Globalisation And The Postcolonial World The New Political Economy Of Development:

Globalization and the Postcolonial World Ankie M. M. Hoogvelt, 2017-10-07 This highly successful text has been updated and revised to take account of new developments in international political economy notably the East Asian crisis and the deepening crisis of African society It also addresses recent forms of international management of instability that are beginning to emerge as contemporary forms of imperialist globalism At the same time more attention is paid to the gathering mosquito cloud of local resistance movements around the world

Globalisation and the Postcolonial World Ankie M. M. Hoogvelt, 1997 This major introductory text analyses key development issues and debates from the colonial period up to the present It traces the historical development of capitalism through successive phases of expansion leading to the present implosion The book's core focus is on the emergence of a new political economy characterised by flexible accumulation and globalisation and its differential impact on rising and declining regions of the post colonial world

The New Political Economy of United States-Caribbean Relations Tony Heron, 2017-07-05 Focusing on the United States and the Caribbean this informative book traces the advent and subsequent growth of production sharing between outsourcing textiles and apparel firms and assembly operations located in specially designated export processing zones The study brings a fresh perspective to the continuing debate about globalization and regionalization in the global political economy and the ways in which state policy in both developed and developing countries shapes the patterns of economic integration and competitiveness among participating countries and firms

The Political Economy of Underdevelopment in the Global South Justin van der Merwe, Nicole Dodd, 2019-01-07 This book presents a new theory explaining underdevelopment in the global South and tests whether financial inputs the government business media GBM complex and spatiotemporal influences drive human development Despite the entrance of emerging powers and new forms of aid trade and investment international political economic practices still support well established systems of capital accumulation to the detriment of the global South Global asymmetrical accumulation is maintained by affective consent forming hegemonic practices and infrastructural uneven economic exchanges labours and by power networks The message for developing countries is that robust GBMs can facilitate human development and development is constrained by spatiotemporal limitations This work theorizes that aid and foreign direct investment should be viewed with caution and that in the global South these investments should not automatically be assumed to be drivers of development

Globalization, Development and The State Jørgen Dige Pedersen, 2008-08-01 In its comparison of two major emerging nations India and Brazil this book approaches the subject through an innovative theoretical combination of developmental states theory and theories of the changing nature of global capitalism

Changing Educational Contexts, Issues and Identities Michael Crossley, Patricia Broadfoot, Michele Schweisfurth, 2007-01-24

Documenting major intellectual and paradigmatic changes in the field of comparative education in the light of the history and development of the journal *Comparative Education* this book compiles a selection of articles from forty years of the journal's

distinguished history It illustrates how changing times have been reflected in the nature and quality of published comparative research Contributors explore the impact of key issues such as marketisation accountability and globalisation upon policy and practice world wide They explore how new challenges faced by the social sciences have seen shifts in the contexts issues and priorities attended to by comparatives and how different approaches to comparative education have influenced the intellectual and professional identities and positioning of those involved Bridging theoretically oriented scholarship with empirically grounded research relating to issues of policy and practice and with chapters addressing questions of relevance throughout the world this book is an invaluable resource of ideas and stimuli for further thinking and research

Emerging Urbanity Richard Marshall, 2013-09-05 Discussions on the global economy focus on the hyper mobility of capital the possibility of instantaneous transmission of information and money around the globe the centrality of information outputs to our economic systems and emphasise the neutralisation of geography and of places What is ignored however is that even the most advanced information industries need a material infrastructure of buildings and work processes and considerable agglomeration in order to operate in global markets Further the globalisation of economic activity has brought with it not only a vast dispersal of offices and factories but also a growing importance of central functions to manage and coordinate such worldwide networks of activities The development of global urban projects is one manifestation of this move towards centrality in urban situations These large scale urban projects are the result of governments seeking competitive advantage in the global economy They are critical components of a nation's global infrastructure In the booming economies of the Asia Pacific Rim prior to the Asian Economic Crisis these urban developments were seen as key components of national economic policies In their making they require a conscious effort to arrange material infrastructure and reinforce that there is a role for urban design in this making *Emerging Urbanity* is an exploration of this role in nine global urban projects in the Asia Pacific Rim

