work from the *Collection of Voyages and Travels* published at London in 1704 by Awnsham and John Churchill in four volumes folio, in which it is said to have been translated from the original Italian of Don Ferdinand Columbus expressly for the use of that work. The language of that translation is often obscure and ungrammatical, as if the work of a foreigner, but having no access to the original, has necessarily been adopted for the present occasion after being carefully revised and corrected. No farther alteration has been taken with that version except a new division into sections instead of the prolix and needlessly minute subdivision of the original translation into a multitude of chapters, which change was necessary to accommodate this interesting original document to our plan of arrangement, and except in a few rare instances where uninteresting controversial argumentations have been somewhat abridged, and even these chiefly because the original translator left the sense obscure or unintelligible from ignorance of the language or of the subject. We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public. The aim of our publishing program is to
