Transfer Pricing and Financing Raffaele Petruzzi,Michael Lang,2023-03-09 In recent years the interpretation and implementation of transfer pricing regulations of intra group transactions involving financing functions increased exponentially as one of the main priorities of both taxpayers and governments This topic has also attracted the attention of international organizations since 1972 whereby an extensive guidance has been rendered by the OECD in the Transfer Pricing Guidance on Financial Transactions that became Chapter X of the OECD Transfer Pricing Guidelines in February 2020 Not long after the United Nations included these topics in Chapter 9 of its Practical Manual for Developing Countries in 2021 This book s comprehensive approach to the practical application of transfer pricing rules to specific types of financing transactions ensures an in depth understanding of the taxation of these transactions between related parties Chapters contributed by renowned academics and practitioners based also on the work of international organizations elucidate the complex interaction between transfer pricing and the following types of intra group financial transactions loans financial

guarantees cash pooling hybrid financing factoring captive insurance and asset management Each contribution contains a balanced mix of theoretical understanding and practical examples including case studies and references to key case law Aware that legal certainty in this area remains unachievable despite the relevant work so far of the OECD and the UN this book aims to alleviate this deficiency with principle based and practical knowledge on transfer pricing applied to financial transactions Tax lawyers in house tax counsel tax authorities international organizations business communities advisory firms and academics will welcome this matchless overview and guide to one of the most important topics in international taxation

Guide to International Transfer Pricing Dr A. Michael Heimert,T.J. Michaelson,2018-10-26 The pricing of goods services intangible property and financial instruments within a multi divisional organization particularly in regard to cross border transactions has emerged as one of the most contentious areas of international tax law This is due in no small measure to the rise of transfer pricing regulations as governments seek to stem the flow of their tax revenue from their jurisdictions This thoroughly practical work provides guidance on an array of critical transfer pricing issues The guide s relevance is further enhanced by the inclusion of country chapters covering domestic transfer pricing issues in a variety of key national jurisdictions *Transfer Pricing and Business Restructurings* Michael Lang,Raffaele Petruzzi,2023-09-19 Transfer pricing and business restructurings issues and developments In the ever evolving global landscape the ability of businesses to swiftly adapt is crucial for maintaining relevance and competitiveness This imperative holds true for multinationals which frequently engage in strategic restructuring of their operations assets and resources to realign with the dynamic shifts in market conditions This dynamic approach enhances operational efficiency cuts costs and optimizes financial performance However the intricacies of restructuring especially in the context of transfer pricing pose considerable challenges Despite elaborate guidance from the OECD and UN transfer pricing considerations in business restructuring remain complex Determining appropriate transfer pricing methodologies finding comparable transactions and ensuring accurate documentation present hurdles for both multinationals and tax administrations This publication discusses the most important issues and recent developments related to this theme It attempts to cover various issues related to business restructuring including delineation and recognition remuneration of restructuring and post restructuring and other relevant issues such as exit taxes location savings permanent establishments and implications of COVID 19 This book is based on the outcomes of the presentations and discussions held during the WU Transfer Pricing Symposium that took place in October 2022 at the WU Vienna University of Economics and Business The authors apart from providing a theoretical background to the discussed issues also present case studies that show how those issues can be approached in practice *Tax Compliance Costs for Companies in an Enlarged European Community* Michael Lang,2008-01-01 When it comes to taxation administrative costs to the tax authorities and compliance costs to the taxpayers arise A lot of studies have already been conducted in order to shed more light on such hidden costs of taxation Particularly in the field of transfer pricing

administrative and compliance costs are assumed to be quite high due to the obligation of computing and documenting an arm's length price for each intra group transaction. Apparently European policy makers have also become aware of this problem since the European Commission's report released in 2001 'Company Taxation in the Internal Market' recommends targeted measures in the short run and comprehensive ones in the long run crossing the border line of the currently prevailing transfer pricing approach inter alia in order to combat compliance costs in the field of transfer pricing. Eighteen national reports from countries all over the world and a general report deal with the basics of administrative and compliance costs of taxation in general as well as compliance costs in the field of transfer pricing in particular. The book is completed by three special reports on certain issues. The findings of the reports included is greatly influenced by the discussions on the occasion of the Jean Monnet Conference on this topic which was held in spring 2006 in Rust Austria under the academic guidance of the Institute for Austrian and International Tax Law at the Vienna University of Economics and Business.

Administration Back cover Transfer Pricing and Value Creation Raffaele Petruzzi, Romero J.S. Tavares Esq., 2019-09-02 Value Creation and its effects on Transfer Pricing and tax law Emerging from the OECD G20 BEPS Project a new somewhat fuzzy notion of Value Creation came to permeate not only Transfer Pricing language but also wider allocation rules and anti abuse provisions in international tax law. The notion of Value Creation reframes the interpretation and application of the Arm's Length Principle (ALP) that is embedded in Articles 7 and 9 of the OECD Model Convention. This new Value Creation notion and approach assist in understanding key enterprise functions while different industry sectors manifest these concepts in various ways. Situating such notions and this approach within the law of tax treaties and analyzing terms of the OECD Transfer Pricing Guidelines alongside their factual context is the aim of this book. Here law students address Transfer Pricing and Value Creation in sectors as varied as commodities trade, automotive, consumer products, food and beverages, pharmaceutical and life sciences, telecommunications and the key topic of value creation in a digitalized economy. Our LL.M. students were required to address issues not explored in legal research and to discuss factual topics relevant for Transfer Pricing. All students focused on topics that are new to the international tax debate that keep evolving and on factual matters that often escape legal research.

International Taxation of Permanent Establishments Michael Kobetsky, 2011-09-15 The effects of the growth of multinational enterprises and globalization in the past fifty years have been profound and many multinational enterprises such as international banks now operate around the world through branches known as permanent establishments The business profits article Article 7 of the OECD model tax treaty attributes a multinational enterprise's business profits to a permanent establishment in a host country for tax purposes Michael Kobetsky analyses the principles for allocating the profits of multinational enterprises to permanent establishments under this article explains the shortcomings of the current arm's length principle for attributing business profits to permanent establishments and considers the alternative method of formula apportionment for allocating business profits

Just Security in an Undergoverned World William Durch, Joris Larik, Richard Ponzio, 2018-01-19 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of wealthier lands whose people in turn draw into themselves Humanity's very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity's future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of

individual actors It offers just security as a new framework for charing innovating solutions and strategies for effective and essential global governance
