Globalization, Philanthropy, and Civil Society Soma Hewa, Darwin Stapleton, 2005-09-13 Examines complex and diverse links between philanthropy civil society and globalization as a single theme that goes beyond standard economic interpretations Has the potential to generate interest among a wider audience of academics public policy makers and administrators in the field of philanthropy civil society and globalization Civil Society: Concepts, Challenges, Contexts Michael Hoelscher, Regina A. List, Alexander Ruser, Stefan Toepler, 2022-05-10 This volume is a collection of original essays prepared by colleagues collaborators and former students on the occasion of Helmut K Anheier s 65th birthday and retirement from the University of Heidelberg An internationally recognized pioneer of nonprofit and civil society studies Anheier focused his work on providing clarity around 1 civil society local and global observing its origins and trajectory and developing theories to explain it 2 the nonprofit sector and institutions within and extending from it including nonprofit organizations philanthropy and social investment and 3 culture as it relates to democracy and back to civil society The essays in this volume refer to these concepts and position them in the context of developments over the last two to three decades The volume is arranged in three sections The first section comprises essays that elucidate concepts and probe theories in the field The second section presents chapters discussing current global challenges and trends in the focal areas The third and final section then comprises country and regional case studies illustrating important aspects of the global challenges or theoretical issues of the two preceding sections A fascinating and up to date overview of key issues and trends in civil society and nonprofit research by an international collection of eminent scholars in these fields this book will be attractive to civil society and nonprofit sector researchers as well as a broader academic community of political scientists sociologists economists and cultural experts Activating China Setsuko Matsuzawa, 2019-01-04 This book examines the effects of the transnational social and environmental advocacy of foreign NGOs in China Based on three case studies including China s first participatory development project its first successful case of transnational anti dam activism and its first national park project the book challenges our typical understanding that global forces shape local outcomes Drawing on ethnographic fieldwork in China and archival work in the United States Matsuzawa sheds light on the entrepreneurial behaviors of Chinese activists researchers and government officials She shows that global projects are often substantially transformed by local actors despite the original intentions of their foreign collaborators and even China s central government Thus it is argued that foreign NGOs are not as hegemonic or culturally imperialistic as is commonly viewed Matsuzawa reveals that their goals may change profoundly as a result of their engagements with local actors on the ground She offers a new theory of transnational advocacy together with an account of the Chinese party state s rising concerns over the influence of foreign NGOs Activating China will be of interest to sociologists and political scientists working in the fields of social movement studies and activism in China **Social Policy Review 20** Tony Maltby, Patricia Kennett, Kirstein Rummery, 2008-06-11 This

collection brings together opinion commentary research evidence professional guidance debate and critique in order to understand the phenomenon of anti social behaviour

America and the Making of Modern Turkey Ali Erken, 2018-03-30
After the fall of the Ottoman Empire Mustafa Kemal Atatürk's government encouraged substantial American investment in education and aid. It was argued that Turkey needed the technical skills and wealth offered by American education and so a series of American schools was set up across the country to educate the Turkish youth. Here Ali Erken in the first study of its kind argues that these organizations had a huge impact on political and economic thought in Turkey acting as a form of soft power for US national interests throughout the 20th Century. Robert College originally a missionary school founded by US benefactors has been responsible for educating two Turkish Prime Ministers writers such as Orhan Pamuk and a huge number of influential economists politicians and journalists. The end result of these American philanthropic efforts Erken argues was a consensus in the 1970s that the country must westernize. This mindset and the opposition viewpoint it engendered has come to define political struggle in modern Turkey torn between a capitalist modern West and an Islamic Ottoman East. The book also reveals how and why the Rockefeller and Ford foundations funneled large amounts of money into Turkey post 1945 and undertook activities in support of Western candidates in Turkey as a bulwark against the Soviet Union. This is an essential contribution to the history of US Turkish relations and the influence of the West in Turkish political thought.

Policy Initiatives Towards the Third Sector in International Perspective Benjamin Gidron, Michal Bar, 2009-12-03
Over the past decade the third sector has had tremendous growth worldwide in both size and importance. As many countries struggle to address this changing reality many have adopted policy initiatives aimed at changing the ways the third sector is addressed. It is a complex process involving different fields of practice different levels of government and different types of third sector organizations. The contributions to this timely volume detail the process as carried out in eight diverse countries: US UK Canada Hungary Germany Ireland Israel Japan all of whom have recently enacted policy initiatives towards the third sector. The studies are comprehensive from reviewing the current policy enacting new laws supervisory mechanisms and modes of funding. Featuring a postscript from Helmut Anheier, UCLA School of Public Policy Los Angeles CA USA and Hertie School of Governance Berlin Germany the thorough analysis in this volume will provide a new understanding of the policy initiatives in the eight countries studied as well as guiding principles for other countries that may implement such initiatives in the future. The resulting work will give researchers in sociology social work third sector research and international economics a new framework for understanding the Third Sector its role in society and its relationships with government the market and the citizens of the country.

