Re-Thinking Freire Chet A. Bowers, Frederique Apffel-Marglin, Fr,d,rique Apffel-Marglin, 2004-12-13 This landmark collection of essays by Third World activists highlights two major world changes which they argue have been neglected by Freire and his many followers the Third World grass roots cultural resistance to economic globalization and the ecological crisis One source of the activist authors criticisms of Freire s pedagogy is rooted in their attempts to combine consciousness raising with literacy programs in such diverse cultural settings as Bolivia Peru India Southern Mexico and Cambodia where they discovered that Freire s pedagogy is based on western assumptions that undermine indigenous knowledge systems Equally important these authors

make the case in various ways that a major limitation with Freire's ideas and which is reproduced in the writings of his followers is that he did not recognize the cultural implications of the world's ecological crisis. Several essays in the collection focus directly on how the cultural assumptions Freire took for granted were also the assumptions that gave conceptual and moral legitimacy to the Industrial Revolution and continue to be the basis of the thinking behind economic globalization. The essays also explain why cultural diversity is essential to the preservation of biological diversity and how intergenerational knowledge and patterns of mutual aid within different cultures provide alternatives to a consumer-dependent lifestyle. In his Afterword, C. A. Bowers addresses the need to adopt a more ecological way of thinking, one that recognizes the many ways the individual is nested in the interdependent networks of culture and how diverse cultures are nested in natural systems. It also stresses that one of the tasks of educators is to help students recognize the patterns and relationships of everyday life and to assess them in terms of their contribution to less consumer-dependent relationships and activities. As the essays in this volume affirm, this involves facilitating students' awareness of differences between cultures, the impact of consumerism on ecosystems, and the connections between hyper-consumerism and environmental racism and the colonizing relationship of the South by the North. *Re-Thinking Freire: Globalization and the Environmental Crisis* is a major contribution to this critical endeavor.

A Place to Be Navajo Teresa L. McCarty, 2002-02-01 *A Place To Be Navajo* is the only book-length ethnographic account of a revolutionary Indigenous self-determination movement that began in 1966 with the Rough Rock Demonstration School. Called Din Bi Ita The People's School in recognition of its status as the first American Indian community-controlled school, Rough Rock was the first to teach in the Native language and to produce a body of quality children's literature by and about Navajo people. These innovations have positioned the school as a leader in American Indian and bilingual/bicultural education and have enabled school participants to wield considerable influence on national policy. This book is a critical life history of this singular school and community. McCarty's account grows out of 20 years of ethnographic work by the author with the Din Navajo community of Rough Rock. The story is told primarily through written text but also through the striking black and white images of photographer Fred Bia, a member of the Rough Rock community. Unlike most accounts of Indigenous schooling, this study involves the active participation of Navajo community members. Their oral testimony and that of other leaders in Indigenous Navajo education frame and texture the account. Informed by critical theories of education, this book is not just the story of a single school and community. It is also an inquiry into the larger struggle for self-determination by Indigenous and other minoritized communities, raising issues of identity, voice, and community empowerment. *A Place To Be Navajo* asks whether school can be a place where children learn, question, and grow in an environment that values and builds upon who they are. The author argues that the questions Rough Rock raises and the responses they summon implicate us all.

Place-and Community-Based Education in Schools Gregory A. Smith, David Sobel, 2014-04-08 *Place and community-based education* an approach to teaching and learning that starts with the local addresses two critical gaps in the experience

of many children now growing up in the United States contact with the natural world and contact with community It offers a way to extend young people s attention beyond the classroom to the world as it actually is and to engage them in the process of devising solutions to the social and environmental problems they will confront as adults This approach can increase students engagement with learning and enhance their academic achievement Envisioned as a primer and guide for educators and members of the public interested in incorporating the local into schools in their own communities this book explains the purpose and nature of place and community based education and provides multiple examples of its practice The detailed descriptions of learning experiences set both within and beyond the classroom will help readers begin the process of advocating for or incorporating local content and experiences into their schools

