General Theory Of Crime:

An Analysis of Michael R. Gottfredson and Travis Hirschi's A General Theory of Crime William

Jenkins, 2017-07-05 Michael R Gottfredson and Travis Hirschi's 1990 A General Theory of Crime is a classic text that helped reshape the discipline of criminology. It is also a testament to the powers of clear reasoning and interpretation. In critical thinking terms, reasoning is all about presenting a solid and persuasive case, and as many people instinctively understand, the most persuasive reasoning is that which bases itself on a single, simple hook. In Gottfredson and Hirschi's case, this hook was what has come to be known as the self-control theory of crime: the idea that the tendency to commit crime is directly related to an individual's level of self-control. While the dominant schools of thought of the time tended to focus on crime as the product of complex environmental factors with little attempt to unify different theories, Gottfredson and Hirschi sought to interpret things so as to provide a single overarching concept that explained why crimes of all sorts were committed. Moreover, while other theories of crime concentrated on understanding and explaining specific types of law-breaking, the self-control model could, in Gottfredson and Hirschi's view, be seen as the basis for understanding the root cause for all crime in all contexts. While such simplicity inevitably attracted as much criticism as agreement, subsequent studies have provided real-world corroboration for the General Theory's persuasive reasoning. A General Theory of Crime Michael R.

Gottfredson, Travis Hirschi, 1990. By articulating a general theory of crime and related behavior, the authors present a new and comprehensive statement of what the criminological enterprise should be about. They argue that prevalent academic criminology, whether sociological, psychological, biological, or economic, has been unable to provide believable explanations of criminal behavior. The long-discarded classical tradition in criminology was based on choice and free will and saw crime as the natural consequence of unrestrained human tendencies to seek pleasure and to avoid pain. It concerned itself with the nature of crime and paid little attention to the criminal. The scientific or disciplinary tradition is based on causation and determinism and has dominated twentieth-century criminology. It concerns itself with the nature of the criminal and pays little attention to the crime itself. Though the two traditions are considered incompatible, this book brings classical and modern criminology together by requiring that their conceptions be consistent with each other and with the results of research. The authors explore the essential nature of crime, finding that scientific and popular conceptions of crime are misleading, and they assess the truth of disciplinary claims about crime, concluding that such claims are contrary to the nature of crime and, interestingly enough, to the data produced by the disciplines themselves. They then put forward their own theory of crime, which asserts that the essential element of criminality is the absence of self-control. Persons with high self-control consider the long-term consequences of their behavior; those with low self-control do not. Such control is learned, usually early in life, and once learned is highly resistant to change. In the remainder of the book, the authors apply their theory to the persistent problems of criminology: Why are men, adolescents, and minorities more likely than their counterparts to

commit criminal acts What is the role of the school in the causation of delinquency To what extent could crime be reduced by providing meaningful work Why do some societies have much lower crime rates than others Does white collar crime require its own theory Is there such a thing as organized crime In all cases the theory forces fundamental reconsideration of the conventional wisdom of academicians and criminal justice practitioners The authors conclude by exploring the implications of the theory for the future study and control of crime

Control Theories of Crime and Delinquency Chester L.

Britt, Michael R. Gottfredson, 2011-12-31 For the past twenty to thirty years control theories of crime have been at the center of theoretical development in criminology Key to the control theory perspective is the notion that crime is an inherently individual act and its explanation requires that we focus on the characteristics of individuals who commit crimes Consequently control theory focuses on such issues as self control and social control The contributions to this volume explicate and extend the application of control theory It is divided into three general areas Part 1 focuses on key assumptions and components of control theories Contributors discuss the notion of learning or socialization in the context of control theory and the effects that families peers and the criminal justice system have on self control social ties and criminal behavior Part 2 applies control theory to areas typically assumed to be out of the domain of self control theory and social control theory such as gender differences in crime domestic violence and group crime Considering control theory's emphasis on explaining individual criminal acts these chapters suggest an interesting area of development by highlighting the possibility that differences in crime across or within groups may begin with individual characteristics and then making inferences about groups and group processes Part 3 approaches the explanation of crime cross nationally and at the macro level Although the authors take different approaches they all illustrate that a theory of crime does not require culture specific elements in order to be a valid cross cultural explanation Contributors to this volume include Robert Agnew Todd Armstrong Leana Allen Bouffard Augustine Brannigan Chester Britt Barbara Costello Maja Dekovic Matt DeLisi Michael Gottfredson Henriette Haas Kelly H Hardwick Travis Hirschi Marianne Junger Martin Killias Helen Mederer Kevin Thompson and Alexander Vazsonyi
