Generating Social Stratification Toward A New Research Agenda:

Generating Social Stratification Alan C Kerckhoff, 2018-03-05 In this book some of the leading stratification scholars in the U S present empirical and theoretical essays about the institutional contexts that shape careers Building on recent advances in theory data and analytic technique the essays in this volume work toward the goal of identifying and assessing the processes by which a birth cohort is distributed in the stratification system given their positions of origin in that system Alan Kerckhoff s introduction situates the studies in this volume within the context of previous stratification research over several generations making the book an invaluable resource for scholars and graduate students *Generating Social*

Stratification Alan C Kerckhoff, 1999-10-22 In this book some of the leading stratification scholars in the U S present empirical and theoretical essays about the institutional contexts that shape careers Building on recent advances in theory data and analytic technique the essays in this volume work toward the goal of identifying and assessing the processes by which a birth cohort is distributed in the stratification system given their positions of origin in that system Alan Kerckhoff s introduction situates the studies in this volume within the context of previous stratification research over several generations making the book an invaluable resource for scholars and graduate students **Guide to Writing Empirical Papers,**

Theses, and Dissertations G. Inequality Doris R Entwisle, 2018-03-05 Educational sociologists have paid relatively little attention to children in middle childhood ages 6 to 12 whereas developmental psychologists have emphasized factors internal to the child much more than the social contexts in explaining children s development *Children Schools and Inequality* redresses that imbalance It examines elementary school outcomes e g test scores grades retention rates in light of the socioeconomic variation in schools and neighborhoods the organizational patterns across elementary schools and the ways in which family structure intersects with children s school performance Adding data from the Baltimore Beginning School Study to information culled from the fields of sociology child development and education this book suggests why the gap between the school achievement of poor children and those who are better off has been so difficult to close Doris Entwistle Karl Alexander and Linda Olson show why the first grade transition how children negotiate entry into full time schooling is a crucial period They also show that events over that time have repercussions that echo throughout children s entire school careers Currently the only study of this life transition to cover a comprehensive sample and to suggest straightforward remedies for urban schools *Children Schools and Inequality* can inform educators practitioners and policymakers as well as researchers in the sociology of education and child development **Barriers to Inclusion** Justin J. W. Powell, 2015-12-03 *Barriers to Inclusion* offers a comparative and

historical account of the rise of special education over the twentieth century in the United States and Germany This

institutional analysis demonstrates how categorical boundaries professional groups social movements and education and social policies shaped the schooling of children and youth with disabilities It traces the evolution of special education classification explores growing special education organizations and examines students learning opportunities and educational attainments Highlighting cross national differences over time the author also investigates demographic and geographic variability within the federal democracies especially in segregation and inclusion rates of disabled and disadvantaged children Germany s elaborate system of segregated special school types contrasts with diverse American special education classrooms mainly within regular schools Joining historical case studies with empirical indicators this book reveals persistent barriers to school integration as well as factors that facilitate inclusive education reform in both societies

The Long Shadow Karl Alexander, Doris Entwisle, Linda Olson, 2014-05-31 A volume in the American Sociological Association s Rose Series in Sociology West Baltimore stands out in the popular imagination as the quintessential inner city gritty run down and marred by drugs and gang violence Indeed with the collapse of manufacturing jobs in the 1970s the area experienced a rapid onset of poverty and high unemployment with few public resources available to alleviate economic distress But in stark contrast to the image of a perpetual urban underclass depicted in television by shows like *The Wire* sociologists Karl Alexander Doris Entwisle and Linda Olson present a more nuanced portrait of Baltimore s inner city residents that employs important new research on the significance of early life opportunities available to low income populations *The Long Shadow* focuses on children who grew up in west Baltimore neighborhoods and others like them throughout the city tracing how their early lives in the inner city have affected their long term well being Although research for this book was conducted in Baltimore that city s struggles with deindustrialization white flight and concentrated poverty were characteristic of most East Coast and Midwest manufacturing cities The experience of Baltimore s children who came of age during this era is mirrored in the experiences of urban children across the nation For 25 years the authors of *The Long Shadow* tracked the life progress of a group of almost 800 predominantly low income Baltimore school children through the Beginning School Study Youth Panel BSSYP The study monitored the children s transitions to young adulthood with special attention to how opportunities available to them as early as first grade shaped their socioeconomic status as adults The authors fine grained analysis confirms that the children who lived in more cohesive neighborhoods had stronger families and attended better schools tended to maintain a higher economic status later in life As young adults they held higher income jobs and had achieved more personal milestones such as marriage than their lower status counterparts Differences in race and gender further stratified life opportunities for the Baltimore children As one of the first studies to closely examine the outcomes of inner city whites in addition to African Americans data from the BSSYP shows that by adulthood white men of lower status family background despite attaining less education on average were more likely to be employed than any other group in part due to family connections and long standing racial biases in Baltimore s industrial economy Gender imbalances