The Postnational Self Ulf Hedetoft, Mette Hjort, 2002 What happens to a sense of belonging when national and regional governments religious organizations community groups political parties and corporations become unstable and incoherent as they have in these nationalist and postnationalist times From a richly interdisciplinary perspective the authors examine notions of citizenship and cultural hybridization migration and other forms of mobility displacements and ethnic cleansing and the nature of national belonging in a world turning ever more fluid aided by transnational flows of capital information people and ideas

Re-Reading Education Policies, 2009-01-01 This book collects studies with a critical education policy orientation and presents itself as a handbook of matters of public concern The term critical does not refer to the adoption of a particular theoretical framework or methodology but rather it refers to a very specific ethos or way of relating to the present and the belief that the future should not be the repetition of the past This implies a concern about what is happening in our societies today and what could or should be happening in the future As a consequence the contributors to the book rely on a general notion of public policy that takes on board processes practices

and discourses at a variety of levels in diverse governmental and non governmental contexts and considers the relation of policy to power to politics and to social regulation Following the detailed introduction that aims at picturing the landscape of studies with a critical education policy orientation the book presents re readings of six policy challenges globalization knowledge society lifelong learning equality democracy social inclusion accountability control efficiency and teacher professionalism It seeks to contextualise these in relation to issues of current global concern at the start of the 21st century Despite the diversity of approaches this collection of critical education policy studies shares a concern with what could be called the public and its education and represents a snapshot of education policy research at a particular time **Fair**

Trade Laura T. Raynolds, Douglas Murray, John Wilkinson, 2007-06-11 This book explores the challenges and potential of Fair Trade one of the world s most dynamic efforts to enhance global social justice and environmental sustainability through market based social change Fair Trade links food consumers and agricultural producers across the Global North South divide and lies at the heart of key efforts to reshape the global economy This book reveals the challenges the movement faces in its effort to transform globalization emphasizing the inherent tensions in working both in and against the market It explores Fair Trade s recent rapid growth into new production regions market arenas and commodity areas through case studies of Europe North America Africa and Latin America undertaken by prominent scholars in each region The authors draw on and advance global commodity and value chain analysis convention and social movement approaches through these case studies and a series of synthetic analytical chapters Pressures for more radical and more moderate approaches intertwine with the movement s historical vision reshaping Fair Trade s priorities and efforts in the Global North and South Fair Trade will be of strong interest to students and scholars of politics globalization sociology geography economics and business

Globalization and Democratization in Asia Kristina Jonsson, Catarina Kinnvall, 2003-09-02 Globalization is a defining feature of our times covering everything from economic and political issues to the spread of American culture Its status is controversial however with some viewing it as leading to greater development for all while others see it as a threat to national cultures and democratic political life This book shows how simplified such binary views are and examines how various globalizing forces have affected Asian societies It discusses the relationship between globalization identity and democratic developments in Asia both theoretically and empirically and aims to understand how economic political and social forces interact and are mutually reinforced in Asian societies **Globalization as Evolutionary Process** George

Modelski, Tessaleno Devezas, William R. Thompson, 2007-12-20 The term globalization has gained widespread popularity yet most treatments are either descriptive and or focused on changes in economic interconnectivity In this volume the concept is seen in broader terms as leading international experts from a range of disciplines develop a long term analysis to address the problems of globalization The editors and contributors develop a framework for understanding the origins and trajectory of contemporary world trends constructing testable and verifiable models of globalization They demonstrate how the

evolutionary approach allows us to view globalization as an enterprise of the human species as a whole focusing on the analytical problem of global change and the rules governing those changes The emphasis is not on broad based accounts of the course of world affairs but selectively on processes that reshape the social of the human species the making of world opinion and the innovations that animate these developments Chapters are clustered into four foci One emphasizes the interpretation of globalization as an explicitly evolutionary process A second looks at historical sequences of such phenomena as population growth or imperial rise and decline as processes that can be modeled and not purely described The third cluster examines ongoing changes in economic processes especially information technology A final cluster takes on some of the challenges associated with forecasting and simulating the complexities of globalization processes This innovative and important volume will be of interest to students and scholars across the social sciences concerned with the phenomenon of globalization

