Global Noise Rap And Hip Hop Outside The U S A:

Global Noise Tony Mitchell, 2001 International scholars explore the hip hop scenes of Europe Canada Japan and Australia

Hip-Hop in Europe Sina A. Nitzsche, Walter Grünzweig, 2013 This is the first collection of essays to take a pan European perspective in the study of hip hop How has it traveled to Europe How has it developed in the various cultural contexts How does it reference the American cultures of origin The book's 21 authors and artists provide a comprehensive overview of hip hop cultures in Europe from the fringes to the centers They address hip hop in a variety of contexts such as class ethnicity gender history pedagogy performance and post communism Series Transnational and Transatlantic American Studies Vol 13

Hip Hop at Europe's Edge Milosz Miszczyński, Adriana Helbig, 2017-03-27 Essays examining the impact of hip hop music on pop culture and youth identity in post Soviet Central and Eastern Europe Responding to the development of a lively hip hop culture in Central and Eastern European countries this interdisciplinary study demonstrates how a universal model of hip hop serves as a contextually situated platform of cultural exchange and becomes locally inflected After the Soviet Union fell hip hop became popular in urban environments in the region but it has often been stigmatized as inauthentic due to an apparent lack of connection to African American historical roots and black identity Originally strongly influenced by aesthetics from the United States hip hop in Central and Eastern Europe has gradually developed unique local trajectories a number of which are showcased in this volume On the one hand hip hop functions as a marker of Western cosmopolitanism and democratic ideology but as the contributors show it is also a malleable genre that has been infused with so much local identity that it has lost most of its previous associations with the West in the experiences of local musicians audiences and producers Contextualizing hip hop through the prism of local experiences and regional musical expressions these valuable case studies reveal the broad spectrum of its impact on popular culture and youth identity in the post Soviet world The volume represents a valuable and timely contribution to the study of popular culture in central and eastern Europe Hip Hop at Europe's Edge will not only appeal to readers interested in contemporary popular culture in central and eastern Europe but also inspire future research on post socialism's unique local adaptations of global cultural trends The Soviet and Post Soviet Review The authors of this edited volume do not romanticize and heroize the genre by automatically equating it with political opposition a fate often suffered by rock before Instead the book has to be given much credit for presenting a very nuanced picture of hip hop's entanglement or non entanglement for that matter with politics in this wide stretch of the world past and present The Russian Review *Being German, Becoming Muslim* Esra Özyürek, 2014-11-23 Every year more and more Europeans including Germans are embracing Islam It is estimated that there are now up to one hundred thousand German converts a number similar to that in France and the United Kingdom What stands out about recent conversions is that they take place at a time when Islam is increasingly seen as contrary to European values Being German Becoming Muslim explores how Germans come to Islam within this antagonistic climate how they manage to balance their love for

Islam with their society's fear of it how they relate to immigrant Muslims and how they shape debates about race religion and belonging in today's Europe Esra Zyrek looks at how mainstream society marginalizes converts and questions their national loyalties In turn converts try to disassociate themselves from migrants of Muslim majority countries and promote a denationalized Islam untainted by Turkish or Arab traditions Some German Muslims believe that once cleansed of these accretions the Islam that surfaces fits in well with German values and lifestyle Others even argue that being a German Muslim is wholly compatible with the older values of the German Enlightenment Being German Becoming Muslim provides a fresh window into the connections and tensions stemming from a growing religious phenomenon in Germany and beyond

Social Media Discourse, (Dis)identifications and Diversities Sirpa Leppanen, Elina Westinen, Samu

Kytola, 2016-12-08 This volume serves as an in depth investigation of the diversity of means and practices that constitute dis identification and identity construction in social media Given the increasing prevalence of social media in everyday life and the subsequent growing diversity in the types of participants and forms of participation the book makes the case for a rigorous analysis of social media discourses and digital literacy practices to demonstrate the range of semiotic resources used in online communication that form the foundation of dis identification processes Divided into two major sections delineating between the dis identification of the self across various social categories and the dis identification of the self in relation to the other the book employs a discourse ethnographic approach to highlight the value of this type of theoretical framework in providing nuanced descriptions of identity construction in social media and illuminating their larger long term societal and cultural implications This volume is a key resource for researchers and students in sociolinguistics discourse studies computer mediated communication and cultural studies

Knowledge as Value Ian Morley, Mira Crouch, 2008 This book considers the place and value of knowledge in contemporary society Knowledge is not a self evident concept both its denotations and connotations are historically situated Since the Enlightenment knowledge has been a matter of discovery through effort and knowledge for its own sake a taken for granted ideal underwriting progressive education as a process which not only taught for and about something but also ennobled the soul While this ideal has not been explicitly rejected in recent decades there has been a tacit move away from a strong emphasis on its centrality even in Higher Education The authors address the values that inform knowledge production in its present forms and seek to identify social and cultural factors that support these values Against the background of increasingly restrictive conditions of academic work the first section of this volume offers incisive critiques of Higher Education with examples drawn from Australia and New Zealand The second group of chapters considers how academics have viewed and have tried to adapt to present circumstances The third section comprises papers that consider epistemological issues in the generation and promulgation of knowledge The chapters in this volume are indicative of the work that needs to be done so that we can come to comprehend and perhaps try and improve our relationship to learning and knowledge in the 21st Century This timely book will be of particular interest to

workers in higher education it should also inform and challenge all those who have concerns for the future of the intellectual life of our civilization Hip-hop Revolution Jeffrey Ogbonna Green Ogbar,2007 As hip hop artists constantly struggle to keep it real this fascinating study examines the debates over the core codes of hip hop authenticity as it reflects and reacts to problematic black images in popular culture placing hip hop in its proper cultural political and social contexts Children and Young People's Cultural Worlds Bragg, Sarah,Kehily, Mary Jane,2013-10-16 Children and young people in the early twenty first century encounter and creatively adapt to a range of cultural phenomena in an increasingly mediated commercialised and globalised world Children and young people s cultural worlds offers a critical introduction to childhood in the digital age Childhood innocence is a concept that often underpins the way adults think about children and new technologies The book challenges adult concerns highlighting instead the diversity of children s experiences and relationships with each other Children s everyday activities are explored in an attempt to understand the distinctiveness of their cultural worlds The book also considers matters of difference on children s lives the consequences of age and the experience of living in different cultural contexts This is the second in a series of four books written by experts in the field which provides an introduction to childhood degree programmes and related modules The series features international case studies examples and readings to supplement the chapters and is illustrated in full colour Other books in the series are Understanding childhood a cross disciplinary approach Childhoods in context Local childhoods global issues