were also evident the women who were more likely to be working in low wage service and clerical jobs earned less than men African American women were doubly disadvantaged insofar as they were less likely to be in a stable relationship than white women and therefore less likely to benefit from a second income Combining original interviews with Baltimore families teachers and other community members with the empirical data gathered from the authors groundbreaking research The Long Shadow unravels the complex connections between socioeconomic origins and socioeconomic destinations to reveal a startling and much needed examination of who succeeds and why *Handbook of Children and Youth Studies* Johanna Wyn, Helen Cahill, Hernán Cuervo, 2024-08-20 This second edition of the handbook gives a new scientific perspective to youth and childhood studies as multi scientific and interdisciplinary subjects which as such have not yet found their own framing in a particular discipline It provides theoretical and methodological key debates and issues that develop and add an understanding of childhood and youth research discipline from a broader perspective The Handbook on Children and Youth Studies draws on current thinking but also challenges theoretical and conceptual orthodoxies in the field drawing on interdisciplinary thinking and critical perspectives It focuses on childhood and youth to address the emerging consensus that the boundaries between childhood youth and adulthood are blurred The view that defining youth and childhood largely in terms of problem topics is out dated Instead the handbook focuses on 16 themes that are open to international perspectives and to different conceptual approaches Each theme is edited by a pair of field editors thereby capturing a plurality of views The 16 themes as a starting point are globally timely and they need scientific debates on the boundaries between childhoods youth and adulthood This handbook will meet the needs of childhood and youth researchers and the academics in the field It recognizes the changing social context of the lives of children and young people while developing theoretical frameworks and discussing about the core substantive issues of Children and Youth Studies **Resources in Education** ,1997 **Schools and Society** Jeanne H. Ballantine, Joan Z. Spade, 2008 Presents the most recent theories research terms concepts ideas and histories on educational leadership and school administration as taught in preparation programs and practiced in schools and colleges today **Constructing Adulthood** Ross Macmillan, 2006-11-21 Advances in Life Course Research publishes original theoretical analyses integrative reviews policy analyses and position papers and theory based empirical papers on issues involving all aspects of the human life course Adopting a broad conception of the life course it invites and welcomes contributions from all disciplines and fields of study interested in understanding describing and predicting the antecedents of and consequences for the course that human lives take from birth to death within and across time and cultures regardless of methodology theoretical orientation or disciplinary affiliation Each volume is organized around a unifying theme

Professionalism Eliot Freidson, 2013-07-10 Eliot Freidson has written the first systematic account of professionalism as a method of organizing work In ideal typical professionalism specialized workers control their own work while in the free market consumers are in command and in bureaucracy managers dominate Freidson shows how each method has its own

logic requiring different kinds of knowledge organization career education and ideology He also discusses how historic and national variations in state policy professional organization and forms of practice influence the strength of professionalism In appraising the embattled position of professions today Freidson concludes that ideologically inspired attacks pose less danger to professionals institutional privileges than to their ethical independence to resist use of their specialized knowledge to maximize profit and efficiency without also providing its benefits to all in need This timely and original analysis will be of great interest to those in sociology political science history business studies and the various professions **After the Bell**

