Globalization and International Security Teresa F. Rodrigues, Rafael García Pérez, Susana de Sousa Ferreira, 2014-12 In a globalised world the international economic crisis that started in 2008 has led to structural changes in the international system and in the balance of power in several terms from a unipolar to a multipolar sphere from the post modern state to the sovereign state from unrestricted integration in the global economy to the independent management of economy itself and from trade integration at a global level to the fragmentation of the economic space in regional areas In short the transition

from a unipolar to a multipolar trend seems to be reflected in the increasing fragmentation of the economic space and has repercussions in the strategic space and security. These changes are also affecting the discourse that explains the process of globalisation and the appropriate strategies to act in it. Maybe until 2007 we could talk about a Western model. But now this is a lot more questionable and we might even talk of an outright censorship. The rise of emerging powers leads to the construction of a new narrative adapted to the values that these countries embody among them the strength and suitability to the principles derived from the sovereign state. A scenario where it is increasingly difficult to adopt the tenets of globalising governance. Our aim is to overview all these structural transformations and assess those changes in the different areas taken into account in this book. We also aim to address possible alternatives which may allow a coordinated management of certain risks although regionally differentiated. We hope this book can be useful to the academic community both graduate and post graduate students professors and researchers of International Relations and Political Science Armed Forces and other security services as well as decision makers in the areas of economics social and security public policies and other readers can find in this book an overview of some major contemporary challenges resulting from the link between security and the globalisation process.

Book jacket

Democratising Globalisation Heikki Patomäki, 2001-08 Propounded by James Tobin in the 1970s the Tobin tax would have levied a small amount from all currency transactions globally. This would have the effect of moderating speculation. It didn't take off but the author believes there is a way to make it work.

**Globalization** Gernot Kohler, Emilio José Chaves, 2003 The majority of people around the world are experiencing oppressive and destructive forces which manifest themselves in starvation income polarisation joblessness stress violence and so on. What is the nature of these forces? If we call them globalisation can there be good globalisation as well as bad globalisation? Is this a new phenomenon or just a continuation of history as it has always been? This book brings together a wide range of expertise addressing these problems from a world systems perspective.

*The Nexus of Economics,*

*Security, and International Relations in East Asia* Avery Goldstein, Edward D. Mansfield, 2012-08-29 While over the last 30 years the global economy's center of gravity has shifted to East Asia the region has remained surprisingly free of interstate military conflict Yet this era of peace and growth has been punctuated by periodic reminders of enduring security problems in the region from China's military modernization to unresolved territorial disputes to persistent tensions on the Korean peninsula This volume is one of the first to treat these issues of economics and security as interconnected rather than separate Its authors leading scholars from the U S and China shed new light on this important nexus by applying insights from a rich variety of approaches to explore and explain the dynamics of a region whose importance for students of both international political economy and international security has grown dramatically They show that both economic and security fundamentals matter if one is to understand the reasons for and evaluate the durability of East Asia's recent peace and prosperity
