Frankel, Ernesto Stein, Shang-Jin Wei, 1997 Covers trends from 1957 to 1995 **Principles of the Organization of the Global Economic System** Sergey Dyatlov, 2016 The development of the economic system is not a spontaneous but a programmed and controlled process Economy is always a controlled system in which there is always an appropriate subject of management The article considers principles of the organization of the global economic system The characteristic of the principle of hierarchy of dominants types of economic systems in terms of order chaos unstable non equilibrium order soft evolutionary chaos rigid deterministic chaos It highlights the major institutions in the layered structure of the global economic system *Stakeholder Capitalism* Klaus Schwab, 2021-01-27 Reimagining our global economy so it becomes more sustainable and prosperous for all Our global economic system is broken But we can replace the current picture of global upheaval unsustainability and uncertainty with one of an economy that works for all people and the planet First we must eliminate rising income inequality within societies where productivity and wage growth has slowed Second we must reduce the dampening effect of monopoly market power wielded by large corporations on innovation and productivity gains And finally the short sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end The debate over the causes of the broken economy laissez faire government poorly managed globalization the rise of technology in favor of the few or yet another reason is wide open Stakeholder Capitalism A Global Economy that Works for Progress People and Planet argues convincingly that if we don't start with recognizing the true shape of our problems our current system will continue to fail us To help us see our challenges more clearly Schwab the Founder and Executive Chairman of the World Economic Forum looks for the real causes of our system's shortcomings and for solutions in best practices from around the world in

places as diverse as China Denmark Ethiopia Germany Indonesia New Zealand and Singapore And in doing so Schwab finds emerging examples of new ways of doing things that provide grounds for hope including Individual agency how countries and policies can make a difference against large external forces A clearly defined social contract agreement on shared values and goals allows government business and individuals to produce the most optimal outcomes Planning for future generations short sighted presentism harms our shared future and that of those yet to be born Better measures of economic success move beyond a myopic focus on GDP to more complete human scaled measures of societal flourishing By accurately describing our real situation Stakeholder Capitalism is able to pinpoint achievable ways to deal with our problems Chapter by chapter Professor Schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and country by country company by company and citizen by citizen glue them back together in a way that benefits us all The Soviet Union in a Changing Global Economic Setting Ivan D.
