Globalization From Below:

Globalization from Below Jeremy Brecher, Tim Costello, Brendan Smith, 2000 Brecher Costello and Smith chart out a dynamic and innovative strategy for building the movement to challenge unchecked corporate globalization *Globalization from Below* Gordon Mathews, Gustavo Lins Ribeiro, Carlos Alba Vega, 2012 This book explores globalization as actually experienced by most of the world's people buying goods from street vendors brought by traders moving past borders and across continents under the radar of the law The dimensions and practices of globalization from below are depicted and analyzed in detail by a team of international scholars Topics covered include the New Silk Road African traders in China street hawking in Calcutta and pirate CDs in Mexico The chapters provide intimate portrayals of routes markets and people in locations across the globe and explore theories that can help make sense of these complex and fascinating case studies Students of globalization economic anthropology and developing world economics will find the book invaluable China's Globalization from Below Theodor Tudoroiu, 2021-09-09 This book analyzes the Chinese centered globalization from below brought about by China's entrepreneurial migrants and conceived of as a projection of Chinese power in the Belt and Road Initiative partner states It identifies the features of this globalization from below scrutinizes its mutually reinforcing relationship with China's globalization from above and shows that these two globalizations are intrinsically related to the construction of a new international order It outlines how the actors in China's globalization from below include Chinese emigrants who are located in informal transnational economic networks It reveals that Beijing has enacted many laws that compel these emigrants to contribute to the development of their country of origin but also influences them through the successful promotion of a specific type of deterritorialized nationalism and that China is ready to impose harsh punitive actions on political elites in partner states which fail to protect its migrants or limit their economic activities Finally it argues that China's globalization from below is fundamentally different from the non hegemonic globalization from below represented by among others Lebanese and East Indian traders and that China's globalization from below is rather a self interested national strategy intended to support the construction of a Chinese centered international order Law and Globalization from Below Boaventura de Sousa Santos, César A. Rodríguez-Garavito, 2005-09-08 This book is an unprecedented attempt to analyze the role of the law in the global movement for social justice Case studies in the book are written by leading scholars from both the global South and the global North and combine empirical research on the ground with innovative sociolegal theory to shed new light on a wide array of topics Among the issues examined are the role of law and politics in the World Social Forum the struggle of the anti sweatshop movement for the protection of international labour rights and the challenge to neoliberal globalization and liberal human rights raised by grassroots movements in India and indigenous peoples around the world These and other cases the editors argue signal the emergence of a subaltern cosmopolitan law and politics that calls for new social and legal theories capable of capturing the potential and tensions of

counter hegemonic globalization **Globalizations from Below** Theodor Tudoroiu, 2022-09-09 Globalizations from Below uses a Constructivist International Relations approach that emphasizes the centrality of normative power to analyze and compare the four globalizations from below These are 1 the counter hegemonic globalization represented by the movement of movements of alter globalization transnational social activists who try to put an end to the Neoliberal nature of the Western centered globalization from above 2 the non hegemonic globalization enacted by ant traders that are part of the transnational informal economy 3 the partially similar Chinese centered globalization whose entrepreneurial migrants are strongly influenced and instrumentalized by the Chinese state and 4 the first wave globalization from below that paralleled and outlived the 1870 1914 globalization from above This book identifies their common features and uses them to define the concept of globalization from below as a set of socio economic or socio political processes that involve large transnational flows of people goods and or ideas characterized at least in part by informality They are enacted by entrepreneurial or activist individuals who either take advantage of the normative power of the hegemon at the origin of an international order and an associated globalization from above or explicitly or implicitly transgress contest and try to redefine dominant economic legal political and socio cultural norms thus challenging the existing international order and globalization from above By constructing a unified theoretical framework this book attempts to open a new field of interdisciplinary research that should take globalizations from below out of their current scholarly marginality This is one of the first scholarly works to collectively present more than one globalization from below and will be of great interest to students scholars and researchers of International Relations International Political Economy Development Studies Economic History Anthropology Diaspora Studies and Chinese Studies **Globalization** George Ritzer, Paul Dean, 2014-11-19 Updated to reflect recent global developments the second edition of Globalization A Basic Text presents an up to date introduction to major trends and topics relating to globalization studies Features updates and revisions in its accessible introduction to key theories and major topics in globalization Includes an enhanced emphasis on issues relating to global governance emerging technology global flows of people human trafficking global justice movements and global environmental sustainability Utilizes a unique set of metaphors to introduce and explain the highly complex nature of globalization in an engaging and understandable manner Offers an interdisciplinary approach to globalization by drawing from fields that include sociology global political economy political science international relations geography and anthropology Written by an internationally recognized and experienced author team *Critical Theories, Radical Pedagogies, and Global Conflicts* Gustavo Fischman, 2005 We are living in a time of resurgent global conflicts and imperialistic tensions a time in which many children are being left behind by school systems that appear more concerned with developing accountability schemes and standardized models of testing than with defending the right of every child to have access to a good education The efforts of countless teachers activists and families working and living in poor areas around the world are labeled as failures entirely discredited on the basis of their expendability in

relation to capital gains or simply ignored In response to these oppressive and challenging conditions this book's contributors a group of committed educators and activists working in an ethos of solidarity across geopolitical and geographical borders have advanced arguments and strategies that link educational transformation to the larger struggle to transform oppressive social relations In a clear attempt to move beyond both nostalgia and romanticism *Critical Theories Radical Pedagogies and Global Conflicts* draws from a range of viewpoints conceptual and thematic transnational and crosscultural First World and Third World to articulate new directions for teachers and activists working to demonstrate that another education and indeed another world is possible

