The Dundurn Group The Dundurn Group, **The Tyranny of Clichés** Jonah Goldberg,2013-04-30 An indispensable and enduring field guide to the arguments the left makes and the ones it tries to avoid The Claremont Review of Books According to Jonah Goldberg if the greatest trick the devil ever pulled was convincing the world he didn t exist the greatest trick liberals ever pulled was convincing themselves they re not ideological Today objective journalists academics and moderate politicians peddle some of the most radical arguments by hiding them in homespun aphorisms Barack Obama casts himself as a disciple of reason He s a pragmatist opposed to the ideology and drama of the Right solely concerned with what

works And today s liberals follow his lead spouting countless clich s such as One man s terrorist is another man s freedom fighter Sure if the other man is an idiot Was Martin Luther King Jr a terrorist Was Bin Laden a freedom fighter Violence never solves anything Really It solved our problems with King George III and ended slavery We need complete separation of church and state In other words all expressions of faith should be barred from politics except when they support liberal programs With humor and passion Goldberg dismantles these and many other Trojan horses that liberals use to cheat in the war of ideas He shows that the Pro gressive tradition of denying an ideological agenda while pursuing it vigorously under the false flag of reasonableness is alive and well And he reveals how this dangerous game may lead us further down the path of self destruction *P11, Painters Eleven* Iris Nowell,2011 In 1953 eleven Canadian Abstract Expressionist artists banded together to break through the barricades of traditional art at a time when landscapes were about the only paintings collectors were buying Hungry for recognition raging against the art establishment that was shutting them out they decided to form a collective expecting they would gain more attention as a group than as solo artists In 1954 The Painters Eleven Jack Bush Oscar Cah n Hortense Gordon Tom Hodgson Alexandra Luke Jock Macdonald Ray Mead Kazuo Nakamura William Ronald Harold Town and Walter Yarwood held their first exhibition in Toronto Initially the public response echoed the worldwide sentiments toward Abstract Expressionism mockery and bewilderment Nevertheless the exhibition attracted wide public interest and criticism faded into acclaim from critics and collectors alike A successful 1956 exhibition at the Riverside Gallery in New York even elicited praise from the influential critic Clement Greenberg Packed with gorgeous full color reproductions this highly detailed account reveals the influences of the individual artists on the group s dynamic art and uncovers why the Painters Eleven had such a struggle for recognition and why they acheived it so masterfully **Top 40**

Brazilian Elites and their Philanthropy Jessica Sklair, 2021-11-04 This book explores the philanthropy of Brazilian elites during a key period in recent Brazilian history from Workers Party president Lula's last term in office through to the election of far right president Jair Bolsonaro Against this backdrop of political upheaval the book asks what philanthropy can reveal about the role of corporate and wealth elites in upholding the structures of socioeconomic inequality that continue to define Brazilian society The book argues that around the world the private sector's growing engagement in international development has led to the emergence of a global philanthropic project centred on practices of philanthrocapitalism and social finance which ultimately seeks to legitimise global capitalism and the elite interests it serves Drawing on an in depth and wide ranging ethnographic study among philanthropists and their advisors in over 30 Brazilian foundations and intermediary organisations the book combines a structural critique of the capitalist ideologies underlying philanthropic practice with a robust exploration into the ways in which wealthy Brazilians appropriate philanthropy directly to legitimise elite reproduction and the accumulation of wealth Researchers across Latin American studies development studies and the anthropology of development will find this book a timely contribution to the under researched areas of elite studies and the study of philanthropy

Sustainable Consumption Alistair Ulph, Dale Southerton, 2014-08-14 If global society is to address the many environmental and other sustainability challenges that confront us in the twenty first century such as climate change and water resources it will be necessary to make significant changes in our patterns of consumption

production and distribution There is a growing realization that while changes in production and distribution are formidable the proposed solutions may not succeed unless it is possible to persuade individuals and households to change their patterns of consumption to make them more sustainable However there are significant differences in how key disciplines such as psychology neuroscience economics politics sociology anthropology and history conceptualise consumption empirically test their theoretical predictions and use these to inform policy makers across the private public and third sectors on how to make consumption more sustainable This book contains chapters from world leading experts in these different disciplines that seek to explain the perspectives on sustainable consumption of their disciplines suggest how these might be further enriched by taking on board some of the findings from other disciplines and consider what this implies for new policies to address the key sustainability challenges outlined above The book is dedicated to Professor Sir Partha Dasgupta one of the world's leading economists who has worked across a range of topics including environmental and resource economics and development economics and throughout his career has sought to incorporate into his economic thinking ideas from a range of other disciplines

Principles of Behavioral Economics Peter E. Earl, 2022-07-28 This book is unique among modern contributions to behavioral economics in presenting a grand synthesis between the kind of behavioral economics popularized by Richard Thaler earlier approaches such as those of the 1978 Nobel Laureate Herbert Simon evolutionary psychology and evolutionary economics from Veblen and Marshall through to neo Schumpeterian thinking The synthesis employs a complex adaptive systems approach to how people think the lifestyles they build and how new production technologies and products are gradually adopted and produce changes Using a huge range of examples it takes behavioral economics from its recent focus on nudging consumers to the behavior of firms and other organizations the challenges of achieving structural change and transitioning to environmentally sustainable lifestyles and instability of the financial system This book will be of great interest to academics and graduate students who seek a broader view of what behavioral economics is and what it might become