Reclaiming Education

for Democracy Paul Shaker,Elizabeth E. Heilman,2010-04-26 Reclaiming Education for Democracy subjects the prophets and doctrines of educational neoliberalism to scrutiny in order to provide a rationale and vision for public education beyond the limits of No Child Left Behind The authors combine a history of recent education policy with an in depth analysis of the origins of such policy and its impact on professional educators The public face of these policies is separated from motives rooted in politics profit and ideology The book also searches for new insights in understanding the neoliberal and managerialist assault on education by examining the psychology of advocates who demonstrate a special animus toward universal public education The manipulation of public education by No Child Left Behind is a case study in the general approach to public institutions taken by the politicians and theorists in these camps K 12 education has been subjected to deceptive descriptive analyses marginalization of its professional leadership manipulation of its goals the imposition of illegitimate quality markers a grab on its resources by corporate profiteers and a demoralization of its rank and file This book helps us think beyond this new commonsense of education Recipient 2009 AERA Division K Award for Exemplary Research in Teaching and Teacher Education

The Great American Education-industrial Complex Anthony G. Picciano,Joel H.

Spring, 2013 *The Great American Education Industrial Complex* examines the structure and nature of national networks and enterprises that seek to influence public education policy in accord with their own goals and objectives. In the past twenty years significant changes have taken place in the way various interest groups seek to influence policies and practices in public education in the United States. No longer left to the experience and knowledge of educators, American education has become as much the domain of private organizations, corporate entities, and political agents who see it as a market for their ideas, technologies, and ultimately profits. Picciano and Spring posit that educational technology is the vehicle whereby these separate movements, organizations, and individuals have become integrated in a powerful common entity and detail how the educational industrial complex has grown and strengthened its position of influence. This timely, carefully documented, well argued book brings together Picciano's perspective and expertise in the field of technology and policy issues, and Spring's in the history and politics of education, in a unique critical analysis of the education industrial complex and its implications for the future.

Indigenous Educational Models for Contemporary Practice Maenette Kape'ahiokalani Padeken Ah Nee-Benham, 2017-09-25 The book challenges teachers, researchers, educational leaders, and community stakeholders to build dynamic learning environments through which indigenous learners can be boldly indigenous in a global world. Three days of focused dialogue at the 2005 World Indigenous Peoples Conference on Education (WIPCE) led to the charge to create Volume II of *Indigenous Educational Models for Contemporary Practice*. In *Our Mother's Voice*, building on the first volume, Volume II examines these topics: Regenerating and transforming language and culture pedagogy that reminds us that what is contemporary is Native Living; indigenous leadership that engages and ensures the presence, readiness, and civic work of our next generation of leaders; indigenizing assessment and accountability that makes certain that native values and strengths lead this important work; highlighting the power of partnerships that begin with the child/elder, which is then nurtured in community and institutions to cross boundaries of cultural difference, physical geography, native and non-native institutions, and communities. *Indigenous Educational Models for Contemporary Practice*, Volume II honors the wisdom of our ancestors, highlights the diversity of our indigenous stories, and illuminates the passion of forward-looking scholars.

Deculturalization and the Struggle for Equality Joel Spring, 2016-02-26 Joel Spring's history of school policies imposed on dominated groups in the United States examines the concept of deculturalization: the use of schools to strip away family languages and cultures and replace them with those of the dominant group. The focus is on the education of dominated groups forced to become citizens in territories conquered by the U.S., including Native Americans, Enslaved Africans, Chinese, Mexicans, Puerto Ricans, and Hawaiians. In 7 concise, thought-provoking chapters, this analysis and documentation of how education is used to change or eliminate linguistic and cultural traditions in the U.S. looks at the educational, legal, and social construction of race and racism in the United States, emphasizing the various meanings of equality that have existed from colonial America to the present. Providing a broader perspective for understanding the denial of cultural and linguistic rights.

in the United States issues of language culture and deculturalization are placed in a global context The major change in the 8th Edition is a new chapter Global Corporate Culture and Separate But Equal describing how current efforts at deculturalization involve replacing family and personal cultures with a corporate culture to increase worker efficiency Substantive updates and revisions are made throughout all other chapters
