Global Transformations David Held, 1999 In this book the authors set forth a new model of globalization that lays claims to supersede existing models and then use this model to assess the way the processes of globalization have operated in different historic periods in respect to political organization military globalization trade

finance corporate productivity migration culture and the environment Each of these topics is covered in a chapter which contrasts the contemporary nature of globalization with that of earlier epochs In mapping the shape and political consequences of globalization the authors concentrate on six states in advanced capitalist societies SIACS the United States the United Kingdom Sweden France Germany and Japan For comparative purposes other states particularly those with developing economics are referred to and discussed where relevant The book concludes by systematically describing and assessing contemporary globalization and appraising the implications of globalization for the sovereignty and autonomy of SIACS It also confronts directly the political fatalism that surrounds much discussion of globalization with a normative agenda that elaborates the possibilities for democratizing and civilizing the unfolding global transformation

Finance in Asia Qiao Liu, Paul Lejot, Douglas W. Arner, 2013-03-12 Asia's demand for second generation financial institutions and markets needs to be met in order for the region's further development to be sustained This book provides a compelling fact based assessment of current practices and regulations in Asia's financial institutions and markets and carefully documents the exciting opportunities and challenges that lie ahead in the region's financial systems This book differs in design from typical treatments of financial institutions and markets because its focus is on Asia rather than using the US model in terms of market configurations or products as a benchmark and it takes a contemporary and forward looking view of financial markets Examples of practice from Asia are used to illustrate major accepted themes in finance and financial regulation To the extent that Asia's main economies share characteristics that are distinct for example in the relationship between government and the banking sector or in aspects of corporate governance the book will discuss the consequences for market operation and intermediation The book's carefully structured facts and rigorously argued analysis carry important implications both for students in business and law and for professionals new to financial markets in Asia It will change the way that Asian financial markets and institutions is taught in universities as well as provide a valuable resource for professionals working in finance in Asia

Global Finance in the 21st Century Steve Kourabas, 2021-09-28 Global Finance in the 21st Century Stability and Sustainability in a Fragmenting World explains finance and its regulation after the global financial crisis The book introduces non finance scholars into the wider debate regarding the conduct and regulation of finance to encourage broader discussion on important societal issues that relate to finance The book also explores the ineffectiveness of the current approach to global prudential governance and places this discussion within the more expansive context of global governance and nationalism in the twenty first century The book argues that fragmentation and the growing trend of promoting informality and voluntarism has facilitated a return to nationalism as a primary form of global governance that acts contrary to post crisis reforms that seek to promote stability and sustainability in the conduct of finance As a remedy Kourabas suggests that we need more not less of what we have traditionally conceived as international law treaties and treaty based international organisations In the field of finance this means not only pursuing financial liberalisation

through free trade and investment treaties but also the inclusion of provisions in these treaties that promotes systemic financial stability and sustainable development objectives Of interest to legal and non legal academics and students legal professionals and policy makers this book offers a nuanced defence of international law as an approach to global governance in finance and beyond as well as reform of international law to meet the needs of twenty first century society