Unique Environmentalism

Gunnar Grendstad, Per Selle, Kristin Stromsnes, Oystein Bortne, 2006-11-28 their collective action The more unique the case the more we need to study it not only to understand the case itself but also to understand the structure and limits of environmentalism in general We hope that we have been able to show the value of this research strategy The way we have organized our study is different from the Rootes study 2003 This study emphasizes the importance of different environmental cultures and of political conjunctures in a single country of which different environmental groups take advantage We are not arguing against the fact that branches of environmentalism have features in common across countries e g animal rights and antinuclear movements However we would not go as far as the Rootes study We argue that looking at political conjunctures even if important does not tell the whole story Researchers need to understand the broader context in which political conjunctures and environmental culture operate

Indian Sisters Madelaine Healey, 2014-08-07 Health and medicine cannot be understood without considering the role of nurses both as professionals and as working women In India unlike other countries nurses have suffered an exceptional degree of neglect at the hands of state a situation that has been detrimental to the quality of both rural and urban health care Charting the history of the development of nursing in India over 100 years Indian Sisters examines the reasons why nurses have so consistently been sidelined and excluded from health care governance and policymaking The book challenges the routine suggestion that nursing's poor status is mainly attributable to socio cultural factors such as caste limitations on female mobility and social taboos It argues instead that many of its problems are due to an under achieved relationship between a patriarchal state on the one hand and weak professional nursing organisations shaped by their colonial roots on the other It also explores how the recent phenomenon of large scale emigration of nurses to the West leading to better pay working conditions and career prospects has transformed the profession lifting its status dramatically At the same time it raises questions about the implications of emigration for the fate of health care system in India An important contribution to the growing academic genre of nursing history the book is essential reading for scholars and students of health care the history of medicine gender and women's studies sociology and migration studies It will also be useful to policymakers and health professionals

American Foundations Helmut K. Anheier, David C. Hammack, 2010-09-01 Foundations play an essential part in the philanthropic activity that defines so much of American life No other nation provides its foundations with so much autonomy and freedom of action as does the United States Liberated both from the daily discipline of the market and from direct control by government American foundations understandably attract great attention As David Hammack and Helmut Anheier note in this volume Americans have criticized foundations for their alleged conservatism liberalism elitism radicalism devotion to religious tradition hostility to religion in short for commitments to causes whose significance can be measured in part by the controversies they provoke Americans have also criticized foundations for ineffectiveness and even foolishness Their size alone conveys some sense of the significance of American foundations whose assets amounted to over 530 billion in 2008 despite a dramatic decline of almost

22 percent in the previous year And in 2008 foundation grants totaled over 45 billion But what roles have foundations actually played over time and what distinctive roles do they fill today How have they shaped American society how much difference do they make What roles are foundations likely to play in the future This comprehensive volume the product of a three year project supported by the Aspen Institute's program on the Nonprofit Sector and Philanthropy provides the most thorough effort ever to assess the impact and significance of the nation's large foundations In it leading researchers explore how foundations have shaped or failed to shape each of the key fields of foundation work American Foundations takes the reader on a wide ranging tour evaluating foundation efforts in education scientific and medical research health care social welfare international relations arts and culture religion and social change

Unnatural Selection Mara Hvistendahl, 2011-06-07 Finalist for the Pulitzer Prize A Slate Best Book of 2011 A Discover Magazine Best Book of 2011 Lianyungang a booming port city has China's most extreme gender ratio for children under four 163 boys for every 100 girls These numbers don't seem terribly grim but in ten years the skewed sex ratio will pose a colossal challenge By the time those children reach adulthood their generation will have twenty four million more men than women The prognosis for China's neighbors is no less bleak Asia now has 163 million females missing from its population Gender imbalance reaches far beyond Asia affecting Georgia Eastern Europe and cities in the U S where there are significant immigrant populations The world therefore is becoming increasingly male and this mismatch is likely to create profound social upheaval Historically eras in which there have been an excess of men have produced periods of violent conflict and instability Mara Hvistendahl has written a stunning impeccably researched book that does not flinch from examining not only the consequences of the misbegotten policies of sex selection but Western complicity with them

Public Health and Cold War Politics in Asia Liping Bu, 2023-09-01 Bu and her contributors illustrate the complexity of tensions and negotiations in the development of different types of public health systems in Asia during the early Cold War Competing models of development with different political ideologies and economic enterprises increasingly influenced Asian countries in their efforts to build modern nations after World War II Looking at examples from China Japan South and North Korea India and Indonesia the contributors to this volume look at how a range of Asian countries handled this postcolonial challenge Health became a pivotal area that sustained the political discourse of differentiating one type of

society from the other and promoting each system's advantages over the others during the Cold War. Central to the discourse of a just society and the well-being of citizens was the promotion of public health and welfare for the people. The right to health was considered a fundamental human right as well as an essential social justice. A healthy population was also a prerequisite for national economic prosperity. Public health in postwar Asia was therefore a sociopolitical matter as well as a concern for the well-being of individuals. The health of the people demonstrated the advancement of a nation and provided the insurance for economic productivity and national prosperity. An essential read for historians and policymakers of public health and historians of Asia during the Cold War. Globalization, Civil Society and Philanthropy Rockefeller Archive Center. Conference, 2003. *The Role of American NGOs in China's Modernization* Norton Wheeler, 2013. In the waning years of the Cold War, the United States and China began to cautiously engage in cultural, educational, and policy exchanges which in turn strengthened new security and economic ties. These links have helped shape the most important bilateral relationship in the late twentieth and early twenty-first centuries. This book explores the dynamics of cultural exchange through an in-depth historical investigation of three organizations at the forefront of U.S.-China non-governmental relations: the Hopkins Nanjing Center for Chinese and American Studies, the National Committee on United States-China Relations, and The 1990 Institute. Norton Wheeler reveals the impact of American non-governmental organizations (NGOs) on education, environment, fiscal policy, and civil society in contemporary China. In turn, this book illuminates the important role that NGOs play in complementing formal diplomacy and presents a model of society-to-society relations that moves beyond old debates over cultural imperialism. Finally, the book highlights the increasingly significant role of Chinese Americans as bridges between the two societies. Based on extensive archival research and interviews with leading American and Chinese figures, this book will be of interest to students and scholars of Chinese politics and history, international relations, and transnational NGOs.