Karen Albright,Dalton Conley,2004-01-29 Since the publication of the Coleman report in the US many decades ago it has been widely accepted that the evidence that schools are marginal in the grand scheme of academic achievement is conclusive Despite this educational policy across the world remains focused almost exclusively on schools With contributions from such figures as Jeanne Broo **The Making of Singapore Sociology** Tong Chee-Kiong,Lian Kwen-Fee,2021-11-08 This book

presents a collection of essays of how the city state of Singapore s societal dynamics have evolved from the time of its birth as a nation in 1965 to the present Key areas of Singapore society are explored contributing to the understanding of the social organisation of the city This study reveals a shift from the modernisation studies in the 1970s to a more political economic turn as a consequence of the influence of dependency and world systems theories Topics covered include urban studies family education medical care class and social stratification work language ethnic groups religion and crime and deviance

Work Values of Indian School Children Arun Kumar Tiwari,2014-01-01 The book analyses the findings of the study to develop points that have great policy implications It is argued that since our present elementary schooling is lacking in this objective therefore attempts are needed to make necessary transformation in it in order to equip it with the capability to inculcate adequate work values among the students Eventually the good work habits and work values among the children would be helpful in combating another problem also that is the problem of obesity which is alarmingly increasing in our children *Safe to be Smart* Anne Wheelock,1998 Japan and Global Migration Mike Douglass,Glenda

Roberts,2015-04-22 This book contains the most up to date original data on Japanese migrant culture available Its inescapable conclusion is that the multicultural age has finally come to Japan *Creativity in Chinese Contexts* Chau-kiu Cheung,Xiaodong Yue,2019-08-28 Examining creativity in Chinese societies from both a personal and contextual standpoint this ground breaking book offers readers a unique insight into the Chinese mind It provides a review of the nature origins and consequences of creativity deriving from empirical evidence in the Chinese context Specifically the book unravels the conceptualization of creativity and its relationships with various demographic and dispositional factors in Chinese societies The book proceeds to give readers an understanding of how creativity maintains reciprocal relationships with various forms of well being The content of the book brings together empirical evidence and theory grounded on Chinese societies to offer researchers and students a unique realistic view of the nature of creativity there This book will be a must read for any

researcher or practitioner interested in this fascinating topic **Handbook of Education Policy Research** Gary Sykes, Barbara Schneider, David N. Plank, 2012-09-10 Co published by Routledge for the American Educational Research Association AERA Educational policy continues to be of major concern Policy debates about economic growth and national competitiveness for example commonly focus on the importance of human capital and a highly educated workforce Defining the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this comprehensive AERA sponsored Handbook Organized into seven sections the Handbook focuses on 1 disciplinary foundations of educational policy 2 methodological perspectives 3 the policy process 4 resources management and organization 5 teaching and learning policy 6 actors and institutions and 7 education access and differentiation Drawing from multiple disciplines the Handbook s over one hundred authors address three central questions What policy issues and questions have oriented current policy research What research strategies and methods have proven most fruitful And what issues questions and methods will drive future policy research Topics such as early childhood education school choice access to higher education teacher accountability and testing and measurement cut across the 63 chapters in the volume The politics surrounding these and other issues are objectively analyzed by authors and commentators Each of the seven sections concludes with two commentaries by leading scholars in the field The first considers the current state of policy design and the second addresses the current state of policy research This book is appropriate for scholars and graduate students working in the field of education policy and for the growing number of academic government and think tank researchers engaged in policy research For more information on the American Educational Research Association please visit <http://www.aera.net> **A Handbook for the Study of Mental Health** Teresa L. Scheid, Eric R. Wright, 2017-06-08 The third edition of A Handbook for the Study of Mental Health presents a comprehensive review of the sociology of mental health Age And Inequality Angela O'rand, John C Henretta, 2018-03-09 In the United States older populations exhibit the highest levels of economic inequality of all age groups Across all advanced societies the inequalities observed in older populations stem from structural and individual processes that differentiate the life courses of women and men and yield distinctive patterns of economic inequality in adulthood and old age