Communes and the Venezuelan State Anderson Bean, 2022-03-01 Since 2006 Venezuela has witnessed an explosion of different forms of popular power and participatory democracy Over 47 000 grassroots neighborhood based communal councils and 3 000 communes have been constructed In *Communes and the Venezuelan State The Struggle for Participatory Democracy in a Time of Crisis* Anderson Bean offers a critical analysis of these experiments in popular and workers power and their potential for societal transformation within and beyond Venezuela Drawing on

extensive ethnographic research Bean demonstrates how workers and peasants through networks of popular power exercise agency over their own development while facing challenges from the capitalist state Most importantly this book connects with the far reaching implications that the communal movement in Venezuela has for building a society responsive more to the needs of ordinary people than to the desires of the elites

China's Two Identities Theodor Tudoroiu, 2024-06-07 This book presents an original explanation of the stark contrast between two very different Chinese foreign policy patterns On the one hand there is Beijing's hard power actorness related among others to territorial disputes and wolf warrior intimidating maneuvers On the other hand there are China's peaceful and cooperative actions well illustrated by the Belt and Road Initiative This book shows that this situation is best understood as a consequence of the coexistence of two different Chinese identities respectively associated with the concepts of nineteenth century style territorial empire and twenty first century style postmodern global power The book contends that in China's case they form a virtuous circle characterized by a specific division of labor as both identities are instrumental to the construction of a new Chinese led international order The book provides a detailed analysis of the genesis development features and interplay of these identities It is relevant to scholars in China studies political history contemporary politics and foreign policy

The Declining World Order Richard Falk, 2013-03-07 This work delineates the impact of terrorism and the American response on the basic structure of international relations the dimming prospects for global reform and the tendency to override the role of sovereign territorial states Falk examines the changing role of the state the relevance of institutions the role of individuals and the importance of the worldwide religious resurgence with its positive and negative implications He also considers the post modern geopolitics of the Bush presidency with its emphasis on the militarization of space the control of oil in the Middle East and its reliance on military capabilities so superior to that of other states as to make any challenge impractical

Borderless Borders Frank Bonilla, 2010 Over the past several decades Latinos in the United States have emerged as strategic actors in major processes of social transformation

Implicating Empire Stanley Aronowitz, Heather Gautney, 2009-07-21 Over the past several years while visible protests against the World Bank and the I M F made front page news there has been a growing field of scholarship that looks at the role of globalization for national and international state identities The first truism of globalization that we live in an increasingly interconnected world one in which it is impossible to separate the fate of one nation from that of the others was dramatically illustrated on September 11 2001 when the seemingly distant effects of a civil war in Afghanistan so murderously interrupted life in the United States Implicating Empire is the first book to look at four crucial dimensions of globalization first its role vis a vis the current war second the impact of globalization on domestic U S policy third how globalization will necessarily alter national security both in its definition as well as how it is pursued and finally the future of globalization Including original essays by Stanley Aronowitz Ahmed Rashid Tariq Ali Manning Marable Michael Hardt and Ellen Willis among others Implicating Empire will set the agenda for how globalization is debated and

resisted in the future **The Cooperative Movement** Richard C. Williams, 2016-03-23 Richard Williams surveys the history of the cooperative movement from its origins in the 18th century and deals with the theory of cooperation as contrasted with the Standard Economic Model based on competition The book contains the results of field studies of a number of successful cooperatives both in the developed and developing world It includes insights from personal interviews of cooperative members and concludes by considering the successes and challenges of the cooperative movement as an alternative to the global neo colonialism and imperialism that now characterizes free market capitalist approaches to globalization The book considers democratic and local control of essential economic activities such as the production distribution and retailing of goods and services It suggests that cooperative approaches to these economic activities are already reducing poverty and resulting in equitable distributions of wealth and income without plundering the resources of developing countries

Power, Voice and the Public Good Rodney Hopson, Carol Camp-Yeakey, Francis Musa Boakari, 2008-12-01 Focuses on such themes as attention to the definitional and theoretical underpinnings of globalization the ubiquitous nature and topical display of globalization and the possibilities of understanding redefining and rethinking aspects of globalization with the backdrop of issues that relate to education and the pursuit of public good **The Dilemmas of Social Democracies**

Howard Richards, Joanna Swanger, 2008-01-01 The Dilemmas of Social Democracies seeks to advance the eradication of poverty and the ethical construction of social democracy and sustainable peace Howard Richards and Joanna Swanger argue that the reason that capitalism resists transformation and that social democracy is so hard to achieve is because of the philosophical and institutional underpinnings_ the constitutive rules_ of capitalism the book therefore explores the historical origins of these rules their implications for blocking progress toward social justice and how they can be improved *The SAGE Encyclopedia of Economics and Society* Frederick F.
