Cerny, 2010-03-24 Rethinking World Politics is a major intervention into a central debate in international relations how has globalization transformed world politics Most work on world politics still presumes the following in domestic affairs individual states function as essentially unified entities and in international affairs stable nation states interact with each other In this scholarship the state lies at the center it is what politics is all about However Philip Cerny contends that recent experience suggests another process at work transnational neopluralism In the old version of pluralist theory the state is less a cohesive and unified entity than a varyingly stable amalgam of competing and cross-cutting interest groups that surround and populate it Cerny explains that contemporary world politics is subject to similar pressures from a wide variety of sub and supra-national actors many of which are organized transnationally rather than nationally In recent years the ability of transnational governance bodies NGOs and transnational firms to shape world politics has steadily grown Importantly the rapidly growing transnational linkages among groups and the emergence of increasingly influential even powerful cross-border interest and value groups is new These processes are not replacing nation states but they are forging new transnational webs of power States he argues are themselves increasingly trapped in these webs After mapping out the dynamics behind contemporary world politics Cerny closes by prognosticating where this might all lead Sweeping in its scope Rethinking World Politics is a landmark work of international relations theory that upends much of our received wisdom about how world politics works and offers us new ways to think about the forces shaping the contemporary world Globalization and the Margins R. Grant, J.

Short, 2002-09-06 Globalization has become one of the dominant ideas of recent times. However, is the debate on globalization as global as it ought to be? In this book, Grant and Rennie Short have brought together prominent experts in the field to consider how globalization affects marginalized countries and groups. A variety of case studies provide a unique assessment of the issue of globalization and offer a new look at the relationship between the global and the local. *Evolutionary Interpretations of World Politics* William R. Thompson, 2016-05-06 The field of international relations is often stagnated in realism and liberalism. Groundbreaking and guaranteed to stir debate, this work will move the field of international relations beyond its current and often inadequate assumptions. The contributors describe how states, ideologies, and other areas of analysis evolve, conquer others, or disappear entirely. Change and the fluid nature of history, though so clearly a part of historical reality, are not so deeply embedded in other paradigms as they are in the variation and selection model of evolutionary international relations. Some contributors lay out the various controversies inherent to the new theory, while others apply the paradigm to specific problems in IR theory. Regardless of the approach, the presentation of this entirely new perspective and method succeeds in forming a new paradigm of international relations. Contributors include William R. Thompson, George Modelski, Vincent S. E. Falger, David P. Rapkin, Jennifer Sterling Folker, Hendrik Spruyt, Stewart Patrick, Paul Hensel, Karen Rasler, Craig N. Murphy, Jeffrey A. Hart, Sangbae, and Brian Pollins.
