determining the right choice On a theoretical ground the problem may be reduced to the issue of how many links of the Value Chain should be moved abroad in the process of international expansion In practical terms the choice of a market entry mode means a set of decisions taken in each particular case of a firm going international The complexity of the task involves many different areas like the amount of risk the scope of control the level of capital involvement and financial efficiency This is one of the reasons why there is no universal theory explaining the optimal way of making a successful market entry The multitude of views on this subject does not make the question easier International Marketing Klaus Backhaus,Joachim
