Globalization and Language Teaching David Block, 2002? **The Globalisation of English and the English Language Classroom** Claus Gnutzmann, Frauke Intemann, 2008-08-20 The English language is the medium of globalisation and it is itself deeply affected by globalisation As a result the teaching and learning dimension of English as a tool for global communication needs rethinking especially in the traditional English language classroom which is still largely based on Anglo American language norms and contents The articles of this volume reflect the ongoing international discussion with regard to the use and acquisition of English in a world wide context The contributions cover four essential domains of this discussion 1 Political Cultural and Sociolinguistic Dimensions 2 Teaching and Learning English in a Global Context Old and New Standards 3 Learners in Primary Secondary and Higher Education Focus on Europe and 4 Teacher Education The volume goes beyond the language teaching context and approaches the globalisation of English from several perspectives

Internationalizing Teaching, Localizing Learning Paul McPherron, 2016-12-27 Based on ethnographic and policy data collected over a ten year span at a university in the People s Republic of China this book analyses the history of English Language Teaching ELT policies in Chinese higher education The book uses the university as a lens in which to investigate the creative imaginations and divergent re appropriations of teaching methods learning materials and language use in the Chinese ELT context Book chapters move beyond mere descriptions of tensions and point to the local understandings and practices of English teachers both local and foreign and students Working together these teachers and students are constantly articulating new social and political conditions and meanings outside and inside given discourses and traditions of ELT The book s main argument is that these multiple stakeholders must be given a more prominent role in shaping policy and curriculum at universities and other English language contexts around the world

Delombera Negga, Monika Szirmai, Daniel Chan, 2017 The challenges posed by globalization for languages policies and education form the basis of this collection of selected doubly blind peer reviewed articles which have been put together following the 2014 PLIDAM conference on Policies and Ideologies in Language Teaching Actors and discourses The chapters collected in this volume revolve around the topic of globalization which we understand to be a blend of ideas covered by at least four meanings 1 internationalization in reference to the growing interdependence and transactions between countries 2 liberalization which has to do with the forming of an open and borderless world economy 3 universalization of certain phenomena around the world and 4 westernization with an emphasis on the influence of Western values gender equality freedom of speech and other ideas inspired by the West over the rest of the world The four broad themes that the chapters are organised into are I Policies in Language Teaching and Learning II Language Policy Ideology and Minority Languages III Language Teaching and Learning across Cultures IV Language Teaching and Learning with Technology Contributing to the knowledge discussion and debate about the impact that globalization has had on languages policies and education in a wide variety of contexts we hope that this book will be useful and informative to language researchers policy makers and anyone with an interest in the intersecting field between languages policies and education *Glocalising Teaching English as an International Language* Marcus Callies, Stefanie Hehner, Philipp Meer, Michael Westphal, 2021-12-19 The worldwide spread diversification and globalization of the English language in the course of the twentieth and early twenty first centuries has significant implications for English Language Teaching and teacher education We are currently witnessing a paradigm shift towards Teaching English as an International Language TEIL that aims to promote multilingualism and awareness of the diversity of Englishes increase exposure to this diversity embrace multiculturalism and foster cross cultural awareness Numerous initiatives that embrace TEIL can be observed around the world but ELT and teacher education in Germany and other European countries appear to be largely unaffected by this development with standard British and American English and the monolingual native speaker including the corresponding cultural norms still being very much at the center of attention The present volume addresses this gap and is the first of its kind to showcase recent initiatives that aim at introducing TEIL into ELT and teacher education in Germany but which have applicability and impact for other countries with comparable education systems and traditional ELT practices in the Expanding Circle The chapters in this book provide a balanced mix of conceptual empirical and practical studies and offer the perspectives of the many stakeholders involved in various settings of English language education whose voices have not often been heard i e students university lecturers trainee teachers teacher educators and in service teachers It therefore adds significantly to the limited amount of previous work on TEIL in Germany and bridges the gap between theory and practice that will not only be relevant for researchers
