Globalisation Of Finance A Citizens Guide:

The Globalisation of Finance Kavaljit Singh, 1999 Globalisation of finance has now surpassed the globalisation of production and taken on a life of its own No longer associated with flows of real resources international trade or productive investment but merely attracted by short term speculative gains these volatile financial flows make it difficult for governments to pursue independent economic policies that are inconsistent with the interests of global finance capital This book argues that the global economy itself has become highly vulnerable What is now needed are effective regulatory mechanisms backed up by citizen action to exercise social control over global finance capital *Global Futures* Jan Nederveen Pieterse, 2000 This work looks beyond the problems of accelerating globalization to examine how humanity can shape it The contributors suggest a variety of perspectives changes policies and institutional reforms to strive for in our increasingly inter connected world *Complex Systems Theory and Development Practice* Samir Rihani, 2002 Ranging over a wide terrain of social political and economic thinking and specific country experiences the author explains the key concepts in complex systems theory and their possible applications in development practice He examines various development issues and institutions in the light of what he sees as the limitations of rigid linear thinking in an essentially fluid non linear world Little wonder he concludes that the results of half a century of development effort have been so disappointing **BOOK JACKET**