After the Third World? Mark T. Berger, 2013-10-18 The emergence of the Third World is generally traced to onset of the Cold War and decolonization in the 1940s and 1950s In the 1960s and 1970s the three worlds of development were central to the wider dynamics of the changing international order By the 1980s Third Worldism had peaked entering a period of dramatic decline that paralleled the end of the Cold War Into the 21st century the idea of a Third World and even the pursuit of some form of Third Worldism has continued to be advocated and debated For some it has passed into history and may never have had as much substance as it was credited with while others seek to retain or recuperate the Third World and give Third Worldism contemporary relevance Beginning with a comprehensive introduction this edited volume brings together a wide range of important contributions Collectively they offer a powerful overview from a variety of angles of the history and contemporary significance of Third Worldism in international affairs The question remains did the Third World exist what was it does it still have intellectual and political purchase or do we live in a global era that can be described as After the Third World This book was previously published as a special issue of Third world Quarterly

Global Political Economy John Ravenhill, 2017 Global Political Economy offers a comprehensive introduction to the field by combining theory history and contemporary issues and debates The authors who are all leading international experts introduce readers to the diversity of perspectives in GPE through chapters that combine careful analysis with detailed empirical material New to this edition A rewritten chapter on the Global Trade Regime by Professor Ann Capling and Dr Silke Trommer Increased coverage of the rise of new actors especially the BRICs and the role of developing economies in global governance from back cover

Class, States and International Relations Adrian Budd, 2013-06-19 This book provides an outline and a critique of neo Gramscian international relations theory from a Marxist perspective Focusing on the pioneering work of Robert Cox but also drawing on the wider neo Gramscian literature this book presents a comprehensive account of neo Gramscian international relations theory It highlights the neo Gramscian critique of mainstream Realist theory and the theoretical innovations that resulted from the mobilisation of Gramsci's ideas and Cox's emphasis on the social forces underpinning forms of state and

world orders The author explains how this is especially relevant in the current period of war and crisis when the international dimensions of social existence continue to exercise a major influence over domestic politics and economics and when the interest in Marxism can be expected to grow The book continues to provide a critique of the neo Gramscians and of what the author argues is their one sided reading of Gramsci Placing coercion at the centre of a mode of production analysis of world order the author elaborates a Marxist alternative to neo Gramscianism that provides more robust explanations of world order dynamics and change Using a combination of IR theory and historical explanation including of contemporary world order dynamics and US power this book will appeal to both students and scholars of International Relations international studies and international history

Post-Colonial Globalisation Yonit Manor-Percival, Janet Dine, 2023-09-22 With the globalist project immersed in conflicts and adversity Post Colonial Globalisation offers an insight into the actors who animate it and the power dynamics which run through it Using the law as the prism through which these are examined and fusing historical with contemporary perspectives the book contributes to understanding the crisis in which we find ourselves as a moment of both existential danger and an opportunity This book is in two parts The first part charts capitalism's historical progression to globalism through the lens of the act of taking Taking has risen to institutional prominence as a core concept in the legal lexicon of foreign investment protection to denote deprivation of private property Post Colonial Globalisation advances a broader notion of taking as a tool of social criticism From enclosures to colonial settlement to an empire of unequal exchanges to contemporary land grabs private property now so vigorously protected against taking was itself born out of taking The second part focuses on the ecological dimension of neoliberal globalisation and its hallmarks of unlimited growth and excessive extraction It has negatively impacted the climate the earth and its human and non human inhabitants to the point of putting their continued existence at risk Central to this is the deification of property Our understanding of proprietary relations and the rights they confer must be revisited if our interface with the planet is to be reconfigured The emerging doctrine of rights of nature offers one route which may lead us in this direction The two parts complement each other One looks at taking by members of the human species from each other The other looks at taking by the human species from nature This book is aimed at anyone who wishes to gain insight into the current crisis including students academics NGOs and policymakers

