Laing, Luis A. Gómez, 2007      ,      **The Law and Politics of Global Competition** Christopher Townley, Mattia Guidi, Mariana Tavares, 2022-02-02 In its own words the mission of the International Competition Network the ICN is to advocate the adoption of superior standards and procedures in competition policy around the world formulate proposals for procedural and substantive convergence and seek to facilitate effective international cooperation to the benefit of member agencies consumers and economies worldwide ICN members include nearly all competition authorities NCAs from around the world over 100 of them Since its inception the ICN has also sought to enrich its discussions and outputs through the inclusion of non governmental advisors NGAs principally large multi nationals and the legal and economic professions The ICN is a transnational network set up by its members largely without wider state input This book hypothesises that the ICN s formally neutral structures provide powerful influence mechanisms for strong NCAs and NGAs over the weak and competition experts over wider state interests discussing the legitimacy of this from a political and legal theory perspective analysing the ICN s effectiveness and efficiency and suggesting ways that the ICN can improve all three This study has important implications for the ICN itself particularly as it launches its Third Decade Project billed as a full self evaluation However the story told here is also relevant to states and the wider regulatory community due to the widespread use of transnational networks      *Handbook of Merger Control and Environmental Policy* Luis Gautier, Mahelet G. Fikru, 2024-07-27 This book presents an integrated theory of firms strategies and two types of policies namely environmental policies and merger control policies It develops a framework to examine the intricate relationship between merger and acquisition M A incentives merger control policy environmental policies and firms sustainability practices The chapters highlight the importance of policy coordination to underscore the link between M A and environmental externality and the link between merger policy and environmental policy Drawing together related fields that are seldom linked in the literature this volume offers a comprehensive and authoritative reference for scholars graduate students and policymakers      **Law Books Published** , 2000      *An Institutional Assessment of Antitrust Policy* Ignacio De León, 2009-01-01 Antitrust policy nominally plays an instrumental public interest role The generally accepted notion is that it is a government instrument designed to intervene in relatively unregulated markets in order to preserve rivalry among independent buyers and sellers Competition

authorities are supposed to restrain business conduct that exercises monopoly power aimed at excluding competitors or exploiting consumers and clients. Thus it can be said although few pro market theorists make the insight explicit that antitrust provisions reveal mistrust of the capacity of markets to promote social welfare. The inner logic enforcement mechanisms and practical outcomes of antitrust provisions are all intrinsically contradictory to the natural dynamic course of market functioning. In Dr De Leon's challenging thesis this mistrust of the market lies at the root of antitrust policy giving rise always to a preference towards predicting the result of impersonal market forces rather than interpreting the entrepreneurial behaviour which creates those forces. And it is in Latin America that he finds the powerful evidence he needs to support his case. From the formative years of Latin American economic institutions during the Spanish Empire economic regulations far from being driven by the pursuit of promoting free trade and economic freedom have been conceived enacted and implemented in the context of deeply anti market public policies trade mercantilism and government dirigisme. The so called neoliberal revolution of the 1990s triggered by the Washington Consensus did not really change the interventionist innuendo of these policies but merely restated the social welfare goal to be achieved the pursuit of economic efficiency. Dr De Leon presents his case against the assumption that consumer welfare orientated policies such as antitrust do really promote entrepreneurship and market goals. Paradoxically antitrust enforcement has undermined the transparency of market institutions in the name of promoting market competition. The author's provocative analysis marshals several sets of facts in support of his thesis including the actual functioning of antitrust policy as reflected in case law in various Latin American countries the preference of merger control over other less intrusive forms of market surveillance the constrained role of competition advocacy against government acts and the ineffective institutional structure created to apply the policy. Among the many specific topics treated are the following government immunity strategic industries state owned enterprises politically influential groups measurement of market concentration the burden of proof of social welfare benefits the role of joint trade associations and professional guilds institutional arrangements that favour collusion selective distribution sector regulation erosion of property rights marginal role of courts in the antitrust system leniency programs and privatized public utilities. The growing significance of Latin America in the context of economic globalization endows this book with huge international interest. Written by a leading authority on the topic this is the first book that presents a detailed description of Latin American antitrust law and policy as it has been developed through numerous judicial opinions. A wide variety of audiences around the world will find it of extraordinary value competition law specialists scholars and students of the subject policymakers and politicians in Latin America as well as all interested lawyers jurists and economists.
