Generating Prose Relations Patterns Structures:

Generating Prose Willis L. Pitkin, 1987-01-01 **Beyond Outlining** Betty Cain, 1992 This book is a unique long needed comprehensive study of whole discourse form going beyond traditional prescriptions Ancient and contemporary innovations are combined with a new theory and practical application The author rescues the organization of persuasive explanatory prose from long neglect and unimaginative traditional formulas She demonstrates a new theory of form fluency in analyses of student texts and applies it in new form heuristics that go beyond outlining The main audience for this book will be professors and graduate students in the growing discipline of rhetoric composition or any teacher or writer interested in new ideas about organizing discourse **WPA, Writing Program Administration** ,1986 **Object-Oriented System Development and Design** Mr. Rohit Manglik, 2024-03-14 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels Object-Oriented Analysis and System Engineering Mr. Rohit Manglik, 2024-03-02 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels *Text Generation* Kathleen McKeown, 1992-06-26 Kathleen McKeown explores natural language text and presents a formal analysis of problems in a computer program TEXT **South Atlantic Review** ,1986 **How to create an early German scriptus** Katerina Somers, 2024-10-11 This book presents a new methodology for the study of historical varieties particularly a language s early history Using the German language s first attestations as a case study it offers an alternative to structuralist approaches to historical syntax with their emphasis on delineating the shapes and mechanisms of early grammars This focus has prompted Germanists to treat the data from the eighth and ninth century corpus with suspicion in that its texts are either poetic or translational That is if the unquestioned object of inquiry is a historical cognitive grammar one ought to isolate and perhaps discount entirely data that are the product of confounding factors like a poetic meter or a Latin source text Otherwise these competence obscuring examples risk undermining scholars understanding of a genuine early German grammar Rather than this deficit approach the current volume proposes that scholars treat each early attestation as an artifact of literization the process through which people transform their exclusively oral varieties into a written variety Each historical text features a scriptus that is an ad hoc idiosyncratic and localized literization created by a person or team of people for a particular purpose The challenge of understanding texts in this way lies in the fact that there is little to no direct evidence pointing to the specific identities of early medieval literizers their motivations and the nature of the multiple spoken competencies that fed into their scripti In order to conceptualize early medieval German and the syntactic variation it

exhibits as a sociolinguistic phenomenon this book details the linguistic resources that were available to the literizer and are happily accessible to the modern researcher First there is Latin Though illiterate in their own multilectal vernacular in the sense that no German scriptus existed until they developed it literizers were educated in this highly literized language and the classical metalinguistic discourse known as grammatica that was associated with it Second there are the linguistic patterns of elaborated orality that is the varieties that are characteristic of public life and the oral tradition in exclusively oral communities Though the patterns of a peculiarly German elaborated orality are lost to history those of other traditions and cultures are attested and should also inform how scholars conceive of a multilectal early German **Spiraling Webs of**

Fokkelman,2023-08-14 Analysis of text structures has been a dominant feature in Biblical studies for quite some time More recently scholars have focused on rhetorical strategies that have been employed in Biblical texts In this volume rhetorical as well as structural approaches to the Hebrew Bible have been brought together It contains studies on a range of topics and on a good many texts and textual corpuses Interpretation culminates in translation The contributors to this volume have discussed the implications of their findings for Bible translators Many of these translational implications have been put together in an epilogue The volume thus not only intends to show the present state of our knowledge of literary and rhetorical techniques employed in the Bible on these points it aims to be a selective guide to translators as well The volume has been edited by Lenart de Regt Jan de Waard both of the Free University of Amsterdam and Jan Fokkelman Leiden University *The Cumulative Book Index* ,1989 A world list of books in the English language *Literary Studies in Action*

Wilson, 2011-08-18 Wilson s book proposes an associationistic form of psychological theory which is opposed to the more extreme structuralist claims It brings together a relatively novel combination of topics from psychology computational linguistics and artificial intelligence which support a viable associationistic position **Graphic Poetics** Richard Bradford, 2011-01-20 Concrete pattern or shaped poems are well documented as experimental curiosities While giving some attention to this sub genre the book shifts the focus to the ways in which visual form manifests itself in traditional verse examining poems by Milton Wordsworth Eliot Olson T E Hulme Auden

Williams Larkin and Charles Tomlinson It examines how the tactile presence of the poem on the page transcends the routine distinctions between genre and historical context emerging as a significant but largely unexamined contribution to modernist poetics The interpretative methodology is radical adapting Wollheim s twofold thesis grounded in the aesthetics of visual art to the author s own concept of the double pattern Graphic Poetics challenges the accepted protocols of reading and interpreting verse and considers how poetry is involved in a dialogue with such theoreticians as Derrida Introducing a new perspective on how poems work and on how they generate effects it shows how poets use devices previously unrecognised and unacknowledged techniques which are more commonly associated with visual arts than with literature

Discourse structure and narration: A diachronic view from Germanic Ulrike Demske, Barthe Bloom, 2025-06-20 The volume Discourse structure and narration A diachronic view from Germanic deals with questions of information structuring at discourse level focusing on narrative discourses More precisely it is about the contribution of grammatical devices to the organization of texts as well as their diagnostic potential for the narrative text type Although it is well known that information packaging had a much greater impact on the distribution of grammatical patterns in historical stages of a language than it does today so far many studies on the relationship between information structure and grammatical patterns do not go beyond the sentence level in other words they do not take into account the possible influence of the text type on the manifestation of certain grammatical patterns How and to which degree changes in grammatical patterns correlate or are affected by changes in either discourse and or narrative structure how the two layers interact with each other and affect each other and how such issues can be operationalized are still understudied This volume aims to shed more light on these issues by presenting eight papers which address these questions more or less explicitly As the research questions imply the papers all take a historical or diachronic perspective Another commonality between the studies is that they all focus on data from Germanic languages as we assume that by comparing closely related languages the relationships in question become more pronounced Specifically the languages in question are German Dutch English and Icelandic Understandably the contributions in this volume can only highlight some aspects of the complex relationship between grammar and narration s Addressing among others questions of narrative progression temporal structure reference tracking and discourse functions the contributions discuss phenomena such as temporal adverbials at the left periphery as well as later in the clause left dislocation structures fronting of the finite verb in dependent and independent clauses linguistic means to express aspectual and tense information and the distribution of nominalization patterns across text types