Globalization, Regionalization and Cross-Border Regions M. Perkmann, N. Sum, 2002-07-12 Cross border regions are newly emerging social spaces stretching across national borders Globalization makes national borders more permeable and leads to a rearrangement of economic and political interactions This is particularly pronounced within supra regional blocs featuring specific internal border regimes The ensuing opportunities are increasingly seized to create border spanning discourses and institutions This is illustrated in the book by a range of experts analyzing cross border regions in Europe America East Asia and Africa

US Foreign Policy in World History David Ryan, 2000 A survey of US foreign relations and its perceived crusade to spread liberty and democracy in the two hundred years since the American

Revolution It is structured around central episodes and ideas in the history of US foreign policy Malaysia in the World Economy (1824-2011) Azlan Tajuddin, 2012-06-14 Does the industrial development of a country entail the democratization of its political system Malaysia in the World Economy examines this theme with regards to Malaysia in the period between 1824 and 2011 Capitalism was first introduced into Malaysia through colonialism specifically to supply Britain with much needed raw materials for its industrial development Aside from economic exploitation colonial rule had also produced a highly unequal and socially distant multicultural society whose multifaceted divisions kept the colonial rulers in supreme authority After independence Britain ensured that Malaysia became a staunch western ally by structuring in a capitalist system specifically helmed by western educated elites through what appeared to be formal democratic institutions In such a system the Malaysian ruling elites have been able to manage the country's democratic processes to its advantage as well as preempt or suppress serious internal challenges to its power often in the name of national stability As a result an increasingly unpopular National Front political coalition has remained in power in the country since 1957 Meanwhile Malaysia's marginal position in the world economy which has maintained its economic subordination to the developed countries of the west and Japan has reproduced the internal social inequities inherited from colonial rule and channeled the largest returns of economic growths into the hands of the country's foreign investors as well as local elites associated with the ruling machinery Over the years however the state has lost some of its political legitimacy in the face of widening social disparities increased ethnic polarization and prevalent corruption This has been made possible by extensive exposures of these issues via new social media and communications technology Hence informational globalization may have begun to empower Malaysians in a new struggle for political reform thereby reconfiguring the balance of power between the state and civil society Unlike other past research Malaysia in the World Economy combines both macro and micro theoretical approaches in critically analyzing the relationship between capitalist development and democratization in Malaysia within a comparative historical and world systemic context **Writing Global Trade Governance** Michael Strange, 2013-08-15 Writing Global Trade Governance operationalises a key post structuralist methodology in order to expand understanding on the institution at the heart of the global political economy Despite the WTO's centrality and the growing popularity of methods utilizing discourse theory no other text has yet demonstrated how these two fields of learning can be productively combined The book seeks to move beyond existing literatures that assume the WTO to be a structure institution or normative framework in order to enquire into the discursive processes of identity formation that make the WTO both possible and contested The book criticises conventional approaches that treat critical civil society as distinct to the WTO arguing instead that it is only through including such social practices within the field of relations making the WTO that we can properly understand what makes the WTO work The book presents an empirical analysis of the discursive character of the present day WTO including its formation and operation and then moves on to evaluate how it is subject to change within a broader social context The

final stage of the book seeks to discuss the impact of the findings on future research both on the WTO and other institutions. This work is a significant intervention in the literature on the World Trade Organization and the politics of global trade and social movements and will be of great interest to students and scholars of global governance, discourse theory, and international organizations.
