General Principles Of Human Power:

General Principles of Human Power A. van Ginkel, 1999-06-30 Though power is commonly seen as a special feature of exceptional personalities van Ginkel argues that power is actually a given feature of all humans animals and plants Each has different power of a special kind and a special degree All plant animal and human power is sparked and specified by a fusion of varieties of the same four general elements Faculty Object Effect and Limit Unlike animal power human power rises and falls irregularly both in history and in individual life Van Ginkel s straight logical analysis asserts that a human individual is at any given moment either a dependent impulse driven agent whose pursuits cause his given power to fall or an independent design driven agent whose operations cause his given power to rise The difference between the two is sometimes slight sometimes dramatic In the near future all human power may be reduced to zero by such man made perils as environment devastation self dementing addictions or mass destructive weapons unless educational and governmental power expand on an unprecedented scale Human power is unlimited as long as it expands within a philosophically or theologically defined limit

Pennsylvania Benjamin Rush, 1777 *The Making of an African Christian Ethics* Wilson Muoha Maina, 2016-07-13 An exploration of the development of a contextualized Roman Catholic moral theology in an African context is warranted in our day This book is a study of the work of Benezet Bujo an African moral theologian An analysis of Bujo s work shows the various aspects of an African Catholic moral theology Bujo s work is viewed here as critically bridging African moral theology

and the development of moral theology in the Catholic Church especially in the West An African moral theology in this work builds on the elements of the renewal of moral theology after the Second Vatican Council The renewal elements reflected in Bujo s work and other African Catholic theologians include among others the use of Scripture the relevance of history the debate on moral norms the relevance of social sciences to moral discourse the theory of natural moral law and the relation between the theologian and the magisterium This work therefore locates the theology of Bujo in the development of moral theology after the Second Vatican Council The author establishes a relation between African traditional religions African history Christology natural moral law moral autonomy debate the encyclical Veritatis Splendor and political liberation theological ethics The Scientific Basis of National Progress G. Gore,2020-07-31 Reproduction of the original The Scientific Basis of National Progress by G Gore **The Eclectic Review** Samuel Greatheed,Daniel Parken,Theophilus Williams,Josiah Conder,Thomas Price,Jonathan Edwards Ryland,Edwin Paxton Hood,1820 **Ruling the World?** , *The Political Theory of the Schoolmen and Grotius* John Martin Littlejohn,1895 **Spinoza's Geometry of Power** Valtteri Viljanen,2011-09-29 This work examines the unique way in which Benedict de Spinoza 1632 77 combines two significant philosophical principles that real existence requires causal power and that geometrical objects display exceptionally clearly how things have properties in virtue of their essences Valtteri Viljanen argues that underlying Spinoza s psychology and ethics is a compelling metaphysical theory according to which each and every genuine thing is an entity of power endowed with an internal structure akin to that of geometrical objects This allows Spinoza to offer a theory of existence and of action human and non human alike as dynamic striving that takes place with the same kind of necessity and intelligibility that pertain to geometry Viljanen s fresh and original study will interest a wide range of readers in Spinoza studies and early modern philosophy more generally School and Home Education ,1883 Dalhuisen on Transnational Comparative, Commercial, Financial and Trade Law Volume 1 Jan H Dalhuisen,2019-07-25 This is the seventh edition of the leading work on transnational and comparative commercial financial and trade law covering a wide range of complex topics in the modern law of international commerce and finance As a guide for students and practitioners it has proven to be unrivalled The work is divided into three volumes each of which can be used independently or as part of the complete work Volume 1 in the first chapter covers the roots and foundations of private law the different origins structure and orientation of civil and common law the forces behind the emergence of a new transnational commercial and financial legal order its meaning concepts and operation the theoretical basis of the transnationalisation of the law in the professional sphere in that order its methodology and the autonomous sources of the new law merchant or modern lex mercatoria its international finance driven impulses and its relationship to domestic and transnational public policy and public order requirements The second chapter covers the transnationalisation of dispute resolution in that order especially international arbitration and contains a critical analysis of the main challenges to its success continuing credibility and effectiveness All three volumes may be purchased separately or

Islam as Power Bianka Speidl,2020-12-03 Providing an in depth and extensive analysis of the concept of power as articulated by Muhammad Husayn Fadlallah 1935 2010 this case study analyses the systemic conceptualisation of power and his argumentation of sacralising Islamised power The volume also offers a quick overview of how the concept was understood and articulated by other Shi'ite jurists such as Ayatollah Khomeini Examining Fadlallah's oeuvre in particular his seminal book *Islam and the Logic of Power* al-Islam wa mantiq al-quwwa this book focuses on the narrative itself which played a central role in the radical transformation that occurred in the Shi'ite concept of empowerment and its recognition as a necessity The analysis of Fadlallah's conceptualisation and argumentation illustrates the mechanism of sacralising righteous power as well as the means of gaining it Fadlallah reinterpreted Shi'ism as a project of empowerment to initiate and sustain an impulse of power amongst the Lebanese Shi'ites in the most critical moment of modern Lebanese history Dealing with the concept of power in Shi'ite political thought from a theoretical perspective the study has an innovative approach that offers an insight into how the transformative narrative is constructed and what makes it convincing Shedding light on the content and logical structure of Fadlallah's argumentation this volume will be of interest to scholars and students researching contemporary politics Islam and the Middle East **Proceedings of the American Philosophical Society Held at Philadelphia for Promoting Useful Knowledge** American Philosophical Society,1895 Meaning and Use A. Margalit,2007-11-14 The second Jerusalem Philosophical Encounter was held in Jerusalem on April 25 28 1976 The

symposium was originally planned to celebrate the 60th birthday of Yehoshua Bar Hillel philosopher and friend But his sudden death intervened and turned celebration into commemoration The topic of the symposium was *Meaning and Use* For Bar Hillel the question meaning or use was of great importance one which he took as a question of priorities Which approach to natural language is prior the formal semantical approach which accords a central position to the truth functional concept of meaning and to the theory of reference or rather the alternative approach which accords the central position to linguistic communication and prefers dealing with speech acts to dealing with Statements Bar Hillel's answer to this question in his later years can be summed up by our title meaning and use neither approach deserves priority each is equally necessary and they both complement each other Those familiar with Bar Hillel's uncompromising intellectual honesty would know that this answer does not reflect a superficial wish for domestic peace but stems rather from deep and informed convictions The issues of meaning and use dominated Bar Hillel's intellectual life At the same time his day to day existence was guided by the idea that the meaning of life is to be found in being useful particularly in being useful to the community of seekers of knowledge Eco Targets, Goal Functions, and Orientors Felix Müller,Maren Leupelt,2012-12-06 This volume comprises the proceedings of the International Workshop on Ecological Goal Functions held at the Schleswig Holstein Cultural Center of Salzgitter August 30 September 4 1996 The conference first in a series intended to be convened at Salzgitter at 1 2 year

intervals to address various aspects of theoretical and application oriented ecology was initiated organized and carried out under the auspices of the Ecology Center of the Kiel University It featured key note addresses invited lectures submitted papers and posters 32 contributions written by authors from eight countries were selected to be presented in this book From the very rich discussions of the workshop some general characteristics emerged which might become important for a deeper understanding of the nature of evolving systems or in other words systems with a history described by variables with a high degree of interdependence These characteristics include the following Speaking of goal functions is a convenient *fa on de parler* since a logical analysis of the formal structure of teleological and causal explanations shows that both are analogous with regard to the inherent structural typology and the basic mode of explanation Teleological interpretations introduce motives or objectives of actors into the set of antecedens conditions relevant for system evolution and are consequently a subset of causal interpretations
