Core Labour Standards and International Trade Kofi Addo, 2014-11-24 This book examines the labour standards provisions in a number of Regional and Bilateral Trade Agreements and assesses the potential of using the relevant clauses in these trade agreements as a benchmark for a multilateral approach Based on the lessons learned from the Regional model the book proposes a Global Labour and Trade Framework Agreement GLTFA combined with a joint ILO WTO enforcement mechanism to resolve the contentious issue of the link between the CLS and international trade The history of the linkage between the Core Labour Standards CLS and international trade dates back roughly 150 years and has recently become one of the most vexing issues facing policy makers At the heart of the debate is the question whether or not trade sanctions should be imposed on countries that do not respect the CLS as embodied in multilateral conventions administered by the International Labour Organization ILO Concretely this would entail inserting a

social clause in the World Trade Organization WTO rules and would trigger the imposition of sanctions on those countries that do not adhere to the CLS

Territorial Development and Water-Energy-Food Nexus in the Global South Laura Montedoro, Alice Buoli, Alessandro Frigerio, 2022-09-18 This volume collects the results from the Politecnico di

Milan's award-winning Boa_Ma_Nh Maputo research by design project which studied various transdisciplinary approaches to development in the context of the Global South. The challenges of urbanization are well known but that only goes so far in aiding implementation. From local considerations like water access and housing rights to global issues like climate change, territorial development demands solutions that address the needs of the specific population while keeping such goals as sustainability and inclusion in mind. By focusing on a number of towns within the Maputo Province of Mozambique and thus addressing many of the issues endemic to Sub-Saharan Africa, the research structurally presented so as to aid those who may require introduction to the issue makes a clear case in favor of always keeping the Water Energy Food WEF Nexus in mind when formulating development strategies for improving people's lives as well as the wisdom of marrying academic findings with the insights accrued by local NGOs and institutions, thereby expanding the potential idea bank beyond the Eurocentric status quo that has tended to dominate the field.

Spaces of Global Knowledge Diarmid A. Finnegan, Jonathan Jeffrey Wright, 2016-03-09. Global knowledge was constructed, communicated, and contested during the long nineteenth century in numerous ways and places. This book focuses on the life geographies, material practices, and varied contributions to knowledge by medical or botanical cartographic or cultural actors whose lives crisscrossed an increasingly connected world. Integrating detailed archival research with broader thematic and conceptual reflection, the individual case studies use local specificity to shed light on global structures and processes, revealing the latter to be lived and experienced phenomena rather than abstract historiographical categories. This volume makes an original and compelling contribution to a growing body of scholarship on the global history of knowledge. Given its wide geographic disciplinary and thematic range, this book will appeal to a broad readership including historical geographers and specialists in history of science and medicine, imperial history, museum studies, and book history.

Globalization in Southeast Asia Shinji Yamashita, Jeremy Seymour Eades, 2003. The rapid postwar economic growth in the Southeast Asia region has led to a transformation of many of the societies there, together with the development of new types of anthropological research in the region. Local societies with originally quite different cultures have been incorporated into multi-ethnic states with their own projects of nation building based on the creation of national cultures using these indigenous elements. At the same time, the expansion of international capitalism has led to increasing flows of money, people, languages, and cultures across national boundaries, resulting in new hybrid social structures and cultural forms. This book examines the nature of these processes in contemporary Southeast Asia with detailed case studies drawn from countries across the region, including Indonesia, Malaysia, the Philippines, Singapore, and Thailand. At the macro level, these include studies of nation building and the incorporation of minorities. At the micro level, they range from studies of popular cultural forms such as music and textiles to the impact of new sects and the world religions on local religious practice. Moving between the global and the local are the various streams of migrants within the region, including labor migrants responding to the changing distribution of economic opportunities and ethnic minorities.
