Conceptualizing/Re-conceptualizing Africa Maghan Keita, 2021-10-11 Africa is a legitimizing factor in the world some might argue because of the weakness of its position in the world others might say because of the realization on the part of some African leaders that there are strengths inherent to their states positions that can be tapped Africa's place in the world is being re thought and re shaped And that is exactly what this book is about the authors invite and incite the reader to a much closer and nuanced reading of Africa and its history and the way in which that history over time and space allows for a re conceptualization of Africa's role and place in the world The authors evoke W E B Du Bois on the invention of identity in the modern world In that light these works remind us as Du Bois would that the current invention of Africa is indeed a modern one an identity configured in numerous ways with and without our interventions Contributions by Lamont de Haven King State and Ethnicity in Nigeria Jesse Benjamin Nubians and Nabateans Jeremy Prestholdt Portuguese on the Swahili Coast Thomas Ricks Slaves in Shi'i Iran AD 1500 1900 Launay Robert Late Seventeenth Century Narratives of Travel to Asia and Richard J Payne and Cassandra Veney Taiwan and Africa

Goldstone,Leonid Grinin,Andrey Korotayev,2022-05-19

The 21st century has witnessed a considerable and increasing number of political revolutions around the world This

contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires. Instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject. This handbook offers a comparative perspective on the new wave of revolutions of the last decade. Presenting case studies on the color revolutions, the Arab revolutions of 2010-2011 and the global wave of revolutions in 2013-2018 that spanned regions ranging from Africa to the Caucasus, it offers a better understanding of the varied forms, features and historical backgrounds of revolutions as well as their causes. Accordingly, it highlights recent revolutions in their historical and world systems contexts. The handbook is divided into seven parts, the first of which examines the history of views on revolution and important aspects of the theory of revolution. The second part analyzes revolutions within long-term historical trends and in their world system contexts. In turn, the third part explores specific major revolutionary waves in history. The fourth part analyzes the first revolutionary wave of the 21st century, 2000-2009, the so-called color revolutions, while the fifth discusses the second wave, the Arab Spring, 2010-2013, as an important turning point. The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018. The seventh and final part offers forecasts on the future of revolutions. Given its scope, the book will appeal to scholars and students from various disciplines interested in historical trends, sociopolitical change, contentious politics, social movements and revolutionary processes involving both nonviolent campaigns and political violence. Once again, this volume demonstrates the kind of open-minded systematic analysis that the field of revolutionary studies requires.

The Oxford World History of Empire, Peter Fibiger Bang, Christopher Alan Bayly, Walter Scheidel, 2021. This is the first world history of empire reaching from the third millennium BCE to the present. By combining synthetic surveys, thematic comparative essays and numerous chapters on specific empires, its two volumes provide unparalleled coverage of imperialism throughout history and across continents from Asia to Europe and from Africa to the Americas. Only a few decades ago, empire was believed to be a thing of the past; now it is clear that it has been and remains one of the most enduring forms of political organization and power. We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods such as the relatively short age of European colonialism. The history of empire as these volumes amply demonstrate needs to be drawn on the much broader canvas of global history.

Volume I: The Imperial Experience is dedicated to synthesis and comparison. Following a comprehensive theoretical survey and bold world history synthesis, fifteen chapters analyze and explore the multifaceted experience of empire across cultures and through the ages. The broad range of perspectives includes scale, world systems and geopolitics, military organization, political economy and elite formation, monumental display, law, mapping and registering, religion, literature, the politics of difference, resistance, energy transfers, ecology, memories and the decline of empires. This broad set of topics is united by the central theme of power examined under

four headings systems of power cultures of power disparities of power and memory and decline Taken together these chapters offer a comprehensive and unique view of the imperial experience in world history The Oxford Handbook of Education and Globalization Paola Mattei,Xavier Dumay,Eric Mangez,Jacqueline Behrend,2023 The Oxford Handbook on Education and Globalization brings together in a unique way leading authors in social theory and in political science and reflects on how these two disciplines deal with the relation between globalization and education The handbook develops a firmer and tighter dialogue between social theory and education research and analyzes the political and institutional factors that shape the adoption of global reforms in education at multiple levels of governance It is a must read for anyone looking for a comprehensive overview of how globalization and education interact to result in distinct and varying outcomes across world regions **Indian Sociology** B. K. Nagla,Kameshwar Choudhary,2023-10-31 This book presents a critical and reflective view of fundamental theoretical orientations thematic domains and current debates in Indian sociology It covers the growth of sociology as an academic and pedagogical subject with four main parts Part I discusses important theoretical orientations in Indian sociology including Indological and civilizational approaches as well as the contributions of an eminent sociologist and pioneer in Indian sociology Professor Yogendra Singh concerning the sociology of knowledge liberal democracy and the relevance of his concept of Islamization in the study of Indian society Part II examines substantive areas of study such as caste class and tribe Part III reflects on specific topics of current concern in Indian sociology such as emerging vistas and futures globalization and rethinking area studies for planetary conversations This book is highly relevant for postgraduate students and researchers in sociology social anthropology and social sciences *Area Studies at the Crossroads* Katja Mielke,Anna-Katharina Hornidge,2017-02-28 In this pioneering volume leading scholars from a diversity of backgrounds in the humanities social sciences and different area studies argue for a more differentiated and self reflected role of area based science in global knowledge production Considering that the mobility of people goods and ideas make the world more complex and geographically fixed categories increasingly obsolete the authors call for a reflection of this new dynamism in research teaching and theorizing The book thus moves beyond the constructed divide between area studies and systematic disciplines and instead proposes methodological and conceptual ways for encouraging the integration of marginalized and often overseen epistemologies Essays on the ontological theoretical and pedagogical dimension of area studies highlight how people s everyday practices of mobility challenge scholars students and practitioners of inter and transdisciplinary area studies to transcend the cognitive boundaries that scholarly minds currently operate in
