Global Environment Facility:

Annual Report of the Global Environment Facility Global Environment Facility, 1995 *A New Green Order?* Zoe Young, 2002-10-20 The Global Environment Facility GEF is a publicly funded multi billion dollar experiment in global resource management It was set up in 1991 by the World Bank to fund international conventions on climate change and biodiversity Investigating the workings of this little known aid fund Zoe Young takes a critical look at the conflicts involved focusing on how the GEF s agenda relates to questions of globalisation knowledge and accountability in the United States and the World Bank As our landscapes fertility cultures and ecosystems are being destroyed every day Zoe Young gives a disturbing account of the complex issues that must be addressed before the world s environment can be managed more democratically and effectively

Global Environment Facility (GEF) ,2006 The Global Environment Facility GEF established in 1991 has served since then as a primary source of funding for several major international environmental concerns It was designed to provide incremental additional funding for development projects in order to allow incorporation of environmental considerations in four specified areas climate change ozone depletion biological diversity and international waters In recent years land degradation and persistent organic pollutants have been added to its agenda The GEF has provided funding to more than 1 300 projects in 140 nations Although the United States has participated in the GEF since its inception its level of contributions to the GEF has varied widely from 30 million in 1994 to a high of 167 million in 1999 and to 80 million in 2006

Global Environment Facility Global Environment Facility, 1992 **International Environmental Financing** Richard K. Lattanzio, 2013-07 The United States contributes funding to various international financial institutions to assist developing countries to address global climate change and other environmental concerns Congress is responsible for several activities in this regard including 1 authorizing periodic appropriations for U S financial contributions to the institutions and 2 overseeing U S involvement in the programs Issues of congressional interest include the overall development assistance strategy of the United States U S leadership in global environmental and economic affairs and U S commercial interests in trade and investment This report provides an overview of one of the oldest international financial institutions for the environment the Global Environment Facility GEF and analyzes its structure funding and objectives in light of the many challenges within the contemporary landscape of global environmental finance GEF is an independent and international financial organization that provides grants promotes cooperation and fosters actions in developing countries to protect the global environment Established in 1991 it unites 182 member governments and partners with international institutions nongovernmental organizations and the private sector to assist developing countries with environmental projects related to six areas biodiversity climate change international waters the ozone layer land degradation and persistent organic pollutants GEF receives funding from multiple donor countries including the United States and provides grants to cover the additional or incremental costs associated with transforming a project with national benefits into one with global environmental benefits

In this way GEF funding is structured to supplement base project funding and provide for the environmental components in national development agendas GEF partners with several international agencies including the International Bank for Reconstruction and Development the United Nations Development Program UNDP and the United Nations Environment Program UNEP among others and is the primary fund administrator for four Rio Earth Summit Conventions including the Convention on Biological Diversity CBD the United Nations Framework Convention on Climate Change UNFCCC the Stockholm Convention on Persistent Organic Pollutants POPs and the United Nations Convention to Combat Desertification UNCCD GEF also establishes operational guidance for international waters and ozone activities the latter consistent with the Montreal Protocol on Substances that Deplete the Ozone Layer and its amendments Since its inception GEF has allocated 11.5 billion supplemented by more than 57 billion in cofinancing for more than 3 200 projects in over 165 countries GEF is one mechanism in a larger network of international programs designed to address the global environment Accordingly its effectiveness depends on how the fund addresses programmatic issues builds upon national investment plans reacts to recent developments in the financial landscape and responds to emerging opportunities Critics contend that the existing system has had limited impact in addressing major environmental concerns specifically climate change and tropical deforestation and has been unsuccessful in delivering global transformational change A desire to achieve more immediate impacts has led to a restructuring of the Multilateral Development Banks MDBs role in environmental finance and the introduction of many new bilateral and multilateral funding initiatives The future of GEF remains in the hands of the donor countries including the United States which can choose to broaden the mandate and or strengthen its institutional arrangements or reduce and replace it by other bilateral or multilateral funding mechanisms
