Literature in the Age of Globalisation Stuart Taberner, 2004-11-01 Literary fiction in Germany has long been a medium for contemplation of the nation and questions of national identity From the mid 1990s in the wake of heated debates on the future direction of culture politics and society in a more normal united country German literature has become increasingly diverse and seemingly disparate at the one extreme it represents the attempt to reinvent German traditions at the other the unmistakable influence of Anglo American forms and pop literature A shared concern of almost all of recent German fiction however is the contemporary debate on globalisation its nature impact and consequences for local culture In its engagement with globalisation the literature of the Berlin Republic continues the long established practice of reflection on what it is to be German This book investigates literary responses to the phenomenon of globalisation The subject is approached from a wide range of thematic and theoretical perspectives in twelve chapters which taken together also provide an overview of German fiction from the mid 1990s to the present The book serves both as an introduction to contemporary German literature for university students of German and as a resource for scholars interested in culture and society in the Berlin Republic

Globalization and Politics Jan-Erik Lane, 2017-11-28 Globalization and Politics brings together vision and imaginative insight to the analysis of the evolution of inter state politics to produce a clear comprehensive and coherent sense of how globalization works and how it might work better The study looks upon globalization as a distinct set of phenomena energy economy environment and politics all of which interact Presenting opportunities for interdependency and governance globalization offers both dangers and promises which explains why it is equally feared and praised Globalization is an economic trend with strong spillovers and as such has become a political trend with cultural implications This volume is an invaluable highly readable new text for graduate and undergraduate courses It sets out the key challenges for globalization in the 21st century and looks at the challenges responses and risks of globalization It is required reading for analysts students and professionals who want to understand what is at stake in the globalization debate *Creating Human Rights*

Lisa S. Alfredson, 2013-03-26 Selected by Choice magazine as an Outstanding Academic Title *Creating Human Rights* offers the first systematic study of a pioneering women's refugee movement and its challenge as an international trigger case to more conventional paths toward human rights policy development Lisa S Alfredson argues that such cases which unfold in the context of a specific country and have profound impacts on international human rights efforts have been neglected in research and pose a challenge to recent theorizing on human rights change In the early 1990s Canada witnessed the emergence of the world's first comprehensive refugee policy for women who were seeking protection from female specific forms of violence rape domestic abuse public stoning of adulterers genital mutilation while challenging a gender biased system Close examination of this novel movement Alfredson contends provides crucial insights into why and how states may articulate new human rights that set international precedents Analyzing original empirical data and sociopolitical historical trends the book documents the decisive global impacts of the movement while shedding light on the paradox of noncitizen

politics and asylum seekers little recognized political strength Contrary to expectation findings suggest transnational networks and pressures are not required for some forms of change Rather international trigger cases illuminate a range of other key actors and advocacy strategies leading subsequently to a more comprehensive understanding of human rights acceptance In the case of the women s refugee movement the convergence of human rights and noncitizen politics points toward a new dimension for human rights scholarship that in the current age of globalization is becoming critically important

The Sociology of Globalization Luke Martell,2016-12-16 The new edition of this accessible and wide ranging book demonstrates the distinctive insights that sociology has to bring to the study of globalization Taking in the cultural political and economic dimensions of globalization the book provides a thorough introduction to key debates and critically evaluates the causes and consequences of a globalizing world Bringing the discussion right up to date the new edition includes an increased emphasis on the rise of China the aftermath of the financial crisis and austerity the benefits of migration and open borders and the changing structure of global inequality Data and literature have been updated throughout the book with new sections on global cities the environment and international protests and expanded discussion of gender Martell argues that globalization offers many opportunities for greater interaction and participation in societies throughout the world for instance through the media and migration but also has dark sides such as conflict global poverty climate change and economic insecurity This book will continue to be an ideal companion to students across the social sciences taking courses that cover globalization and the sociology of globalization in particular

NGOs and Social Responsibility Guler Aras,Eduardo Salas,2010-09-08 It is increasingly being accepted that there is a benefit to both parties when a relationship is established between an NGO and a company This book intends to research various aspects of such relationships in order to arrive at some conclusions regarding the potential benefits and pitfalls of such relationships

Fundamentalisms James D. G. Dunn,2015-10-05 What is fundamentalism and what does it really amount to How do uncompromising counter cultural movements make ordinary people behave in extraordinary ways Arguing that an adherence to scriptural literalism and biblical inerrancy is at root a reaction to modernism these are among the key questions with which this timely book grapples But it goes further Other studies have concentrated above all on Christian and Islamic fundamentalism This volume while exploring the origins and articulations of the fundamentalist mindset addresses the subject from the comparative perspective of different religions including Judaism and Hinduism It is innovative in yet another respect Contending that notions of certainty and infallibility are not just a religious phenomenon the book argues that fundamentalism can be detected also in science when scientists use scientific authority to pronounce on areas outside their competence With contributors who include Karen Armstrong Diarmaid MacCulloch Malise Ruthven and Ed Husain this is a bold and incisive assessment of a crucial yet often oversimplified topic

Unbound Richard L. Currier,2015-08-18 Like Guns Germs and Steel a work of breathtaking sweep and originality that reinterprets the human story Although we usually think of technology as something

unique to modern times our ancestors began to create the first technologies millions of years ago in the form of prehistoric tools and weapons Over time eight key technologies gradually freed us from the limitations of our animal origins The fabrication of weapons the mastery of fire and the technologies of clothing and shelter radically restructured the human body enabling us to walk upright shed our body hair and migrate out of tropical Africa Symbolic communication transformed human evolution from a slow biological process into a fast cultural process The invention of agriculture revolutionized the relationship between humanity and the environment and the technologies of interaction led to the birth of civilization Precision machinery spawned the industrial revolution and the rise of nation states and in the next metamorphosis digital technologies may well unite all of humanity for the benefit of future generations Synthesizing the findings of primatology paleontology archeology history and anthropology Richard Carrier reinterprets and retells the modern narrative of human evolution that began with the discovery of Lucy and other Australopithecus fossils But the same forces that allowed us to integrate technology into every aspect of our daily lives have also brought us to the brink of planetary catastrophe Unbound explains both how we got here and how human society must be transformed again to achieve a sustainable future Technology The deliberate modification of any natural object or substance with forethought to achieve a specific end or to serve a specific purpose
